Centers, Laboratories, and Institutes

Independent research laboratories, centers, and institutes perform multidisciplinary research that extends beyond the scope of any one of the University’s organized schools. The listings are not all-inclusive. A comprehensive list of Stanford offices is available on the University’s A to Z Index page (http://www.stanford.edu/atoz).

The following tabs contain information on programs for undergraduates:

- Arts Institute (http://exploredegrees.stanford.edu/archive/2014-15/centerslaboratoriesandinstitutes/#artsinstitutetext)
- Interdisciplinary Honors in the Arts Program
- Center for Spatial and Textual Analysis (CESTA) (https://cesta.stanford.edu)
- Graduate Certificate of Digital Humanities
- Center for the Study of Poverty and Inequality (CPI (http://exploredegrees.stanford.edu/archive/2014-15/centerslaboratoriesandinstitutes/#cpitext))
- Certificate Program on Poverty and Inequality
- Freeman Spogli Institute for International Studies (FSI) (http://exploredegrees.stanford.edu/archive/2014-15/centerslaboratoriesandinstitutes/#freemanspogliinstitutetext)
- Interschool Honors Program in Democracy, Development, and the Rule of Law
- Interschool Honors Program in International Security Studies
- Goldman Interschool Honors Program in Environmental Science, Technology, and Policy

Office of Vice Provost and Dean of Research

Vice Provost and Dean of Research: Ann M. Arvin
Office: 450 Serra Mall, Main Quadrangle, Building 60
Mail Code: 94305-2064
Phone: 650-723-8789 / Fax 650-723-0662
Web Site: http://stanford.edu/dept/DoR
Office Fax: 650-723-0662

The following independent Laboratories, Centers, and Institutes report to the Vice Provost and Dean of Research:

Biological and Life Sciences

- Bio-X, the interdisciplinary program related to bioengineering, biomedicine, and biosciences, http://biox.stanford.edu
- Spectrum (formerly the Stanford Center for Clinical and Translational Education and Research), http://spectrum.stanford.edu

Environmental Sciences

  - Global Climate and Energy Project (G-CEP), http://gcep.stanford.edu

Humanities and Social Sciences

- Center for Advanced Study in the Behavioral Sciences (CASBS), http://www.casbs.org
- Center for the Study of Language And Information (CSLI), http://www-csli.stanford.edu
- Freeman Spogli Institute for International Studies (FSI), http://fsi.stanford.edu
  - Center on Democracy, Development, and the Rule of Law (CDDRL), http://cddrl.stanford.edu
  - Stanford Health Policy (Center for Health Policy/Center for Primary Care and Outcomes Research), http://healthpolicy.stanford.edu
- Center for International Security and Cooperation (CISAC) http://cisac.stanford.edu
- Walter H. Shorenstein Asia-Pacific Research Center (Shorenstein APARC), http://aparc.stanford.edu
- The Europe Center, http://tec.stanford.edu
- Program on Food Security and the Environment, http://fse.stanford.edu
- Inter-University Center for Japanese Language Studies (IUC), http://www.stanford.edu/dept/IUC
- Program on Energy and Sustainable Development (PESD), http://pesd.stanford.edu

**Contacts**

Office: Stanford Arts Institute, Littlefield Center, 2nd Floor
Mail Code: 94305-2255
Email: artsinstitute@stanford.edu
Web Site: http://artsinstitute.stanford.edu/programs/honors-in-the-arts-program/

Courses offered by the Stanford Arts Institute are listed under the subject code ARTSINST (http://explorecourses.stanford.edu/search?page=0&qs=ARTSINST&filter-coursestatus=Active=on&view=catalog&collapse=&academicYear=20142015) on the Stanford Bulletin’s ExploreCourses web site.

The Stanford Arts Institute forges arts connections across the University; gives grants for faculty, staff, and students; presents arts events; incubates new arts projects; and supports artists and cultural groups across campus. Since its founding in 2006, the Stanford Arts Institute has been a catalyst helping the Stanford arts community to grow.

**Honors in the Arts**

The Stanford Arts Institute offers the interdisciplinary Honors in the Arts program, which is open to undergraduates in all majors.

Stanford students in any major can complete a capstone project integrating their major studies with a broad arts perspective and receive "Honors in the Arts." The program features two tracks:

• **Interdisciplinary honors within the arts**—for students majoring in an arts discipline who wish to incorporate other arts disciplines into their work. Students in this track are typically majors in a department such as Art and Art History (http://art.stanford.edu); departments within the Division of Languages, Cultures, and Literatures (https://dlcl.stanford.edu); English (https://english.stanford.edu); Music (http://music.stanford.edu/Home); or Theater and Performance Studies (http://taps.stanford.edu), who wish to do an honors project involving approaches from another arts field.

• **Interdisciplinary honors for non-arts majors**—for students majoring in a non-arts discipline who complete a capstone project incorporating the arts. Students in this track are typically majors in a department other than those described above, who wish to do an honors project involving an arts element. This project should incorporate themes, discourse, or learning from a student’s major.

**Admission**

A minimum overall GPA of 3.67 (A-) is typically required for admission into the program. Upon petition, exceptions may be granted by the program director in the case of students demonstrating particular strengths relevant to honors in the arts.

Students are required to take at least three courses identified as preparing them to execute an interdisciplinary capstone project. These courses should be in either an art practice area relevant to the capstone project or should explore the methodology of interdisciplinary arts study. A sample list of courses can be found on the Arts Institute web site (http://artsinstitute.stanford.edu/program/idhp-recommended-courses). It is recommended that students complete at least two of these courses prior to entering the program. However, upon approval of the program director, students may take these courses while pursuing their honors project. Courses are typically at least 2 units and must be taken for a letter grade.

Prospective students must submit a brief essay outlining their preparation and proposing a capstone project.

Students interested in pursuing Honors in the Arts can apply for acceptance in the junior year. Students should contact the program coordinator at artsinstitute@stanford.edu to begin the application process.

**Requirements**

- Prior to Spring Quarter, Junior Year: Two preparatory courses for interdisciplinary study, 4-8 Units
- Prior to Spring Quarter, Junior Year/Concurrent with Capstone: Preparatory course for interdisciplinary study, 2-4 Units
- Winter Quarter, Junior Year: Apply for admission to Interdisciplinary Arts Honors
- Spring Quarter, Junior Year: Confirm preparatory courses with honors program director
- Autumn Quarter, Senior Year: ARTSINST 200A, 2 Units
- Winter Quarter, Senior Year: ARTSINST 200B, 2 Units
- Spring Quarter, Senior Year: ARTSINST 200C, 2 Units

The capstone project is developed during the senior year through three quarters of workshops. To receive Honors in the Arts, students must fulfill all requirements and must receive at least an 'A-' on the capstone project.

**Stanford Center on Poverty and Inequality**

**Certificate Program on Poverty and Inequality**

The Stanford Center on Poverty and Inequality (CPI) monitors and publicizes trends in poverty and inequality, publishes the country’s leading magazine on poverty and inequality (Pathways Magazine), supports research on the causes of poverty and inequality, and examines the effects of public policy on poverty and inequality. The center carries out these activities with ten research groups addressing the following topics:

- poverty measurement and trends
- educational access and achievement
- income inequality
- social mobility
- safety net use
- recession and recovery effects
- spatial segregation
- racial and ethnic inequality
- discrimination, poverty, and the labor market
- Hispanic poverty, inequality, and mobility.

The Certificate in Poverty and Inequality recognizes undergraduates who have developed expertise in one or more of these research areas. The certificate is conferred as soon as the coursework and research requirements listed below are completed. Although the certificate does not appear on an
official University transcript, it provides formal recognition of a rigorous program of study in the field of poverty and inequality.

**Admission**

Applications to the CPI certificate program are available on the CPI web site (http://www.stanford.edu/group/scspi) and may be filed at any time. Admitted students are assigned an adviser who assists in planning coursework and providing research opportunities within CPI. Contact CPI (inequality@stanford.edu) with any questions.

**Requirements**

The student’s course and research plan, which is submitted with the application, should meet the four requirements listed below.

1. **Core Foundation Course:** (SOC 140 Introduction to Social Stratification. This required introductory course examines the causes and consequences of poverty, inequality, and mobility. It is available as both a regular and online course.

2. **Elective Foundation Course:** The second foundation course is selected from among the normative, empirical, and policy courses listed below. These courses examine the principles by which certain types of living conditions may be deemed unjust or impoverished (i.e., normative analysis), the social processes and forces by which poverty and inequality are generated and maintained (i.e., empirical analysis), and the types of policies and interventions that might reduce or increase poverty and inequality (i.e., policy analysis).

3. **Elective Foundation Courses**

<td>3</td>
</tr>
</tbody>
</table>

4. **Research Project:** Students must complete a research paper on poverty or inequality. Students are invited to join one of the ten CPI research groups and become involved in an ongoing CPI research project that might become the basis for their research paper. Alternatively, students write an independent research paper rather than joining a CPI Research Group. The research paper may either take the form of a research proposal or an empirical research project based on quantitative or qualitative methods. This paper should be completed while the student is enrolled in Independent Study with a CPI faculty affiliate (http://www.stanford.edu/group/scspi).

5. **Additional Elective:** Students must take an elective course with a poverty or inequality focus. This requirement may be satisfied by taking an additional foundation course from the list provided above or by taking any of the preapproved elective courses listed below.

Additionally, other unlisted courses addressing issues of poverty and inequality may also satisfy this requirement, although such courses require CPI approval (which is requested by submitting the Course Approval Form (http://www.stanford.edu/group/scspi). It is recommended that approval be secured in advance of taking an unlisted course. If a new applicant to the certificate program wishes to count a completed course toward the requirements, that should be indicated on the application form and, if necessary, the Course Approval Form (http://www.stanford.edu/group/scspi) should be filled out.)
Graduate Certificate in Digital Humanities

Overview

The Center for Spatial and Textual Analysis (CESTA) offers a Graduate Certificate in Digital Humanities (GCDH) to meet a growing need among the humanities for training in digital methods by leveraging existing resources at Stanford University. The Graduate Certificate in Digital Humanities allows graduate students to acquire and deepen their technical and conceptual skills as well as to strengthen their position in the competitive job market within and beyond the academy. The certificate program has been established as a pilot program from 2014-17.

Completion of the program results in a Certificate, signed by the CESTA director and the chair of the doctoral student’s home department.

The Graduate Certificate in Digital Humanities is issued by the Center for Spatial and Textual Analysis (CESTA) and will not appear on any University record, including the student’s transcript.

Contact

Office: Wallenberg Hall, 450 Serra Mall, Building 160
Mail Code: 94305-2084
Phone: (650) 721-1385. Fax: (650) 725-5916
Email: mattbryant.stanford@gmail.com
Web Site: http://cesta.stanford.edu

Staff

Core Faculty: Mark Algee-Hewitt, Franco Moretti, Richard White, Dan Edelstein, Paula Findlen, Giovanna Ceserani, Walter Scheidel, Elaine Treharne, Amir Eschel, Zephyr Frank

Affiliated CESTA Faculty: Allyson Hobbs, Edith Scheffer, Caroline Winterer, Mark McGurl, Ana Minian, Mikael Wolfe.

CESTA Staff, Affiliates, and others: Celena Allen (GIS), Erik Steiner (visualization design and cartography), Ryan Heuser (programming), Nicole Coleman (information design and visualization), Jason Heppler (digital history), Elijah Meeks (information design), Karl Grossner (information design and cartography).

Admission

Admission to the program is on a rolling basis, and students may apply at any time. Submit a letter of interest and any supporting information to CESTA Lab Manager Matt Bryant (mattbryant.stanford@gmail.com) at mattbryant.stanford@gmail.com. For more information about the new GDCH program or CESTA in general, see the program’s web site (http://cesta.stanford.edu/gcdh) or contact Matt Bryant (mattbryant.stanford@gmail.com) at mattbryant.stanford@gmail.com.

Course work

Students wishing to take part in the first cohort starting in 2014-15 and thereafter are expected to complete one GCDH-approved graduate core course for a letter grade, and one additional approved elective course. The approved core courses for the first year of the program are:

- HISTORY 401A Spatial History: Concepts, Methods, Problems
- ENGLISH 303C The Networks of Enlightenment
- DLCL 396 Humanities+Design: Visualizing the Grand Tour (same as CLASSICS 396, HISTORY 336E)

Students who have completed any of the core courses, or equivalent courses taught by members of the program, in past years are eligible to move to the next step in the GCDH program.

Following or concurrent with the completion of the required core course, students must complete the following two certificate components:

1. Additional course work (1 or more classes, may be taken credit/no credit, and must be approved in advance by the committee in charge) in computer science, information design, statistics, network analysis, linguistics, or other fields approved by the student’s supervisor and the CESTA committee in charge. A list of course recommendations is forthcoming.

2. One of the following:

   a. Independent research project and portfolio including a finished digital humanities product substantially of the authorship of the student; the expectation that the student’s participation culminates in a digital humanities product substantially of the authorship of the student; this must be a minimum of two quarters in duration. The student’s portion of the research is included in the ePortfolio and published on the CESTA web site.

   b. Supervised collaborative research in a CESTA lab with the expectation that the student’s participation culminates in a digital humanities product substantially of the authorship of the student; this must be a minimum of two quarters in duration. The student’s portion of the research is included in the ePortfolio and published on the CESTA web site.

Undergraduate Honors Program and the CISAC Interschool Honors Program in International Security Studies.

**Interschool Honors Program in Democracy, Development, and the Rule of Law**

*Director:* Francis Fukuyama

The Center on Democracy, Development, and the Rule of Law (CDDRL) Undergraduate Senior Honors Program provides students majoring in any Stanford academic department the opportunity to conduct an independent research project focused on the fields of democracy, development, and the rule of law under CDDRL faculty guidance. Students are required to complete a year-long honors research seminar that begins autumn quarter of the junior year. They will spend the last quarter of the senior year working independently with their faculty adviser to complete and submit their honors thesis ahead of their formal defense in mid-May. Upon fulfilling individual department course requirements and completing the honors program, students graduate with a certificate in Honors in Democracy, Development, and the Rule of Law.

Students interested in the program consult with their prospective honors advisers in their junior year to determine the tentative thesis topic, which should have some degree of policy relevance. Prerequisites for the program include: a 3.5 grade-point average at the time they apply; a strong overall academic record; sufficient depth and breadth in the fields of democracy, economic and social development, rule of law, and human rights course work; and demonstrated skills in writing and conducting independent research.

Students are required to attend honors college in Washington, D.C., in September before Autumn Quarter classes begin. Applicants are discouraged from studying abroad during the duration of the CDDRL Undergraduate Honors program.

**Required Course Work**

Two courses that explore the areas of democracy, development, and the rule of law, CDDRL’s flagship undergraduate lecture course taught during Autumn Quarter, which ideally should be completed before the student enters the honors program. DDRL Honors Research Methods Seminars meet on a weekly basis to present their project theses and receive feedback.

**Typical Schedule for CDDRL Honors Program**

Total Units in Sequence: **14**

\(^1\) Optional any quarter during senior year for 1-5 units, repeatable once for credit.

Admitted students must be able to fulfill all course requirements in their individual majors by the time they graduate, in addition to the units required for the honors program. For more information, contact Alice Kada, CDDRL Administrative Manager at akada@stanford.edu or go to http://cddrl.stanford.edu/.

**Interschool Honors Program in International Security Studies**

*Co-Directors:* Coit D. Blacker, Martha Crenshaw

The Center for International Security and Cooperation (CISAC) coordinates a University-wide Interschool Honors Program in International Security Studies. Students chosen for the honors program intern with a security-related organization, attend the program’s honors college in Washington, D.C., in September, participate in a year-long core seminar, and under the direction of a faculty advisor produce an honors thesis relevant to international security policy. Upon fulfilling individual department course requirements and completing the honors program, students graduate in their major with the award of Honors in International Security Studies. To be considered for the program, students must demonstrate sufficient depth and breadth of international security course work. Successful applicants to the program are expected to have taken:

The Center for Space Science and Astrophysics is an interdepartmental organization coordinating research in space science and astrophysics. Its members are drawn from the Department of Geological and Environmental Sciences in the School of Earth Sciences; the departments of Aeronautics and Astronautics, Electrical Engineering, and Mechanical Engineering in the School of Engineering; the departments of Applied Physics, Physics, and Statistics in the School of Humanities and Sciences; the W. W. Hansen Experimental Physics Laboratory; and the SLAC National Accelerator Laboratory. Its membership also includes all faculty and appropriate staff at the Kavli Institute for Particle Astrophysics and Cosmology, located at SLAC and the Physics department.

The facilities of the center are available to any interested and qualified student, who must be admitted by and registered in a department. The departments of Aeronautics and Astronautics, Applied Physics, Electrical Engineering, Mechanical Engineering, and Physics offer opportunities leading to an M.S. or Ph.D. degree for work in space science or astrophysics. The center also offers opportunities to undergraduates who may, for instance, participate in research projects in their junior or senior years, on a part-time basis during the school year or on a full-time basis during the summer. The Astronomy Course Program operates a small student observatory where students may gain practical experience in astronomical observing.

Woods Institute for the Environment

Goldman Interschool Honors Program in Environmental Science, Technology, and Policy

The Woods Institute for the Environment (http://woods.stanford.edu) coordinates a University-wide interschool honors program in environmental science, technology, and policy. The Goldman Honors Program aims to provide a unique capstone experience in environmental solutions. Over the course of the senior year, students select, design, and implement a capstone project that targets understanding or addressing an environmental challenge. Students are required to enroll and participate in three quarters of the weekly Goldman seminar. Students meet as a group with Stanford faculty to discuss a broad range of environmental challenges and potential solutions, and to design and receive feedback on their respective individual capstone projects.

Goldman projects may take the form of a research project mentored by a Stanford faculty member, and targeted at understanding an environmental challenge. In addition, projects may also take the form of creating a solution to an environmental challenge. Such solution projects can be mentored by a Stanford faculty member or by a partner mentor outside of Stanford, and could include design and development of technology, policy, curriculum, or social media. Students should identify a Stanford faculty member (academic council) to serve as their honors adviser prior to applying. Students work with their adviser and Woods staff to find a mentoring partnership either within or outside of Stanford, based on students’ respective interests.

For application information, see the Goldman Honors Program (http://woods.stanford.edu/educating-leaders/education/goldman-honors-program) web site. Students apply in their junior year, with selections being made before the end of Winter Quarter. Once accepted, students must enroll in a prehonors seminar in the Spring Quarter. Students from all programs across campus are eligible and encouraged to apply. Selections are made based on academic record, creativity and relevance of potential capstone project, and cohort balance.
