Communication

Courses offered by the Department of Communication are listed under the subject code COMM on the [CourseSearch/search?view=catalog&catalog=&page=0&q=COMM&filter-catalognumber-COMM=on] Stanford Bulletin's [CourseSearch/search?view=catalog&catalog=&page=0&q=COMM&filter-catalognumber-COMM=on] web site. The department is committed to providing students with analytical and critical skills needed for success in graduate programs, professional schools, or immediate career entry.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of core knowledge within the discipline of communication.
2. the ability to communicate ideas clearly and persuasively in writing.
3. the ability to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
4. the ability to evaluate theory and critique research within the discipline of communication.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Communication and to prepare students for professional careers or doctoral studies. This is achieved through completion of courses in the primary field, as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Communication. Through completion of advanced coursework and rigorous training in research, the doctoral program prepares students to make original contributions to the knowledge of Communication and to interpret and present the results of such research.

Admission

Prospective Coterminal Students: Applications are available on the University Registrar's [http://studentaffairs.stanford.edu/registrar/forms/coterm] web site.

Prospective Graduate Students: Applications are available online at Graduate Admissions [http://gradadmissions.stanford.edu] .

The department requires that applicants for graduate admission submit verbal, quantitative, and analytic scores from the Graduate Record Examination (GRE). Admission to each graduate degree program is competitive and based on the pool of applicants each year rather than on standard criteria that can be stated in advance. See Communication Department admission procedures and requirements [http://comm/phd/general/commdeptapplicationguide.pdf] for detailed information about admission to the department.

Bachelor of Arts in Communication

Preparation

Before declaring the major, students must have completed or be concurrently enrolled in one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 1A</td>
<td>Mass Media, Society, and Democracy</td>
<td>5</td>
</tr>
<tr>
<td>COMM 1B</td>
<td>Media, Culture, and Society</td>
<td>5</td>
</tr>
<tr>
<td>COMM 106</td>
<td>Communication Research Methods</td>
<td>5</td>
</tr>
<tr>
<td>COMM 108</td>
<td>Media Processes and Effects</td>
<td>5</td>
</tr>
</tbody>
</table>

Students interested in declaring the major should apply via Axess and meet with the student services administrator in Building 120, Room 110A, during scheduled office hours. Students are required to take at least 60 units (approximately 12 courses), not counting statistics, to complete the major.

Program of Study

The undergraduate curriculum is intended for liberal arts students who wish to develop an understanding of communication in society, drawing on the perspective of the social sciences. Undergraduates majoring in...
Communication are expected to become acquainted with the fundamental concerns, theoretical approaches and methods of the field, and to acquire advanced knowledge in one or more of the sub-areas of communication: institutions, processes, and effects.

While the department does not attempt to provide comprehensive practical training at the undergraduate level, the curriculum provides a diverse range of internship opportunities, including professional print journalism, some of which are funded by the department's Rebele Internship Program. The department is committed to providing students with analytical and critical skills for future success in graduate programs, professional schools, or immediate career entry.

The major is structured to provide several levels of study: a core curriculum intended to expose students to a broad-based understanding of communication theory and research, and a number of intermediate-level options and electives. Majors also have the opportunity to do advanced research in the form of an honors thesis.

All undergraduate majors are required to complete a set of core communication courses which include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 1A or COMM 1B</td>
<td>5</td>
</tr>
<tr>
<td>COMM 106</td>
<td>5</td>
</tr>
<tr>
<td>COMM 108</td>
<td>5</td>
</tr>
<tr>
<td>COMM 104W or COMM 137W</td>
<td>5</td>
</tr>
<tr>
<td>or COMM 142W</td>
<td></td>
</tr>
</tbody>
</table>

COMM 104W, 120W, 137W, and 142W satisfy the WIM (Writing in the Major) requirement. Core courses are usually offered only once each year.

The department also requires completion of or concurrent registration in an introductory statistics course (STATS 60 Introduction to Statistical Methods: Precalculus) when registering for COMM 106 Communication Research Methods in preparation for courses in methodology and advanced courses in communication processes and effects. It is recommended that this be done as soon as possible so as not to prevent registration in a course requiring statistical understanding. The statistics course does not count toward the 60 units to complete the Communication major.

In addition to the core courses and the statistics requirement, undergraduate majors select courses from the two areas described below. Many of the courses require core courses as prerequisites. Majors select a total of four area courses, taking at least one from each area.

### Area I: Communication Processes and Effects

Area I emphasizes the ways in which communication scholars conduct research in, and consider the issues of, human communication. These studies aim to provide expert guidance for social policy makers and media professionals and include the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 122</td>
<td>5</td>
</tr>
<tr>
<td>COMM 123</td>
<td>5</td>
</tr>
<tr>
<td>COMM 135</td>
<td>5</td>
</tr>
<tr>
<td>COMM 137W</td>
<td>5</td>
</tr>
<tr>
<td>COMM 160</td>
<td>5</td>
</tr>
<tr>
<td>COMM 162</td>
<td>5</td>
</tr>
<tr>
<td>COMM 164</td>
<td>4</td>
</tr>
<tr>
<td>COMM 166</td>
<td>5</td>
</tr>
</tbody>
</table>

### Area II: Communication Systems and Institutions

Area II considers the roles and interaction of institutions such as broadcasting, journalism, constitutional law, and business within communication and mass communication contexts and includes the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 168</td>
<td>1-5</td>
</tr>
<tr>
<td>COMM 169</td>
<td>5</td>
</tr>
<tr>
<td>COMM 172</td>
<td>5</td>
</tr>
<tr>
<td>COMM 183</td>
<td>5</td>
</tr>
<tr>
<td>COMM 326</td>
<td>1-5</td>
</tr>
</tbody>
</table>

### Honors Program

The honors program provides undergraduates the opportunity to undertake a significant program of research in an individual professor/student mentoring relationship. The aim is to guide students through the process of research, analysis, drafting, rethinking, and redrafting, which is essential to excellence in scholarship. Working one-on-one with a faculty adviser, seniors earn 15 Communication units culminating in an honors thesis. In order to be eligible for the honors program, interested majors must have completed the following requirements:

1. **Core Requirements**

   Complete the following core requirements:

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 1A or COMM 1B</td>
<td>5</td>
</tr>
<tr>
<td>COMM 106</td>
<td>5</td>
</tr>
<tr>
<td>COMM 108</td>
<td>5</td>
</tr>
</tbody>
</table>

   The remaining of the 60 required units may be fulfilled with any elective Communication courses or crosslisted courses in other departments.

   To be recommended for the B.A. degree in Communication, the student must complete at least 60 units (approximately 12 courses) in the department. No more than 10 units of course work outside of the department or transfer credit may be applied to meet department requirements. Communication majors must receive a letter grade for all Communication courses unless they are offered only for satisfactory/no credit (S/NC), and must maintain a grade point average (GPA) of 2.0 (C) in courses toward the major. Only courses with a grade of C- or above count towards the major.
2. Select an adviser; and
3. Submit an application to the department by the end of their junior year.

Students are expected to make steady progress on their honors thesis throughout the year.

A final copy of the honors thesis must be read and approved by the adviser and submitted to the department by the eighth week of Summer Quarter (exact date to be arranged). It becomes part of a permanent record held by the department. Honors work may be used to fulfill Communication elective credit, but must be completed and a letter grade submitted prior to graduation. A student failing to fulfill all honors requirements may still receive independent study credit for work completed, which may be applied toward fulfilling major requirements.

The designation "with honors" is awarded by the Department of Communication to those graduating seniors who, in addition to having completed all requirements for the Communication major:

1. complete an honors thesis;
2. maintain a distinguished GPA in all Communication course work;
3. are recommended by the Communication faculty.

Minor in Communication Preparation

Before declaring the minor, students must have completed or be concurrently enrolled in one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 1A</td>
<td>Mass Media, Society, and Democracy</td>
<td>5</td>
</tr>
<tr>
<td>COMM 1B</td>
<td>Media, Culture, and Society</td>
<td>5</td>
</tr>
<tr>
<td>COMM 106</td>
<td>Communication Research Methods</td>
<td>5</td>
</tr>
<tr>
<td>COMM 108</td>
<td>Media Processes and Effects</td>
<td>5</td>
</tr>
</tbody>
</table>

Students interested in declaring the minor should do so no later than Spring Quarter of their junior year by applying via Axess and meeting with the student services administrator in building 120, room 110A, during scheduled office hours.

Program of Study

The minor is structured to provide a foundation for advanced course work in communication through a broad-based understanding of communication theory and research.

Students are required to take 35 units (approximately 7 courses), not counting statistics, to complete the minor. The curriculum consists of three introductory communication core courses that include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 1A</td>
<td>Mass Media, Society, and Democracy</td>
<td>5</td>
</tr>
<tr>
<td>or COMM 1B</td>
<td>Media, Culture, and Society</td>
<td>5</td>
</tr>
<tr>
<td>COMM 106</td>
<td>Communication Research Methods</td>
<td>5</td>
</tr>
<tr>
<td>COMM 108</td>
<td>Media Processes and Effects</td>
<td>5</td>
</tr>
</tbody>
</table>

Core courses are usually offered only once each year. The department also requires completion of -- or concurrent registration in -- an introductory statistics course (STATS 60 Introduction to Statistical Methods: Precalculus) when registering for COMM 106 Communication Research Methods in preparation for courses in methodology and advanced courses in communication processes and effects. It is recommended that this be done as soon as possible so as not to prevent registration in a course requiring statistical understanding. The statistics course does not count toward the 35 units to complete the Communication minor.

In addition to the three core courses and the statistics course, students are required to take one course in each of the two areas as specified below.

The remainder of the 35 required units may be fulfilled with any intermediate-level elective Communication courses or crosslisted courses in other departments. No more than 5 units of course work outside of the department or transfer credit may be applied to meet department requirements. Communication minors must receive a letter grade for all Communication courses unless they are offered only for satisfactory/no credit (S/NC), and must maintain a grade point average (GPA) of 2.0 (C) in courses towards the minor. Only courses with a grade of C- or above count towards the minor. Some courses are not offered every year. Refer to ExploreCourses (http://explorecourses.stanford.edu) for details.

Elective courses

Totaling 10 units.
Master of Arts in Communication / Graduate Program in Journalism

University requirements for the master's degree are described in the "Graduate Degrees (http://www.stanford.edu/dept/registrar/bulletin/4901.htm) " section of this bulletin.

The department awards a terminal M.A. degree in Communication with a subplan in Journalism. This subplan prints on the transcript, but not on the diploma. Applicants for this program are evaluated for admission on different criteria. Work to fulfill graduate degree requirements must be in courses numbered 100 or above.

Stanford students who are completing an M.A. degree and who desire entry into the Ph.D. program must file a Graduate Program Authorization Petition (http://studentaffairs.stanford.edu/registrar/students/grad-auth-pet) in Axess. Such students are considered alongside all other doctoral applicants.

Journalism

Stanford's graduate program in Journalism focuses on the knowledge and skills required to report, analyze, and write authoritatively about public issues and digital media. The curriculum combines a sequence of specialized reporting and writing courses with seminars and courses devoted to deepening the students' understanding of the roles and responsibilities of American news media in their coverage of public issues.

The program emphasizes preparation for the practice of journalism and a critical perspective from which to understand it. The program's objective is twofold:

1. to graduate talented reporters and writers to foster public understanding of the significance and consequences of public issues and the debates they engender; and
2. to graduate thoughtful journalists to respond openly and eloquently when called on to explain and defend the methods and quality of their reporting and writing.

Curriculum

The curriculum includes several required courses as shown below, including a master's project class:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 216</td>
<td>Journalism Law</td>
<td>4</td>
</tr>
<tr>
<td>COMM 225</td>
<td>Perspectives on American Journalism</td>
<td>4</td>
</tr>
<tr>
<td>COMM 240</td>
<td>Digital Media Entrepreneurship</td>
<td>3-5</td>
</tr>
<tr>
<td>COMM 273D</td>
<td>Public Affairs Data Journalism I</td>
<td>4</td>
</tr>
<tr>
<td>COMM 274D</td>
<td>Public Affairs Data Journalism II</td>
<td>4</td>
</tr>
<tr>
<td>COMM 275</td>
<td>Multimedia Storytelling: Reporting and Production Using Audio, Still Images, and Video</td>
<td>3-4</td>
</tr>
<tr>
<td>COMM 279</td>
<td>News Reporting &amp; Writing Fundamentals</td>
<td>3-4</td>
</tr>
<tr>
<td>COMM 289P</td>
<td>Journalism Thesis</td>
<td>4</td>
</tr>
<tr>
<td>COMM 291</td>
<td>Graduate Journalism Seminar</td>
<td>1</td>
</tr>
</tbody>
</table>

Additionally, students are usually required to take two specialized reporting courses, chosen from a list of seven or eight, and two approved electives from among graduate-level courses in the Department of Communication, or from among courses on campus that deal substantively with issues of public importance. The M.A. degree in Communication (Journalism) requires a minimum of 45 units.

Except for COMM 291 Graduate Journalism Seminar and COMM 289P Journalism Thesis, all courses must be taken for a letter grade. To remain in good academic standing, students must maintain a grade point average (GPA) of 3.0 or better. Graduation requires a GPA of 3.0 or better.

Journalism Project

The Journalism Thesis (COMM 289P), a requirement for graduation, is intended as an opportunity for students to showcase their talents as writers and reporters. It is also an opportunity to undertake an in-depth critique of an area of journalism in which the author has a special interest. Work on the project usually begins during Winter Quarter and continues through Spring Quarter in the form of the class COMM 289P. Master's Project. Completed master's projects must be submitted to the project adviser no later than the last day of classes in the Spring Quarter. The project represents a major commitment of time, research, and writing. Although it is not a requirement that the project be published, it must be judged by a member of the faculty to be of a quality acceptable for publication. At a minimum, the project should demonstrate the rigor and discipline required of good scholarship and good journalism; it should offer ample evidence of students' ability to gather, analyze, and synthesize information in a manner that goes beyond what ordinarily appears in daily news media. The deadline to submit the master's thesis is the last day of classes in Spring Quarter.

Media Studies Coterminal Master's Program

The Department of Communication offers current Stanford University undergraduates a one-year coterminal program with an M.A. subplan in Media Studies specializing in either social sciences or journalism. This subplan prints on the transcript, but not on the diploma.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (http://exploredegrees.stanford.edu/archive/2014-15/cotermdegrees) " section of this bulletin. For University coterminal degree program rules and University application forms, see the Stanford Undergrad Coterm Guide (http://undergrad.stanford.edu/advising/student-guides/coterm).

Admission

Applications for coterminal study must be submitted at least four quarters in advance of the expected master's degree conferral date. Applicants must have earned a minimum of 120 units toward graduation (UTG) as shown on the undergraduate unofficial transcript. This includes allowable advanced placement (AP) and transfer credit. Applications must be submitted no later than January 22, 2015, for admission beginning in either Spring Quarter 2014-15 or Autumn or Winter Quarter 2015-16. Journalism track students may begin the program only in Spring Quarter of their senior year. Requirements include: Application for Admission to Coterminal Master's Program form, preliminary program proposal, statement of purpose, letters of recommendation from Stanford professors (two for social sciences, three for journalism track), a written statement from a Communication professor agreeing to act as a graduate adviser (social sciences track only), three samples of writing (journalism track only), and a current unofficial Stanford transcript. GRE scores are not required. Coterminal applications are submitted directly to the department. Review procedures and the Graduate Admissions Committee determine criteria.

Degree Requirements

The Media Studies coterminal master's program provides a broad introduction to scholarly literature in mass communication and offers a social sciences or journalism track. Journalism track students may begin the program only in Spring Quarter of their senior year during which time one elective course is taken towards the master's program and any remaining requirements for the undergraduate degree are completed. In the following academic year, journalism track students follow the same curriculum as students in the Graduate Program in Journalism (see Master of Arts-
Journalism section), less one elective course. Social Science track students need to satisfy the following four basic requirements:

1. **Required Units and GPA:** students must complete a minimum of 45 units in Communication and related areas, including items 2 and 3 below. Courses must be taken for a letter grade if offered. Courses in related areas outside the department must be approved by the student's adviser. A minimum of 36 units must be in the Communication department. No more than two courses (not including the statistics prerequisite) may be below the 200 level. To remain in good academic standing students must maintain a grade point average (GPA) of 3.0 or better. Graduation requires a GPA of 3.0 or better.

2. **Core Requirements:** students must complete COMM 206 Communication Research Methods, COMM 208 Media Processes and Effects and an approved statistics course such as STATS 160 Introduction to Statistical Methods: Precalculus. Other courses occasionally are approved as a substitute before the student is admitted to the program. The statistics course does not count toward the 45 units.

3. **Six Media Studies Courses:** Students must complete a minimum of six additional Communication courses concerned with the study of media from the following list. Not all the listed courses are offered every year and the list may be updated from one year to the next. In addition to the core requirements and a minimum of six courses listed below, students may choose additional courses from the list and any related course approved by the student's adviser.

<table>

<tr>
<td>or COMM 277S</td>
<td>Specialized Writing and Reporting: Sports Journalism</td>
<td>4</td>
</tr>
</tbody>
</table>

4. **The Media Studies M.A. Project:** students following the social sciences track enroll in COMM 290 Media Studies M.A. Project to complete a project over two consecutive quarters that must be preapproved and supervised by the adviser. The completed M.A. project must be submitted to the adviser no later than the last day of classes of the second consecutive quarter.

Additional courses are chosen in consultation with an academic adviser.

## Doctor of Philosophy in Communication

University requirements for the Ph.D. are described in the "Graduate Degrees (http://exploredegrees.stanford.edu/archive/2014-15/graduatedegrees/" section of this bulletin. The minimum number of academic units required for the Ph.D. at Stanford is 135, up to 45 of which can be transferred either from a master's degree at the University or from another accredited institution.

The department offers a Ph.D. in Communication, which focuses on theory and research. First-year students are required to complete introductory courses in communication theory and research, research methods, and statistics. These core courses, grounded in the social science literature, emphasize how people respond to media and how media institutions function. In addition, Ph.D. students must complete a minimum of three literature survey courses and related advanced seminars in Communication. Students also take significant course work outside the department in their area of interest. Each student builds a research specialty relating communication to current faculty interests in such areas as ethics, computational journalism, information processing, information technology, law, online communities, politics and voting, and virtual reality. Regardless of the area of specialization, the Ph.D. program is designed primarily for students interested in university research and teaching or other research or analyst positions.

The Ph.D. program encompasses four to five years of graduate study (subsequent to completion of the Bachelor's degree) during which, in addition to fulfilling University residency requirements, Ph.D. candidates are required to:

1. Complete all departmental course requirements listed below with grades of 'B+' or above, with the exception of STATS 160 ('B' minimum) and an advanced methods course (B- minimum). Required courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 206</td>
<td>Communication Research Methods</td>
<td>4</td>
</tr>
<tr>
<td>COMM 208</td>
<td>Media Processes and Effects</td>
<td>4</td>
</tr>
<tr>
<td>COMM 301</td>
<td>Communication Research, Curriculum</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>Development and Pedagogy</td>
<td></td>
</tr>
<tr>
<td>COMM 311</td>
<td>Theory of Communication</td>
<td>1-5</td>
</tr>
<tr>
<td>COMM 314</td>
<td>Qualitative Social Science Research Methods</td>
<td>1-5</td>
</tr>
<tr>
<td>COMM 317</td>
<td>The Philosophy of Social Science</td>
<td>1-5</td>
</tr>
<tr>

</tr>
<tr>
<td></td>
<td>Precalculus</td>
<td></td>
</tr>
</tbody>
</table>

One advanced methods course.
2. Pass the general qualifying examinations by the end of the second academic year of study and pass a specialized area examination by the end of the fourth academic year of study.

3. Demonstrate proficiency in tools required in the area of research specialization. Identified with the advice of the faculty, such tools may include detailed theoretical knowledge, advanced statistical methods, a foreign language, computer programming, or other technical skills.

4. Complete at least two pre-dissertation research projects (the Major Project and the Minor Project) by the end of the student’s 11th academic quarter.

5. Teach or assist in teaching at least two courses, preferably two different courses, at least one of which is ideally a core undergraduate course:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>

<td>COMM 106</td>
<td>Communication Research Methods</td>
<td>5</td>
</tr>
<tr>
<td>COMM 108</td>
<td>Media Processes and Effects</td>
<td>5</td>
</tr>
</tbody>
</table>

6. Complete a dissertation proposal and proposal meeting approved by the dissertation committee.

7. Apply for candidacy by the end of the first week of the student’s sixth quarter.

8. Complete a dissertation satisfactory to a reading committee of three or more faculty members in the Department of Communication and one faculty member outside of the Department of Communication.

9. Pass the University oral examination, which is a defense of the dissertation.

Because the multifaceted nature of the department makes it possible for the Ph.D. student to specialize in areas that draw on different related disciplines, the plan of study is individualized and developed between the faculty adviser and the student. Ph.D. candidacy is valid for five years.

Additional information is available on the Ph.D. program page (http://comm.stanford.edu/phd/rules) of the department web site.

**Ph.D. Minor in Communication**

Candidates for the Ph.D. degree in other departments who elect a minor in Communication are required to complete a minimum of 20 units of graduate courses in the Department of Communication, including a total of three theory or research methods courses, and are examined by a representative of the department. A department adviser in consultation with the individual student determines the particular communication theory and methods courses.

**Emeriti:** (Professors) Henry S. Breitrose, Donald F. Roberts; (Professor, Teaching) Marion Lewenstein

**Chair:** James T. Hamilton

**Director, Doctoral Program in Communication:** Jeremy Bailenson

**Director, John S. Knight Journalism Fellowships:** James R. Bettsinger

**Director, Media Studies:** Byron Reeves

**Director, Undergraduate Studies:** Theodore L. Glasser

**Managing Director, John S. Knight Journalism Fellowships:** Dawn E. Garcia

**Director, Journalism:** James T. Hamilton

**Professors:** James S. Fishkin, Theodore L. Glasser, James T. Hamilton, Shanto Iyengar, Jon Kroshnick, Byron B. Reeves

**Associate Professors:** Jeremy Bailenson, Fred Turner

**Courtesy Professors:** Jan Kraatz, Nathaniel Persily, Walter Powell, Kristine M. Samuelson

**Lorry I. Lokey Professor of the Practice:** Ann Grimes

**Hearst Professionals in Residence:** Daniel Nguyen, Cheryl Phillips

**Lorry I. Lokey Visiting Professor in Professional Journalism:** Geri Migielicz

**Carlos Kelly McClatchy Visiting Lecturer:** Janine Zacharia

**Lecturers:** Thomas Hayden, Gary Pomerantz, Howard Rheingold, Gaurav Sood, Philip Taubman, David Voelker, James Wheaton

**Overseas Studies Courses in Communication**

The Bing Overseas Studies Program (http://bosp.stanford.edu) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (https://undergrad.stanford.edu/programs/bosp/explore/search-courses) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses (http://explorecourses.stanford.edu) or Bing Overseas Studies (http://bosp.stanford.edu).

**Courses**

**COMM 1A. Mass Media, Society, and Democracy. 4-5 Units.** (Graduate students register for COMM 211.) Open to non-majors. This course examines the role of the news media in contemporary society, with particular attention to cross-national variation in the relationships between journalists, politicians, and citizens. We further consider the potentially transforming effects of technology on the media-politics nexus. Same as: COMM 211

**COMM 1B. Media, Culture, and Society. 5 Units.** The institutions and practices of mass media, including television, film, radio, and digital media, and their role in shaping culture and social life. The media’s shifting relationships to politics, commerce, and identity. Same as: AMSTUD 1B

**COMM 86SI. College Media Lab: digital and reporting skills for student journalists. 1-2 Unit.** Journalism, especially college journalism, is undergoing rapid change in the 21st century. As native digital users, we are uniquely positioned to create and innovate in the new media landscape. This class is designed to provide students with a hands-on education in digitally-fluent college media reporting. Topics include photo, video and data reporting, media rights and responsibilities, and communications careers outside of journalism. The ‘basics’ of writing, blogging, and reporting the news will be taught and applied throughout the quarter. Guest lectures from professional reporters, academics, and communications professionals. Work completed for this class can be submitted to The Stanford Daily for publication. Pizza provided.
COMM 100S. Self-Representation in Digital Media. 3 Units.
Digital media allows ordinary people to document, publicize and reinvent themselves in ways previously only available to the elite. In the first half of this course, we will examine how Westerners have represented themselves as individuals. We will focus on photography, as indicative of a shift in prevalence of self-representation to the masses. In the second half of the course, we will examine how the ways in which individuals are represented may affect their understanding of themselves. Students will experiment with self-representation in different media, including creating virtual representations (avatars) of themselves to be inhabited in immersive virtual reality in the Virtual Human Interaction Lab. In the process, they will learn how the shared digital world shadows, interprets and sometimes overwrites the physical world and day-to-day life.

COMM 101S. Growing up Digital: Technology's role in Cognitive and Social Development. 3 Units.
Interactive digital technology infiltrates homes, schools, and entertainment venues, changing how people think, and socialize. What is the impact of growing up with greater access? How might age influence its use? This course focuses on technology's role in cognitive and social development and how that impacts its design. Topics include brain development, social cognition, symbolic processing, media usage, and self-representation. Coursework includes interacting with digital technologies such as virtual reality and social networking websites and completing a design project.

COMM 102S. Political Communication and Social Media. 3 Units.
This course will explore how social media and mobile computing platforms affect the modern political landscape. Topics: how these technologies change the mix of news, information and campaign materials we get; structure our relationships with candidates and representatives; augment modern politicians' fundraising and campaign efforts; and make possible new forms of political organization and collective action. Possible case studies: the Obama campaign’s successful use of social/mobile technology to campaign in 2008 and 2012; how constituents use social media to communicate with their representatives; and the role of social-mobile technologies in modern revolutionary movements.

COMM 103S. Media Entertainment. 3 Units.
The impact of media entertainment on individuals, social groups, and societies. Sources include a diverse cross-section of entertainment. Introduction to psychological and socio-psychological theories. Empirical findings relating to media entertainment as a stimulus and a reception phenomenon. What renders diverse genres of media content and format enjoyable? Why do individuals pursue entertainment experiences in ever-increasing numbers? What is the political impact of apolitical media entertainment?

COMM 104W. Reporting, Writing, and Understanding the News. 5 Units.
Techniques of news reporting and writing. The value and role of news in democratic societies. Gateway class to journalism. Prerequisite for all COMM 177/277 classes. Limited enrollment. Preference to COMM majors.

COMM 105S. Media Power in American Culture. 3 Units.
An exploration of media power, focused on both digital and mass media. This course aims to interrogate what it means to claim that media are in control of the physical world and day-to-day life.

COMM 106S. Communication Research Methods. 4-5 Units.
(Graduate students register for COMM 206.) Conceptual and practical concerns underlying commonly used quantitative approaches, including experimental, survey, content analysis, and field research in communication. Pre- or corequisite: STATS 60 or consent of instructor. Same as: COMM 206

COMM 106S. Communication Research Methods. 3-5 Units.
An introduction to social science research methods for those who have little or no prior experience in statistics. Designed to provide students with a critical framework and a set of tools to examine social problems - especially those related to the area of communication and the media. Students will be guided through the process of formulating real-world research questions, parsing them into analyzable statements, engaging in systematic data collection and analysis, and finally, thinking about value and limits of its outcome. Hands-on research experience provided.

COMM 107S. Engendering Compassion with Interactive Digital Media. 3 Units.
This course will draw on research regarding behavioral, cognitive, and physiological indicators and predictors of compassion, as well as computer-mediated communication, intimate and ubiquitous computing, social networking, and multitasking to better understand how interactive digital media affects compassionate behaviors, including altruism and helping. For their final project, students will either (1) propose an experiment for future research investigating compassion in HCI, or (2) propose a design change for an extant technology to engender compassionate responses.

COMM 108. Media Processes and Effects. 4-5 Units.
(Graduate students register for COMM 208.) The process of communication theory construction including a survey of social science paradigms and major theories of communication. Recommended: 1 or PSYCH 1.
Same as: COMM 208

COMM 109S. Psychology of Technology & Human-Technology Interaction. 3 Units.
Products of design surround us, and shape our lives. This course will explore the human relationship with technology from a psychological point of view, and probe how technology can be designed to work in concert with those who use it. To survey this vast space, the course will cover seminal readings in the areas of human factors, human-computer interaction, product design, and psychology. The course will also delve into the area of design, with a collaborative final project integrating design and psychology.

COMM 111S. Creative Industries: The Business of Popular Culture. 3 Units.
Examines the processes, institutions and cultural forces that shape production in creative industries. Examines book publishing, journalism, music, video/film, and games. Explores how these industries are organized, how work is structured and how technology and social media affect the production, distribution and discovery of products (like books, songs and videos) and experiences (like concerts). Asks how user-created content, like fan fiction and youtube videos, affect existing media institutions, and asks how digital technologies change the way culture is made.

COMM 113. Computational Methods in the Civic Sphere. 4-5 Units.
The widespread availability of public data provides a rich opportunity for those who can efficiently filter, interpret, and visualize information. Course develops necessary technical skills for data collection, analysis, and publication, including data mining and web visualization, with a focus on civic affairs and government accountability. Open to all majors and a range of technical skill levels. Involves tackling new tools and technical concepts in the pursuit of engaging, public-facing projects. (Graduate students enroll in 213).
Same as: COMM 213

COMM 115S. Fun & Games: Motivational Design of User Experiences. 3-5 Units.
Various interventions are employing virtual rewards, teams, and badges to incentivize real world behavior ranging from commercial purchases to reductions in home energy use. These are examples of motivational design, in which the engaging qualities common to games and other enjoyable activities are leveraged to drive particular behaviors. Using scientific research and industry examples we will examine the key processes and concepts that make up such designs. Along the way we will compare different theoretical approaches to motivation, consider the potential application of emerging technologies for new motivational designs, and discuss the ethics of designing for behavior change.

COMM 116. Journalism Law. 4-5 Units.
(Graduate students register for 216.) Laws and regulation impacting journalists. Topics include libel, privacy, news gathering, protection sources, fair trial and free press, theories of the First Amendment, and broadcast regulation. Prerequisite: Journalism M.A. student or advanced Communication major.
Same as: COMM 216

COMM 117. Digital Journalism. 4-5 Units.
(Graduate students register for COMM 217.) Seminar and practicum. The implications of new media for journalists. Professional and social issues related to the web as a case of new media deployment, as a story, as a research and reporting tool, and as a publishing channel. Prerequisite: Journalism M.A. student or consent of instructor.
Same as: COMM 217

COMM 120W. Digital Media in Society. 4-5 Units.
(Graduate students register for 220.) Contemporary debates concerning the social and cultural impact of digital media. Topics include the historical origins of digital media, cultural contexts of their development and use, and influence of digital media on conceptions of self, community, and state. Priority to Juniors and Seniors.
Same as: AMSTUD 120, COMM 220

COMM 121S. The Human Relationship with Machines. 3 Units.
This course will survey ways in which people have thought about machines, in social and moral terms, from the late 18th century to the mid-20th century. Students will read mostly primary and secondary historical sources, originally published among industrial countries including France, Holland, England, Germany, and the United States, that illustrate major points of contention between actors brought into contact with one another through machine technologies. By the end of the course, students will have a greater understanding of the particular stances taken toward machines throughout modernity, how communication between people during this period has been shaped and occasioned by machines, the variety of forms taken by that communication, and what this history could mean for the role played by machines in our own lives. Topics include the censorship of Julien Offray de la Mettrie, automata and industrialization in 18th century England, the English and French Luddite movements, the literary dystopias of Samuel Butler and Charles Dickens, the American machine breakers movement, Taylorism and technocracy, and the post-war perspectives of Norbert Wiener and Martin Heidegger.

COMM 122. Content Analysis: Studying Communication Artifacts. 4-5 Units.
An empirical and systematic investigation of documented messages in print, graphical, and audio-visual forms and observed human communication behaviors. Focuses on the design and execution of content analytic studies, including manifest vs. latent content, measurement issues, reliability and validity assessment, computer text analysis, and traditional human-coder techniques. Prerequisite: junior, senior or grad standing; COMM 106/206 or an equivalent course in basic social science research. Limited enrollment.
Same as: COMM 222

COMM 123. Argumentation and Persuasion. 4-5 Units.
We all know that appeals based on logic and sound evidence often fail where less rational appeals that "shouldn't" work, succeed. This course examines persuasion, the influencing of attitudes, beliefs or behavior, and locates within that broad subject argumentation, the process of reasoning methodically from evidence. Argumentation, the socially acceptable method of persuasion, typically confines itself to the rules of logic and has as its goal the recognition of states and causal relationships held by the arguer to objectively exist. Other methods of persuasion can succeed while flouting those rules, but only within limits, as the story of the Emperor's New Clothes reminds us. This course will explore whether those limits be accounted for by the capacity limitations and heuristics and biases of human information processing. Topics to be covered include evolutionary explanations; the central and peripheral routes to persuasion; source, channel and receiver factors; attitude-behavior consistency; the roles of involvement, elaboration, affect and social influence; critical thinking skills and logical fallacies. Limited enrollment; preference to juniors, seniors and graduate students, and within these, to Communication majors.
Same as: COMM 223

COMM 125. Perspectives on American Journalism. 4-5 Units.
(Graduate students register for COMM 225.) An examination of the practice of American journalism, focusing on the political, social, cultural, economic and technological forces that have shaped the U. S. press since the early 1800s. Aimed at consumers as well as producers of news, the objective of this course is to provide a framework and vocabulary for judging the value and quality of everyday journalism.
Same as: COMM 225

COMM 130N. The idea of a free press. 3-4 Units.
Preference to freshmen. An examination of the meaning of freedom of the press, tied to but not bound by various Supreme Court rulings on the scope and purpose of the First Amendment's speech and press clauses. Discussions will include a look at the recent and rapid computerization of communication and what it portends for the future of a free press.

COMM 131. Media Ethics and Responsibility. 4-5 Units.
(Graduate students register for COMM 231.) The development of professionalism among American journalists, emphasizing the emergence of objectivity as a professional and the epistemological norm. An applied ethics course where questions of power, freedom, and truth autonomy are treated normatively so as to foster critical thinking about the origins and implications of commonly accepted standards of responsible journalism.
Same as: COMM 231

COMM 133. Need to Know: The Tension between a Free Press and National Security Decision Making. 4-5 Units.
This seminar will examine the dynamic interaction at the highest levels of government and the media when news coverage of secret national security policy and operations impinges on United States defense, diplomatic and intelligence activities and decision making. A prime example: the torrent of secret NSA programs disclosed by Edward Snowden in newspapers and other media. Students will explore attitudes, practices and actions by the media and the government through a series of case studies and simulations. Former editors, reporters and government officials will appear as guest speakers. The goal of the course is to inform students about the vital but often fraught relationship between a free press and the government in a democratic society, especially in the management of national security affairs. For advanced undergraduate and graduate students. Application for enrollment required. The instructor is a former Washington bureau chief of The New York Times. Please email Anne Stickells (annes7@stanford.edu) to request an application. Completed applications are due by 6pm on March 21, 2015. (Grad students register for COMM 233).
Same as: COMM 233
COMM 134. Public Participation and Public Policy. 4-5 Units.
Examines the role of public participation in public policy making. Around the world, policymakers seek to engage their publics. But, even though public participation is important, it is also problematic. Public meetings can become dysfunctional and turn into media spectacles instead of actually gathering the opinions of the public. The question becomes, when and how should the public be consulted in order to effectively impact public policies? There are consequences of engaging the public, and this seminar explores the methods used to engage publics around the world.
Same as: COMM 234

COMM 135. Deliberative Democracy and its Critics. 3-5 Units.
This course examines the theory and practice of deliberative democracy and engages both in a dialogue with critics. In spring quarter 2015, this course will have a special focus on deliberative democracy in the the Greater China region. The course will discuss whether a democracy which emphasizes people thinking and talking together on the basis of good information be made practical in the modern age. What kinds of distortions arise when people try to discuss politics or policy together? The course draws on ideas as well as criticisms from the jury literature, from the psychology of group processes and from the most recent normative and empirical literature on deliberative forums. Case studies from the Deliberative Polling method and other deliberation methods, its applications, defenders and critics, both normative and empirical, will provide a cases studies for discussion. Some course sessions will utilize the case method to examine public consultations, the media, and civil society. Throughout the course, students will address how public participation is currently conducted around the world. As we have all seen successful, but more likely unsuccessful attempts to consult the public and this course will examine the various ways of consulting the public and how governments, media, and the public have responded and used the results.
Same as: AMSTUD 135, COMM 235, COMM 335, POLISCI 234P, POLISCI 334P

COMM 137W. The Dialogue of Democracy. 4-5 Units.
All forms of democracy require some kind of communication so people can be aware of issues and make decisions. This course looks at competing visions of what democracy should be and different notions of the role of dialogue in a democracy. Is it just campaigning or does it include deliberation? Small scale discussions or sound bites on television? Or social media? What is the role of technology in changing our democratic practices, to mobilize, to persuade, to solve public problems? This course will include readings from political theory about democratic ideals - from the American founders to J.S. Mill and the Progressives to Joseph Schumpeter and modern writers skeptical of the public will. It will also include contemporary examinations of the media and the internet to see how those practices are changing and how the ideals can or cannot be realized.
Same as: AMSTUD 137, COMM 237, POLISCI 323T, POLISCI 332T

COMM 140. Digital Media Entrepreneurship. 3-5 Units.
(Graduate students register for COMM 240.) Primarily for graduate journalism and computer science students. Silicon Valley’s new media culture, digital storytelling skills and techniques, web-based skills, and entrepreneurial ventures. Guest speakers. Prerequisite: Instructor consent/ completed application. Application can be found at: http://dme.stanford.edu.
Same as: COMM 240

COMM 142W. Media Economics. 4-5 Units.
Uses economics to examine the generation and consumption of information in communication markets. Covers concepts that play a large role in information economics, including public goods, economics of scale, product differentiation, and externalities. Looks at individual/aggregate; information demands as consumers, producers, audience members, and voters. Topics include economics of Internet, sustainability of accountability journalism, and marketplace of ideas.
Same as: COMM 242

COMM 143W. Communication Policy and Regulation. 4-5 Units.
Focuses on the development, implementation, and evaluation of policies affecting communication markets. Policy issues include universal service, digital divide, Internet regulation, intellectual property, privacy, television violence, content diversity, media ownership, antitrust, and impact of news on government accountability. Examines political economy of communication policy and the evolution of policies across time.
Same as: COMM 243

COMM 147. Modern History and Future of Journalism. 4-5 Units.
(Graduate students register for COMM 247.) The birth and evolution of local and national television news. The modern history of newspapers. Can they survive in the era of online journalism?.
Same as: COMM 247

COMM 151. The First Amendment: Freedom of Speech and Press. 4-5 Units.
Introduction to the constitutional protections for freedom of speech, press, and expressive association. All the major Supreme Court cases dealing with issues such as incitement, libel, hate speech, obscenity, commercial speech, and campaign finance. There are no prerequisites, but a basic understanding of American government would be useful. In addition to a final and midterm exam, students participate in a moot court on a hypothetical case.
(Grad students register for COMM 251).
Same as: COMM 251, POLISCI 125P

COMM 160. The Press and the Political Process. 4-5 Units.
(Graduate students register for COMM 260.) The role of mass media and other channels of communication in political and electoral processes.
Same as: COMM 260, POLISCI 323R

COMM 161. Research Seminar on Political Campaigns. 4 Units.
This seminar will provide students with the opportunity to design and implement a research project concerning the effects of campaigns on public opinion/voting preference. The first half of the course will expose students to principles of research design (including field experiments, surveys and content analysis) and major repositories of election and campaign data including the American National Election Studies, the Wisconsin Advertising Database, and other compilations of national and statewide polls. The second half of the course will cover recent scholarship into the effects of exposure to political campaigns on vote choice, turnout, polarization, and related outcomes. Prerequisite: COMM162/Polisci 120b.

COMM 162. Campaigns, Voting, Media, and Elections. 4-5 Units.
This course examines the theory and practice of American campaigns and elections. First, we will attempt to explain the behavior of the key players -- candidates, parties, journalists, and voters -- in terms of the institutional arrangements and political incentives that confront them. Second, we will use current and recent election campaigns as "laboratories" for testing generalizations about campaign strategy and voter behavior. Third, we examine elections from the academic literature dealing with the origins of partisan identity, electoral design, and the immediate effects of campaigns on public opinion, voter turnout, and voter choice. As well, we'll explore issues of electoral reform and their long-term consequences for governance and the political process.
Same as: COMM 262, POLISCI 120B

COMM 163. Running Time: Running and Winning Elections. 5 Units.
This course aims to teach you the nuts-n-bolts of political campaigning. How do campaign consultants organize a campaign, draft a strategy, come up with a theme, target voters, raise money, write and produce ads and get voters to the ballot? Drawing upon academic writings in the fields of political science and communication, articles by campaign consultants, TV ads, and documentaries, you will learn all about how elections are won and lost. You will master, and yet learn to be critical of, current electoral politics with their emphasis on money, polls, and sound bites. Finally, you will harness this new knowledge to do some good, by promoting a worthy cause.
Same as: POLISCI 229R
COMM 164. The Psychology of Communication About Politics in America. 4-5 Units.
Focus is on how politicians and government learn what Americans want and how the public’s preferences shape government action; how surveys measure beliefs, preferences, and experiences; how poll results are criticized and interpreted; how conflict between polls is viewed by the public; how accurate surveys are and when they are accurate; how to conduct survey research to produce accurate measurements; designing questionnaires that people can understand and use comfortably; how question wording can manipulate poll results; corruption in survey research. Same as: COMM 264, POLISCI 224L, PSYCH 170

COMM 166. Virtual People. 4-5 Units.
(Graduate students register for COMM 266.) The concept of virtual people or digital human representations; methods of constructing and using virtual people; methodological approaches to interactions with and among virtual people; and current applications. Viewpoints including popular culture, literature, film, engineering, behavioral science, computer science, and communication. Same as: COMM 266

COMM 167. Advanced Seminar in Virtual Reality Research. 1-3 Unit.
Restricted to students with previous research experience in virtual reality. Experimental methods and other issues.

COMM 168. Experimental Research in Advanced User Interfaces. 1-5 Unit.
Project-based course involves small (3-4) person teams going through all parts of the experimental process: question generation, experiment design, running, and data analysis. Each team creates an original, publishable project that represents a contribution to the research and practicum literatures. All experiments involve interaction between people and technology, including cars, mobile phones, websites, etc. Prerequisite: consent of instructor. Same as: COMM 268, COMM 368, ME 468

COMM 169. Computers and Interfaces. 4-5 Units.
(Graduate students register for COMM 269.) Interdisciplinary. User responses to interfaces and design implications of those responses. Theories from different disciplines illustrate cognitive, emotional, and social responses to textual, voice-based, pictorial, metaphorical, conversational, adaptive, agent-based, intelligent, and anthropomorphic interfaces. Group design project applying theory to the design of an interactive interface. Same as: COMM 269

COMM 171. Moving Pictures: How the Web, Mobile and Tablets are Revolutionizing Video Journalism. 3-5 Units.
(Graduate students register for 271.) Examine the emerging role of video journalism across web, tablet and mobile platforms. What are the specific needs of these platforms? How can new reporting tools be integrated to efficiently produce video news content? We’ll examine case studies and hear from guest speakers about innovations in video journalism on these platforms. Students will produce video journalism pieces using mobile tools, optimized for viewing on mobile devices. Prerequisite: Journalism MA student or instructor’s consent. Same as: COMM 271

COMM 172. Media Psychology. 4-5 Units.
(Graduate students register for COMM 272.) The literature related to psychological processing and the effects of media. Topics: unconscious processing; picture perception; attention and memory; emotion; the physiology of processing media; person perception; pornography; consumer behavior; advanced film and television systems; and differences among reading, watching, and listening. Same as: COMM 272

COMM 176. Advanced Digital Media Production. 4-5 Units.
In-depth reporting and production using audio, images and video. Focus on an in-depth journalism project with appropriate uses of digital media: audio, photography, graphics, and video. Topics include advanced field techniques and approaches (audio, video, still) and emphasis on creating a non-fiction narrative arc in a multimedia piece of 10-12 minutes. Prerequisite: COMM 275 or consent of instructor. Same as: COMM 276

COMM 177A. Computational Journalism. 4 Units.
Focuses on using data and algorithms to lower the cost of discovering stories or telling stories in more engaging and personalized ways. Project based assignments based on real-world challenges faced in newsrooms. Prior experience in journalism or computational thinking helpful. Prerequisite: COMM 273D, COMM 113/213, or the consent of instructor. Same as: COMM 277A

COMM 177C. Specialized Writing and Reporting: Environmental Journalism. 4-5 Units.
(Graduate students register for COMM / ENVRES 277C.) Practical, collaborative, writing-intensive course in science-based environmental journalism. Science and journalism students learn how to identify and write engaging stories about environmental issues and science, how to assess the quality and relevance of environmental news, how to cover the environment and science beats effectively, and how to build bridges between the worlds of journalism and science. Limited enrollment: preference to journalism students and students in the natural and environmental sciences. Prerequisite: COMM 104, ENVRES 200 or consent of instructor. Admissions by application only, available from thayden@stanford.edu. Same as: COMM 277C, EARTHYSYS 177C, EARTHYSYS 277C, ENVRES 277C

COMM 177D. Specialized Writing and Reporting: Magazine Journalism. 4-5 Units.
(Graduate students register for COMM 277D.) How to report, write, edit, and read magazine articles, emphasizing long-form narrative. Tools and templates of story telling such as scenes, characters, dialogue, and narrative arc. How the best magazine stories defy or subvert conventional wisdom and bring fresh light to the human experience through reporting, writing, and moral passion. Prerequisite: 104 or consent of instructor. Same as: COMM 277D

COMM 177G. Specialized Writing and Reporting: Covering Silicon Valley. 4-5 Units.
(Graduate students register for COMM 277G.) Business reporting basics in the context of Silicon Valley’s technology scene. Prerequisite: 104 or consent of instructor. Same as: COMM 277G

COMM 177I. Becoming a Watchdog: Investigative Reporting Techniques. 4-5 Units.
Graduate students register for COMM 277I.) Learn how to apply an investigative and data mindset to journalism, from understanding how to background an individual or entity using online databases to compiling or combining disparate sets of information in ways that unveil wrongdoing or mismanagement. Focuses on mining news, tracking associations, and using visualizations. Stories produced apply investigative techniques to beat reporting, breaking news, and long form journalism. Prerequisite: COMM 104W, or consent of instructor. Same as: COMM 277I
COMM 177S. Specialized Writing and Reporting: Sports Journalism. 4-5 Units.
(Graduate students register for COMM 277S.) Workshop. An examination of American sports writing from the 1920's Golden Age of Sports to present. Students become practitioners of the sports writing craft in an intensive laboratory. Hones journalistic skills such as specialized reporting, interviewing, deadline writing, creation of video projects, and conceptualizing and developing stories for print and online. Prerequisite: 104 or consent of instructor.
Same as: COMM 277S

COMM 177Y. Specialized Writing and Reporting: Foreign Correspondence in the Middle East and Asia. 4-5 Units.
(Graduate students register for COMM 277Y.) What's involved in working as a foreign correspondent in these important and volatile parts of the world, where in many cases journalists are not respected and may face danger -- taught by a journalist who has worked extensively in both regions. (no prerequisites).
Same as: COMM 277Y

COMM 182. Social Media Issues. 4-5 Units.
(Graduate students register for COMM 282.) Students will take away from this course a set of conceptual tools, a vocabulary, and an analytical framework with which to recognize, understand, and more effectively manage new social practices online, together with a familiarity with the literature regarding social media and identity, community, collective action, public sphere, social capital, networks, and social networks. Students will also develop skills at using online forums, blogs, microblogs, wikis for research, collaboration, and communication. Limited enrollment. Prerequisite: instructor consent. Please see http://comm.stanford.edu/faculty-rheingold/ for application instructions. Contact instructor at: howard@rheingold.com.
Same as: COMM 282

COMM 183. Social Media Literacies. 4-5 Units.
Today's personal, social, political, economic worlds are all affected by digital media and networked publics: viral videos, uprisings from Tahrir to #OWS, free search engines, abundant inaccuracy and sophisticated disinformation online, indecipherable, and searchable digital footprints, laptops in lecture halls and BlackBerries at the dinner table. 20-something social media billionaires, massive online university courses. Introduction to the literature about and direct experience of these new literacies: research foundations and practical methods to control attention, attitudes and tools necessary for critical consumption of information, best practices of individual digital participation and collective participatory culture, the use of collaborative media and methodologies, and the application of network know-how to life online. Contrasting perspectives through readings and classroom and online discussion. Students collaborate and cooperate in their learning during and between classes through small group discussions and face to face exercises, forums, blogs, mindmaps and wikis. Prerequisite: instructor consent. See http://comm.stanford.edu/faculty-rheingold/ for application instructions; contact instructor at: howard@rheingold.com.
Same as: COMM 283

COMM 195. Honors Thesis. 5 Units.
Qualifies students to conduct communication research. Student must apply for department honors thesis program during Spring Quarter of junior year.

COMM 199. Individual Work. 1-5 Unit.
For students with high academic standing. May be repeated for credit.

COMM 206. Communication Research Methods. 4-5 Units.
(Graduate students register for COMM 206.) Conceptual and practical concerns underlying commonly used quantitative approaches, including experimental, survey, content analysis, and field research in communication. Pre- or corequisite: STATS 60 or consent of instructor.
Same as: COMM 106

COMM 208. Media Processes and Effects. 4-5 Units.
(Graduate students register for COMM 208.) The process of communication theory construction including a survey of social science paradigms and major theories of communication. Recommended: 1 or PSYCH 1.
Same as: COMM 108

COMM 211. Mass Media, Society, and Democracy. 4-5 Units.
(Graduate students register for COMM 211.) Open to non-majors. This course examines the role of the news media in contemporary society, with particular attention to cross-national variation in the relationships between journalists, politicians, and citizens. We further consider the potentially transforming effects of technology on the media-politics nexus.
Same as: COMM 1A

COMM 212. Models of Democracy. 3-5 Units.
Ancient and modern varieties of democracy; debates about their normative and practical strengths and the pathologies to which each is subject. Focus is on participation, deliberation, representation, and elite competition, as values and political processes. Formal institutions, political rhetoric, technological change, and philosophical critique. Models tested by reference to long-term historical natural experiments such as Athens and Rome, recent large-scale political experiments such as the British Columbia Citizens’ Assembly, and controlled experiments.
Same as: COMM 312

COMM 213. Computational Methods in the Civic Sphere. 4-5 Units.
The widespread availability of public data provides a rich opportunity for those who can efficiently filter, interpret, and visualize information. Course develops necessary technical skills for data collection, analysis, and publication, including data mining and web visualization, with a focus on civic affairs and government accountability. Open to all majors and a range of technical skill levels. Involves tackling new tools and technical concepts in the pursuit of engaging, public-facing projects. (Graduate students enroll in 213).
Same as: COMM 113

COMM 216. Journalism Law. 4-5 Units.
(Graduate students register for 216.) Laws and regulation impacting journalists. Topics include libel, privacy, news gathering, protection sources, fair trial and free press, theories of the First Amendment, and broadcast regulation. Prerequisite: Journalism M.A. student or advanced Communication major.
Same as: COMM 116

COMM 217. Digital Journalism. 4-5 Units.
(Graduate students register for COMM 217.) Seminar and practicum. The implications of new media for journalists. Professional and social issues related to the web as a case of new media deployment, as a story, as a research and reporting tool, and as a publishing channel. Prerequisite: Journalism M.A. student or consent of instructor.
Same as: COMM 117

COMM 220. Digital Media in Society. 4-5 Units.
(Graduate students register for 220.) Contemporary debates concerning the social and cultural impact of digital media. Topics include the historical origins of digital media, cultural contexts of their development and use, and influence of digital media on conceptions of self, community, and state. Priority to Juniors and Seniors.
Same as: AMSTUD 120, COMM 120W

COMM 222. Content Analysis: Studying Communication Artifacts. 4-5 Units.
An empirical and systematic investigation of documented messages in print, graphical, and audio-visual forms and observed human communication behaviors. Focuses on the design and execution of content analytic studies, including manifest vs. latent content, measurement issues, reliability and validity assessment, computer text analysis, and traditional human-coder techniques. Prerequisite: junior, senior or grad standing; COMM 106/206 or an equivalent course in basic social science research. Limited enrollment.
Same as: COMM 122
COMM 223. Argumentation and Persuasion. 4-5 Units. We all know that appeals based on logic and sound evidence often fail where less rational appeals that "shouldn't" work, succeed. This course examines persuasion, the influencing of attitudes, beliefs or behavior, and locates within that broad subject argumentation, the process of reasoning methodically from evidence. Argumentation, the socially acceptable method of persuasion, typically confines itself to the rules of logic and has as its goal the recognition of states and causal relationships held by the persuadee to objectively exist. Other methods of persuasion can succeed while flouting those rules, but only within limits, as the story of the Emperor's New Clothes reminds us. This course will explore whether those limits be accounted for by the capacity limitations and heuristics and biases of human information processing. Topics to be covered include evolutionary explanations; the central and peripheral routes to persuasion; source, channel and receiver factors; attitude-behavior consistency; the roles of involvement, elaboration, affect and social influence; critical thinking skills and logical fallacies. Limited enrollment; preference to juniors, seniors and graduate students, and within these, to Communication majors. Same as: COMM 123

COMM 225. Perspectives on American Journalism. 4-5 Units. (Graduate students register for COMM 225.) An examination of the practice of American journalism, focusing on the political, social, cultural, economic and technological forces that have shaped the U. S. press since the early 1800s. Aimed at consumers as well as producers of news, the objective of this course is to provide a framework and vocabulary for judging the value and quality of everyday journalism. Same as: COMM 125

COMM 231. Media Ethics and Responsibility, 4-5 Units. (Graduate students register for COMM 231.) The development of professionalism among American journalists, emphasizing the emergence of objectivity as a professional and the epistemological norm. An applied ethics course where questions of power, freedom, and truth autonomy are treated normatively so as to foster critical thinking about the origins and implications of commonly accepted standards of responsible journalism. Same as: COMM 131

COMM 233. Need to Know: The Tension between a Free Press and National Security Decision Making. 4-5 Units. This seminar will examine the dynamic interaction at the highest levels of government and the media when news coverage of secret national security policy and operations impinges on United States defense, diplomatic and intelligence activities and decision making. A prime example: the torrent of secret NSA programs disclosed by Edward Snowden in newspapers and other media. Students will explore attitudes, practices and actions by the media and the government through a series of case studies and simulations. Former editors, reporters and government officials will appear as guest speakers. The goal of the course is to inform students about the vital but often fraught relationship between a free press and the government in a democratic society, especially in the management of national security affairs. For advanced undergraduate and graduate students. Application for enrollment required. The instructor is a former Washington bureau chief of The New York Times. Please email Anne Stickells (annees7@stanford.edu) to request an application. Completed applications are due by 6pm on March 21, 2015. (Grad students register for COMM 233). Same as: COMM 133

COMM 234. Public Participation and Public Policy. 4-5 Units. Examines the role of public participation in public policy making. Around the world, policymakers seek to engage their publics. But, even though public participation is important, it is also problematic. Public meetings can become dysfunctional and turn into media spectacles instead of actively gathering the opinions of the public. The question becomes, when and how should the public be consulted in order to effectively impact public policies? There are consequences of engaging the public, and this seminar explores the methods used to engage publics around the world. Same as: COMM 134

COMM 235. Deliberative Democracy and its Critics. 3-5 Units. This course examines the theory and practice of deliberative democracy and engages both in a dialogue with critics. In spring quarter 2015, this course will have a special focus on deliberative democracy in the the Greater China region. The course will discuss whether a democracy which emphasizes people thinking and talking together on the basis of good information be made practical in the modern age. What kinds of distortions arise when people try to discuss politics or policy together? The course draws on ideas as well as criticisms from the jury literature, from the psychology of group processes and from the most recent normative and empirical literature on deliberative forums. Case studies from the Deliberative Polling method and other deliberation methods, its applications, defenders and critics, both normative and empirical, will provide a cases studies for discussion. Some course sessions will utilize the case method to examine public consultations, the media, and civil society. Throughout the course, students will address how public participation is currently conducted around the world. As we have all seen successful, but more likely unsuccessful attempts to consult the public and this course will examine the various ways of consulting the public and how governments, media, and the public have responded and used the results. Same as: AMSTUD 135, COMM 135, COMM 335, POLISCI 234P, POLISCI 334P

COMM 237. The Dialogue of Democracy. 4-5 Units. All forms of democracy require some kind of communication so people can be aware of issues and make decisions. This course looks at competing visions of what democracy should be and different notions of the role of dialogue in a democracy. Is it just campaigning or does it include deliberation? Small scale discussions or sound bites on television? Or social media? What is the role of technology in changing our democratic practices, to mobilize, to persuade, to solve public problems? This course will include readings from political theory about democratic ideals - from the American founders to J.S. Mill and the Progressives to Joseph Schumpeter and modern writers skeptical of the public will. It will also include contemporary examinations of the media and the internet to see how those practices are changing and how the ideals can or cannot be realized. Same as: AMSTUD 137, COMM 137W, POLISCI 232T, POLISCI 332T

COMM 240. Digital Media Entrepreneurship. 3-5 Units. (Graduate students register for COMM 240.) Primarily for graduate journalism and computer science students. Silicon Valley's new media culture, digital storytelling skills and techniques, web-based skills, and entrepreneurial ventures. Guest speakers. Prerequisite: Instructor consent/completed application. Application can be found at: http://dme.stanford.edu. Same as: COMM 140

COMM 242. Media Economics. 4-5 Units. Uses economics to examine the generation and consumption of information in communication markets. Covers concepts that play a large role in information economics, including public goods, economies of scale, product differentiation, and externalities. Looks at individual and social information demand as consumers, producers, audience members, and voters. Topics include economics of Internet, sustainability of accountability journalism, and marketplace of ideas. Same as: COMM 142W

COMM 243. Communication Policy and Regulation. 4-5 Units. Focuses on the development, implementation, and evaluation of policies affecting communication markets. Policy issues include universal service, digital divide, Internet regulation, intellectual property, privacy, television violence, content diversity, media ownership, antitrust, and impact of news on government accountability. Examines political economy of communication policy and the evolution of policies across time. Same as: COMM 143W

COMM 247. Modern History and Future of Journalism. 4-5 Units. (Graduate students register for COMM 247.) The birth and evolution of local and national television news. The modern history of newspapers. Can they survive in the era of online journalism? Same as: COMM 147
COMM 251. The First Amendment: Freedom of Speech and Press. 4-5 Units.
Introduction to the constitutional protections for freedom of speech, press, and expressive association. All the major Supreme Court cases dealing with issues such as incitement, libel, hate speech, obscenity, commercial speech, and campaign finance. There are no prerequisites, but a basic understanding of American government would be useful. In addition to a final and midterm exam, students participate in a moot court on a hypothetical case. (Grad students register for COMM 251).
Same as: COMM 151, POLISCI 125P

COMM 260. The Press and the Political Process. 4-5 Units.
(Graduate students register for COMM 260.) The role of mass media and other channels of communication in political and electoral processes. Same as: COMM 160, POLISCI 323R

COMM 262. Campaigns, Voting, Media, and Elections. 4-5 Units.
This course examines the theory and practice of American campaigns and elections. First, we will attempt to explain the behavior of the key players -- candidates, parties, journalists, and voters -- in terms of the institutional arrangements and political incentives that confront them. Second, we will use current and recent election campaigns as "laboratories" for testing generalizations about campaign strategy and voter behavior. Third, we examine selections from the academic literature dealing with the origins of partisan identity, electoral design, and the immediate effects of campaigns on public opinion, voter turnout, and voter choice. As well, we'll explore issues of electoral reform and their more long-term consequences for governance and the political process. Same as: COMM 162, POLISCI 120B

COMM 264. The Psychology of Communication About Politics in America. 4-5 Units.
Focus is on how politicians and government learn what Americans want and how the public's preferences shape government action; how surveys measure beliefs, preferences, and experiences; how poll results are criticized and interpreted; how conflict between polls is viewed by the public; how accurate surveys are and when they are accurate; how to conduct survey research to produce accurate measurements; designing questionnaires that people can understand and use comfortably; how question wording can manipulate poll results; corruption in survey research. Same as: COMM 164, POLISCI 224L, PSYCH 170

COMM 266. Virtual People. 4-5 Units.
(Graduate students register for COMM 266.) The concept of virtual people or digital human representations; methods of constructing and using virtual people; methodological approaches to interactions with and among virtual people; and current applications. Viewpoints including popular culture, literature, film, engineering, behavioral science, computer science, and communication. Same as: COMM 166

COMM 268. Experimental Research in Advanced User Interfaces. 1-5 Unit.
Project-based course involves small (3-4) person teams going through all parts of the experimental process: question generation, experiment design, running, and data analysis. Each team creates an original, publishable project that represents a contribution to the research and practicum literatures. All experiments involve interaction between people and technology, including cars, mobile phones, websites, etc. Prerequisite: consent of instructor. Same as: COMM 168, COMM 368, ME 468

COMM 269. Computers and Interfaces. 4-5 Units.
(Graduate students register for COMM 269.) Interdisciplinary. User responses to interfaces and design implications of those responses. Theories from different disciplines illustrate cognitive, emotional, and social responses to textual, voice-based, pictorial, metaphoric, conversational, adaptive, agent-based, intelligent, and anthropomorphs interfaces. Group design project applying theory to the design of an interactive interface.
Same as: COMM 169

COMM 271. Moving Pictures: How the Web, Mobile and Tablets are Revolutionizing Video Journalism. 3-5 Units.
(Graduate students register for COMM 271.) Examine the emerging role of video journalism across web, tablet, and mobile platforms. What are the specific needs of these platforms? How can new reporting tools be integrated to efficiently produce video news content? We'll examine case studies and hear from guest speakers about innovations in video journalism on these platforms. Students will produce video journalism pieces using mobile tools, optimized for viewing on mobile devices. Prerequisite: Journalism MA student or instructor's consent. Same as: COMM 171

COMM 272. Media Psychology. 4-5 Units.
(Graduate students register for COMM 272.) The literature related to psychological processing and the effects of media. Topics: unconscious processing; picture perception; attention and memory; emotion; the physiology of processing media; person perception; pornography; consumer behavior; advanced film and television systems; and differences among reading, watching, and listening. Same as: COMM 172

COMM 273. Public Issues Reporting I. 3-4 Units.
Reporting and writing on government and public policies and issues; their implications for the people and the press. Required for journalism M.A. students.

COMM 273D. Public Affairs Data Journalism I. 4 Units.
Even before the ubiquity of Internet access and high-powered computers, public accountability reporting relied on the concerted collection of observations and analytical problem-solving. We study the methods, and the data, used to discover leads and conduct in-depth reporting on public affairs, including election finance and safety regulations. Students gain practical experience with the digital tools and techniques of computer-assisted reporting. Prerequisite: Journalism M.A. student.

COMM 274. Public Issues Reporting II. 3-4 Units.
Almost everything a journalist writes about involves government, either directly or indirectly. In this course we learn about the hidden forces that control government decisions: lobbying, campaign finance, budgets and more. Students write stories and do two accompanying multimedia pieces. Prerequisites: 273, Journalism M.A. student.

COMM 274D. Public Affairs Data Journalism II. 4 Units.
Learn how to find, create and analyze data to tell news stories with public service impact. Uses relational databases, advanced queries, basic statistics, and mapping to analyze data for storytelling. Assignments may include stories, blog posts, and data visualizations, with at least one in-depth project based on data analysis. Prerequisites: COMM 273D or Journalism M.A. student.

COMM 275. Multimedia Storytelling: Reporting and Production Using Audio, Still Images, and Video. 3-4 Units.
Multimedia assignments coordinated with deadline reporting efforts in COMM 273 from traditional news beats using audio, still photography, and video. Use of digital audio recorders and audio production to leverage voice-over narration, interviews, and natural sound; use of digital still cameras and audio to produce audio slideshows; and the combination of these media with video in post-production with Final Cut Pro. Prerequisite: Journalism M.A. student. Corequisite: COMM 273.
COMM 276. Advanced Digital Media Production. 4-5 Units.
In-depth reporting and production using audio, images and video. Focus on an in-depth journalism project with appropriate uses of digital media: audio, photography, graphics, and video. Topics include advanced field techniques and approaches (audio, video, still) and emphasis on creating a non-fiction narrative arc in a multimedia piece of 10-12 minutes. Prerequisite: COMM 275 or consent of instructor.
Same as: COMM 176

COMM 277A. Computational Journalism. 4 Units.
Focuses on using data and algorithms to lower the cost of discovering stories or telling stories in more engaging and personalized ways. Project based assignments based on real-world challenges faced in newsrooms. Prior experience in journalism or computational thinking helpful. Prerequisite: Comm 273D, COMM 113/213, or the consent of instructor.
Same as: COMM 177A

COMM 277C. Specialized Writing and Reporting: Environmental Journalism. 4-5 Units.
(Graduate students register for COMM / ENVRES 277C.) Practical, collaborative, writing-intensive course in science-based environmental journalism. Science and journalism students learn how to identify and write engaging stories about environmental issues and science, how to assess the quality and relevance of environmental news, how to cover the environment and science beats effectively, and how to build bridges between the worlds of journalism and science. Limited enrollment: preference to journalism students and students in the natural and environmental sciences. Prerequisite: COMM 104, ENVRES 200 or consent of instructor. Admissions by application only, available from thayden@stanford.edu.
Same as: COMM 177C, EARTHSYS 177C, EARTHSYS 277C, ENVRES 277C

COMM 277D. Specialized Writing and Reporting: Magazine Journalism. 4-5 Units.
(Graduate students register for COMM 277D.) How to report, write, edit, and read magazine articles, emphasizing long-form narrative. Tools and templates of story telling such as scenes, characters, dialogue, and narrative arc. How the best magazine stories defy or subvert conventional wisdom and bring fresh light to the human experience through reporting, writing, and moral passion. Prerequisite: 104 or consent of instructor.
Same as: COMM 177D

COMM 277G. Specialized Writing and Reporting: Covering Silicon Valley. 4-5 Units.
(Graduate students register for COMM 277G.) Business reporting basics in the context of Silicon Valley’s technology scene. Prerequisite: 104 or consent of instructor.
Same as: COMM 177G

COMM 277I. Becoming a Watchdog: Investigative Reporting Techniques. 4-5 Units.
Graduate students register for COMM 277I.) Learn how to apply an investigative and data mindset to journalism, from understanding how to background an individual or entity using online databases to compiling or combining disparate sets of information in ways that unalter wrongdoing or mismanagement. Focuses on mining texts, tracking associations, and using visualizations. Stories produced apply investigative techniques to beat reporting, breaking news, and long form journalism. Prerequisite: COMM 104W, or consent of instructor.
Same as: COMM 177I

COMM 277S. Specialized Writing and Reporting: Sports Journalism. 4-5 Units.
(Graduate students register for COMM 277S.) Workshop. An examination of American sports writing from the 1920’s Golden Age of Sports to present. Students become practitioners of the sports writing craft in an intensive laboratory. Hones journalistic skills such as specialized reporting, interviewing, deadline writing, creation of video projects, and conceptualizing and developing stories for print and online. Prerequisite: 104 or consent of instructor.
Same as: COMM 177S

COMM 277Y. Specialized Writing and Reporting: Foreign Correspondence in the Middle East and Asia. 4-5 Units.
(Graduate students register for COMM 277Y.) What’s involved in working as a foreign correspondent in these important and volatile parts of the world, where in many cases journalists are not respected and may face danger -- taught by a journalist who has worked extensively in both regions. (no prerequisites).
Same as: COMM 177Y

COMM 278. Journalism and Imaginative Writing in America. 5 Units.
Walt Whitman spent twenty-five years as a journalist before publishing his first book of poems. Mark Twain was a journalist for twenty years before publishing his first novel. Topics include examination of how writers such as Jack Kerouac, John Steinbeck, and William Faulkner developed the line between journalism and fiction. Writers include Whitman, Fanny Fern, Twain, Pauline Hopkins, Theodore Dreiser, Charlotte Perkins Gilman, Ernest Hemingway, Meridel LeSueur.
Same as: AMSTUD 257

COMM 279. News Reporting & Writing Fundamentals. 3-4 Units.
Learn beat reporting and writing skills including source development, interviewing, and story structure for news and features. Emphasis on developing news judgment, clear writing skills, and an ability to execute stories on deadline. Exercises and assignments mimic a newsroom. Students pursue local beats with a focus on public issues and complement written pieces with relevant data analyses and multimedia components. Prerequisite: Journalism M.A. student. Corequisite: COMM 275.

COMM 282. Social Media Issues. 4-5 Units.
(Graduate students register for COMM 282.) Students will take away from this course a set of conceptual tools, a vocabulary, and an analytical framework with which to recognize, understand, and more effectively manage new social practices online, together with a familiarity with the literature regarding social media and identity, community, collective action, public sphere, social capital, networks, and social networks. Students will also develop skills at using online forums, blogs, microblogs, wikis for research, collaboration, and communication. Limited enrollment. Prerequisite: instructor consent. Please see http://comm.stanford.edu/ faculty-rheingold/ for application instructions. Contact instructor at: howard@rheingold.com.
Same as: COMM 182
COMM 283. Social Media Literacies. 4-5 Units.
Today's personal, social, political, economic worlds are all affected by digital media and networked publics: viral videos, uprisings from Tahrir to OWS, free search engines, abundant inaccuracies and sophisticated disinformation online, indelible, and searchable digital footprints, laptops in lecture halls and BlackBerries at the dinner table. 20-something social media billionaires, massive online university courses. Introduction to the literature about and direct experience of these new literacies: research foundations and practical methods to control attention, attitudes and tools necessary for critical consumption of information, best practices of individual digital participation and collective participatory culture, the use of collaborative media and methodologies, and the application of network know-how to life online. Contrasting perspectives through readings and classroom and online discussion. Students collaborate and cooperate in their learning during and between classes through small group discussions and face to face exercises, forums, blogs, mindmaps and wikis. Prerequisite: instructor consent. See http://comm.stanford.edu/faculty-rheingold/ for application instructions; contact instructor at howard@rheingold.com. Same as: COMM 183

COMM 289. Journalism Master's Project. 4 Units.

COMM 289C. Projects for Publication. 2 Units.
In-depth journalism projects are not products of happenstance. They require thorough planning and coordination at every stage of the process -- from refinement of ideas, to the creation of "back-out" schedules and precise outlines, to strategies for pitching the story and its author to skeptical editors. In this course, students will workshop and pitch MA journalism projects for placement and publication. Required for MA Journalism students; registration Comm 289 required.

COMM 289P. Journalism Thesis. 4 Units.
MA thesis course. Focuses on development of in-depth journalism project, culminating in work of publishable quality.

COMM 290. Media Studies M.A. Project. 1-2 Unit.
Individual research for coterminal Media Studies students.

COMM 291. Graduate Journalism Seminar. 1 Unit.
Required of students in the graduate program in Journalism. Forum for current issues in the practice and performance of the press. The seminar frequently features Bay Area Journalists as guest speakers. May be repeated for credit.

COMM 299. Individual Work. 1-4 Unit.

COMM 301. Communication Research, Curriculum Development and Pedagogy. 1 Unit.
Designed to prepare students for teaching and research in the Department of Communication. Students will be trained in developing curriculum and in pedagogical practices, and will also be exposed to the research programs of various faculty members in the department. Required of all Ph.D. students.

COMM 307. Summer Institute in Political Psychology. 3 Units.
Lectures, discussion groups, and workshops addressing many applications of psychology to the analysis of political behavior. Public opinion, international relations, political decision-making, attitudes and beliefs, prejudice, social influence and persuasion, terrorism, news media influence, foreign policy, socialization, social justice.

COMM 308. Graduate Seminar in Political Psychology. 1-3 Unit.
For students interested in research in political science, psychology, or communication. Methodological techniques for studying political attitudes and behaviors. May be repeated for credit. Same as: POLISCI 324

COMM 310. Method of Analysis Program in the Social Sciences. 1 Unit.
Colloquium series. Creation and application of new methodological techniques for social science research. Presentations on methodologies of use for social scientists across departments at Stanford by guest speakers from Stanford and elsewhere. See http://mapss.stanford.edu. Same as: ANTHRO 446A

COMM 311. Theory of Communication. 1-5 Unit.
Basic communication theory for first-year Ph.D. students in the Department of Communication. Introduction to basic writings and concepts in communication research. The goal is an introduction to issues in the field that are common in communication research. First half of the class will emphasize classic literature about field organization, history and theory. Second half will emphasize contemporary theory in areas that students select.

COMM 312. Models of Democracy. 3-5 Units.
Ancient and modern varieties of democracy; debates about their normative and practical strengths and the pathologies to which each is subject. Focus is on participation, deliberation, representation, and elite competition, as values and political processes. Formal institutions, political rhetoric, technological change, and philosophical critique. Models tested by reference to long-term historical natural experiments such as Athens and Rome, recent large-scale political experiments such as the British Columbia Citizens' Assembly, and controlled experiments. Same as: COMM 212

COMM 314. Qualitative Social Science Research Methods. 1-5 Unit.
Part of the doctoral research methods sequence. Focus is on the logic of qualitative research methods and modes of inquiry relevant to the study of communication and meaning. Prerequisite: Communication Ph.D. student, or consent of instructor.

COMM 317. The Philosophy of Social Science. 1-5 Unit.
Approaches to social science research and their theoretical presuppositions. Readings from the philosophy of the social sciences. Research design, the role of experiments, and quantitative and qualitative research. Cases from communication and related social sciences. Prerequisite: consent of instructor.

COMM 318. Quantitative Social Science Research Methods. 1-5 Unit.
An introduction to a broad range of social science research methods that are widely used in PhD work. Prerequisite: consent of instructor.

COMM 320G. Advanced Topics in New Media and American Culture. 1-5 Unit.
This course deals with advanced issues in computing and American cultural history since World War II. Primarily for Ph.D. students. Prerequisite: 220 or consent of instructor.

COMM 325G. Comparative Studies of News and Journalism. 1-5 Unit.
Focus is on topics such as the roles and responsibilities of journalists, news as a genre of popular literature, the nexus between press and state, and journalism's commitment to political participation.

COMM 326. Advanced Topics in Human Virtual Representation. 1-5 Unit.
Topics include the theoretical construct of person identity, the evolution of that construct given the advent of virtual environments, and methodological approaches to understanding virtual human representation. Prerequisite: PhD student or consent of instructor.

COMM 331G. Communication and Media Ethics. 1-5 Unit.
Limited to Ph.D. students. Advanced topics in press ethics and responsibility. Prerequisite: 231 or consent of instructor.
COMM 335. Deliberative Democracy and its Critics. 3-5 Units.
This course examines the theory and practice of deliberative democracy and engages both in a dialogue with critics. In spring quarter 2015, this course will have a special focus on deliberative democracy in the Greater China region. The course will discuss whether a democracy which emphasizes people thinking and talking together on the basis of good information be made practical in the modern age. What kinds of distortions arise when people try to discuss politics or policy together? The course draws on ideas as well as criticisms from the jurisprudence literature, from the psychology of group processes, and from the most recent normative and empirical literature on deliberative forums. Case studies from the Deliberative Polling method and other deliberation methods, its applications, defenders and critics, both normative and empirical, will provide a cases studies for discussion. Some course sessions will utilize the case method to examine public consultations, the media, and civil society. Throughout the course, students will address how public participation is currently conducted around the world. As we have all seen successful, but more likely unsuccessful attempts to consult the public and this course will examine the various ways of consulting the public and how governments, media, and the public have responded and used the results.
Same as: AMSTUD 135, COMM 135, COMM 235, POLISCI 234P, POLISCI 334P

COMM 339. Questionnaire Design for Surveys and Laboratory Experiments: Social and Cognitive Perspectives. 4 Units.
The social and psychological processes involved in asking and answering questions via questionnaires for the social sciences; optimizing questionnaire design; open versus closed questions; rating versus ranking; rating scale length and point labeling; acquiescence response bias; don't-know response options; response choice order effects; question order effects; social desirability response bias; attitude and behavior recall; and introspective accounts of the causes of thoughts and actions.
Same as: POLISCI 421K, PSYCH 231

COMM 360G. Political Communication. 1-5 Unit.
An overview of research in political communication with particular reference to work on the impact of the mass media on public opinion and voting behavior. Limited to Ph.D. students. Prerequisite: 260 or consent of instructor.
Same as: POLISCI 425

COMM 361. Regulation of the Political Process. 3-5 Units.
Combined with LAW 577. This course is intended to give students a basic understanding of the themes in the legal regulation of elections and politics. We will cover all the major Supreme Court cases on topics of voting rights, reapportionment/redistricting, ballot access, regulation of political parties, campaign finance, and the 2000 presidential election controversy. The course pays particular attention to competing political philosophies and empirical assumptions that underlie the Court's reasoning while still focusing on the cases as litigation tools used to serve political ends. Elements used in grading: Class participation and one day take home final exam. (POLISCI 327C; LAW 577).
Same as: POLISCI 327C

COMM 362. Topics in Political Communication: Media Bias, Selective Exposure, and Political Polarization. 1-5 Unit.
This course surveys theories of media bias, biased processing of information, and the empirical challenges facing researchers attempting to link changes in the composition of audiences to attitudinal and behavioral outcomes. (Limited to PhD students).
Same as: POLISCI 425S

COMM 368. Experimental Research in Advanced User Interfaces. 1-5 Unit.
Project-based course involves small (3-4) person teams going through all parts of the experimental process: question generation, experiment design, running, and data analysis. Each team creates an original, publishable project that represents a contribution to the research and practicum literatures. All experiments involve interaction between people and technology, including cars, mobile phones, websites, etc. Prerequisite: consent of instructor.
Same as: COMM 168, COMM 268, ME 468

COMM 372G. Seminar in Psychological Processing. 1-5 Unit.
Limited to Ph.D. students. Advanced topics. Prerequisite: 272 or consent of instructor.

COMM 379. History of the Study of Communication. 1-5 Unit.
The origins of communication/media theory and research emphasizing the rise of communication as a separate field of study. The influence of schools of thought concerning the scope and purpose of the study of communication. Readings include foundational essays and studies. Prerequisite: Ph.D. student or consent of instructor.

COMM 380. Curriculum Practical Training. 1-5 Unit.
Practical experience in the communication industries. Prerequisite: consent of instructor. Meets requirements for Curricular Practical Training for students on F-1 visas. (Staff).

COMM 384. Media Technology Theory. 3-5 Units.
This course surveys major theoretical approaches to the study of media technologies, including Frankfurt School critical theory, media archaeology, actor network theory, science and technology studies, platform studies and theories of critical making. By the end of the course, students should have a rich familiarity with the literature in this area, as well as with exemplary empirical studies conducted within each tradition. Preference to Ph.D. students in Communication and Art and Art History. Consent of instructor required for non-PhD students.
Same as: ARTHIST 465

COMM 397. Minor Research Project. 1-6 Unit.
Individual research for Ph.D. candidates. Course may be repeated for credit.

COMM 398. Major Research Project. 1-6 Unit.
Individual research for Ph.D. candidates.

COMM 399. Advanced Individual Work. 1-9 Unit.

COMM 801. TGR Project. 0 Units.

COMM 802. TGR Dissertation. 0 Units.
