POLITICAL SCIENCE (POLISCI)

POLISCI 1. The Science of Politics. 5 Units.
Why do countries go to war? How can we explain problems such as poverty, inequality, and pollution? What can be done to improve political representation in the United States and other countries? We will use scientific methods to answer these and other fundamental questions about politics.

POLISCI 101. Introduction to International Relations. 5 Units.
The course provides an introduction to major factors shaping contemporary international politics, including: the origins and nature of nationalism; explanations for war; nuclear weapons and their impact of international politics; international implications of the rise of China; civil war and international peacekeeping since the end of the Cold War; understanding international institutions and how they facilitate interstate cooperation despite anarchy; and the politics of international environmental treaties.

POLISCI 101Z. Introduction to International Relations. 4 Units.
Approaches to the study of conflict and cooperation in world affairs. Applications to war, terrorism, trade policy, the environment, and world poverty. Debates about the ethics of war and the global distribution of wealth.
Same as: INTNLREL 101Z

POLISCI 102. Politics and Public Policy. 4-5 Units.
American political institutions (the Presidency, Congress, and the Court) and political processes (the formation of political attitudes and voting) have for some time now been criticized as inadequate to the task of making modern public policy. Against the backdrop of American culture and political history we examine how public policy has been and is being made. We use theories from Political Science and Economics to assess the state of the American system and the policy making process. We use case studies and lectures to analyze contemporary issues including environmental policy, taxes and spending, gun control, economic growth and inequality and mobility. In some of these issue areas we use comparative data from other countries to see how the U.S. is doing relative to other countries. In addition to class room lecture and discussion, student groups are formed to analyze policy issues of relevance to them. Undergraduate Public Policy students are required to enroll in this class for five units.
Same as: AMSTUD 123X, PUBLPOL 101, PUBLPOL 201

POLISCI 103. Justice. 4-5 Units.
Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include financing schools and elections, regulating markets, discriminating against people with disabilities, and enforcing sexual morality. Political Science majors taking this course to fulfill the WIM requirement should enroll in POLISCI 103.
Same as: ETHICSOC 171, PHIL 171, POLISCI 336S, PUBLPOL 103C, PUBLPOL 307

POLISCI 104. Introduction to Comparative Politics. 5 Units.
Why are some countries prone to civil war and violence, while others remain peaceful? Why do some countries maintain democratic systems, while others do not? Why are some countries more prosperous than others? This course will provide an overview of the most basic questions in the comparative study of political systems, and will introduce the analytical tools that can help us answer them.

POLISCI 109Z. Research in Political Science and International Relations. 6 Units.
Students will assist faculty with research projects. They will also attend workshops/seminars and complete written assignments that demonstrate their knowledge of research design, data analysis, and software. Students must apply through Summer Session and may not enroll without permission of the instructors.

POLISCI 109. International Organizations and the World Order. 3 Units.
Since the end of World War II, there has been an explosion in the number, scope, and complexity of international organizations. International organizations such as the United Nations, North Atlantic Treaty Organization, and World Bank now play critical roles across a wide range of policy issues. Why have international organizations proliferated and expanded since the mid-20th century? How do these organizations shape the international system? Why do states sometimes conduct foreign policy through international organizations, while other times preferring traditional means? Why do some international organizations evolve over time, while others resist change? What are some of the pathologies and problems of contemporary international organizations? We will explore these questions by carefully examining the functions and operations of major international organizations. You will also complete a research project examining an international organization of your choice and present your findings in class.

POLISCI 110C. America and the World Economy. 5 Units.
Examination of contemporary US foreign economic policy. Areas studied: the changing role of the dollar; mechanism of international monetary management; recent crises in world markets including those in Europe and Asia; role of IMF; World Bank and WTO in stabilizing world economy; trade politics and policies; the effects of the globalization of business on future US prosperity. Political Science majors taking this course for WIM credit should enroll in POLISCI 110C.
Same as: INTNLREL 110C, POLISCI 110X

POLISCI 110D. War and Peace in American Foreign Policy. 5 Units.
The causes of war in American foreign policy. Issues: international and domestic sources of war and peace; war and the American political system; war, intervention, and peace making in the post-Cold War period. Political Science majors taking this course to fulfill the WIM requirement should enroll in POLISCI 110D.
Same as: AMSTUD 110D, INTNLREL 110D, POLISCI 110Y

POLISCI 110G. Governing the Global Economy. 5 Units.
Who governs the world economy? Why do countries succeed or fail to cooperate in setting their economic policies? When and how do international institutions help countries cooperate? When and why do countries adopt good and bad economic policies? How does the international economy affect domestic politics? This course examines how domestic and international politics determine how the global economy is governed. We will study the politics of monetary, trade, international investment, energy, environmental, and foreign aid policies to answer these questions. The course will approach each topic by examining alternative theoretical approaches and evaluate these theories using historical and contemporary evidence. There will be an emphasis on applying concepts through the analysis of case studies.

POLISCI 110X. America and the World Economy. 5 Units.
Examination of contemporary US foreign economic policy. Areas studied: the changing role of the dollar; mechanism of international monetary management; recent crises in world markets including those in Europe and Asia; role of IMF; World Bank and WTO in stabilizing world economy; trade politics and policies; the effects of the globalization of business on future US prosperity. Political Science majors taking this course for WIM credit should enroll in POLISCI 110C.
Same as: INTNLREL 110C, POLISCI 110X

POLISCI 110Y. War and Peace in American Foreign Policy. 5 Units.
The causes of war in American foreign policy. Issues: international and domestic sources of war and peace; war and the American political system; war, intervention, and peace making in the post-Cold War period. Political Science majors taking this course to fulfill the WIM requirement should enroll in POLISCI 110D.
Same as: AMSTUD 110D, INTNLREL 110D, POLISCI 110D
POLISCI 114D. Democracy, Development, and the Rule of Law. 5 Units.
(Formerly IPS 230) This course explores the different dimensions of development - economic, social, and political - as well as the way that modern institutions (the state, rule of law, and democratic accountability) developed and interacted with other factors across different societies around the world.
Same as: INTNLREL 114D, POLISCI 314D

POLISCI 114S. International Security in a Changing World. 5 Units.
(Formerly IPS 241) This class examines the most pressing international security problems facing the world today: nuclear crises, nuclear non-proliferation, digital security, terrorism, and climate change. Alternative perspectives from political science, history, and STS (Science, Technology, and Society) studies are used to analyze these problems. The class includes an award-winning two-day international negotiation simulation.
Same as: HISTORY 104D, INTLPOL 241

POLISCI 115A. The Rise of Asia. 3-5 Units.
We will examine the sources and implications of the rise of Asia in the international system. Topics will include military competition, international cooperation, regional integration, domestic politics, business and investment, legalization, environmental issues, demographics, social issues, and the role of technology.
Same as: POLISCI 315A

POLISCI 115E. Japan & the World: Innovation, Economic Growth, Globalization, and Int'l Security Challenges. 3-5 Units.
This course introduces students to the economy, politics, and international relations of contemporary Japan. The course puts a particular emphasis on several emerging issues in Japan including innovation and economic dynamism, Japan's contributions to international peace and cooperation, and Japan's response to international economic and geopolitical challenges. The course will invite several guest instructors, each of whom is an expert on at least one of the issues that Japan faces today, to give lectures in addition to the main instructors. The guest lecturers will also be available outside of the classroom for further discussion during their stays at Stanford.
Same as: EASTASN 153, EASTASN 253, ECON 120

POLISCI 118P. U.S. Relations with Iran. 5 Units.
The evolution of relations between the U.S. and Iran. The years after WW II when the U.S. became more involved in Iran. Relations after the victory of the Islamic republic. The current state of affairs and the prospects for the future. Emphasis is on original documents of U.S. diplomacy (White House, State Department, and the U.S. Embassy in Iran). Research paper.

POLISCI 11N. The Rwandan Genocide. 3 Units.
Preference to freshmen. In 1994, more than 800,000 Tutsi and moderate Hutu Rwandans were killed in the most rapid genocide in history. What could bring humans to carry out such violence? Could it have been prevented? Why did no major power intervene to stop the killing? Should the U.N. be held accountable? What were the consequences for Central Africa? How have international actors responded to the challenges of reconstituting Rwanda? What happened to the perpetrators? Sources include scholarly and journalistic accounts.

POLISCI 120B. Campaigns, Voting, Media, and Elections. 4-5 Units.
This course examines the theory and practice of American campaigns and elections. First, we will attempt to explain the behavior of the key players – candidates, parties, journalists, and voters – in terms of the institutional arrangements and political incentives that confront them. Second, we will use current and recent election campaigns as "laboratories" for testing generalizations about campaign strategy and voter behavior. Third, we examine selections from the academic literature dealing with the origins of partisan identity, electoral design, and the immediate effects of campaigns on public opinion, voter turnout, and voter choice. As well, we'll explore issues of electoral reform and their more long-term consequences for governance and the political process.
Same as: COMM 162, COMM 262

POLISCI 120C. American Political Institutions in Uncertain Times. 5 Units.
This course examines how the rules that govern elections and the policy process determine political outcomes. It explores the historical forces that have shaped American political institutions, contemporary challenges to governing, and prospects for change. Topics covered include partisan polarization and legislative gridlock, the politicization of the courts, electoral institutions and voting rights, the expansion of presidential power, campaign finance and lobbying, representational biases among elected officials, and the role of political institutions in maintaining the rule of law. Throughout, emphasis will be placed on the strategic interactions between Congress, the presidency, and the courts and the importance of informal norms and political culture. Political Science majors taking this course to fulfill the WIM requirement should enroll in POLISCI 120C.
Same as: PUBLPOL 124

POLISCI 120Z. What's Wrong with American Government? An Institutional Approach. 4 Units.
How politicians, once elected, work together to govern America. The roles of the President, Congress, and Courts in making and enforcing laws. Focus is on the impact of constitutional rules on the incentives of each branch, and on how they influence law. Fulfills the Writing in the Major Requirement for Political Science majors.

POLISCI 121. Political Power in American Cities. 5 Units.
The major actors, institutions, processes, and policies of sub-state government in the U.S., emphasizing city general-purpose governments through a comparative examination of historical and contemporary politics. Issues related to federalism, representation, voting, race, poverty, housing, and finances. Political Science majors taking this course to fulfill the WIM requirement should enroll in POLISCI 121.
Same as: AMSTUD 121Z, PUBLPOL 133, URBANST 111

POLISCI 121L. Racial-Ethnic Politics in US. 5 Units.
This course examines various issues surrounding the role of race and ethnicity in the American political system. Specifically, this course will evaluate the development of racial group solidarity and the influence of race on public opinion, political behavior, the media, and in the criminal justice system. We will also examine the politics surrounding the Multiracial Movement and the development of racial identity and political attitudes in the 21st century. Polisci 150A, Stats 60 or Econ 1 is strongly recommended.
Same as: CSRE 121L, PUBLPOL 121L

POLISCI 121Z. Introduction to American Law. 3-5 Units.
For undergraduates. The structure of the American legal system including the courts; American legal culture; the legal profession and its social role; the scope and reach of the legal system; the background and impact of legal regulation; criminal justice; civil rights and civil liberties; and the relationship between the American legal system and American society in general.
Same as: AMSTUD 179, PUBLPOL 302A

POLISCI 123A. Presidential Politics: Race, Gender, and Inequality in the 2016 Election. 3 Units.
From the 2016 nomination process to the election. The complexities of identity and its role in uniting and dividing the electorate. Panels covering the media, political participation, and group affiliation.
Same as: AFRICAAM 109, CSRE 112
POLISCI 124A. The American West. 5 Units.
The American West is characterized by frontier mythology, vast distances, marked aridity, and unique political and economic characteristics. This course integrates several disciplinary perspectives into a comprehensive examination of Western North America: its history, physical geography, climate, literature, art, film, institutions, politics, demography, economy, and continuing policy challenges. Students examine themes fundamental to understanding the region: time, space, water, peoples, and boom and bust cycles.
Same as: AMSTUD 124A, ARTHIST 152, ENGLISH 124, HISTORY 151

POLISCI 124L. The Psychology of Communication About Politics in America. 4-5 Units.
Focus is on how politicians and government learn what Americans want and how the public's preferences shape government action; how surveys measure beliefs, preferences, and experiences; how poll results are criticized and interpreted; how conflict between polls is viewed by the public; how accurate surveys are and when they are accurate; how to conduct survey research to produce accurate measurements; designing questionnaires that people can understand and use comfortably; how question wording can manipulate poll results; corruption in survey research.
Same as: COMM 164, COMM 264, POLISCI 324L, PSYCH 170

POLISCI 124R. The Federal System: Judicial Politics and Constitutional Law. 5 Units.
Does the constitution matter? And if so, how exactly does it shape our daily lives? In this course, we will examine the impact of structural features, such as the separation of powers and federalism. While these features often seem boring and unimportant, they are not. As we will see, arguments over structure were at the heart of the debates over slavery, the incarceration of the Japanese during WWII, the drug war and gay marriage. Prerequisites: 2 or equivalent, and sophomore standing. Fulfills Writing in the Major requirement for Polisci majors.

POLISCI 124S. Civil Liberties: Judicial Politics and Constitutional Law. 5 Units.
The role and participation of courts, primarily the U.S. Supreme Court, in public policy making and the political system. Judicial activity in civil liberty areas (religious liberty, free expression, race and sex discrimination, political participation, and rights of persons accused of crime). Prerequisites: 2 or equivalent, and sophomore standing.

POLISCI 125M. Latino Social Movements. 5 Units.
Social movements are cooperative attempts to change the world. This course reviews historically significant and contemporary political and social movements in Latino communities in the U.S., including the movements of the 1960s and events of the modern era such as the Spring 2006 marches and student walkouts, the 2010 resistance to Arizona’s SB1070, and ongoing efforts in 2017 related to detention and deportation policies.
Same as: CHILATST 181

POLISCI 125P. The First Amendment: Freedom of Speech and Press. 4-5 Units.
Introduction to the constitutional protections for freedom of speech, press, and expressive association. All the major Supreme Court cases dealing with issues such as incitement, libel, hate speech, obscenity, commercial speech, and campaign finance. There are no prerequisites, but a basic understanding of American government would be useful. In addition to a final and midterm exam, students participate in a moot court on a hypothetical case. (Grad students register for COMM 251).
Same as: COMM 151, COMM 251

POLISCI 125S. Chicano/Latino Politics. 5 Units.
The political position of Latinos and Latinas in the U.S.: Focus is on Mexican Americans, with attention to Cuban Americans, Puerto Ricans, and other groups. The history of each group in the American polity; their political circumstances with respect to the electoral process, the policy process, and government; the extent to which the demographic category Latino is meaningful; and group identity and solidarity among Americans of Latin American ancestry. Topics include immigration, education, affirmative action, language policy, and environmental justice.
Same as: CHILATST 125S

POLISCI 125V. The Voting Rights Act. 5 Units.
Focus is on whether and how racial and ethnic minorities including African Americans, Asian Americans, and Latinos are able to organize and press their demands on the political system. Topics include the political behavior of minority citizens, the strength and effect of these groups at the polls, the theory and practice of group formation among minorities, the responsiveness of elected officials, and the constitutional obstacles and issues that shape these phenomena.
Same as: AFRICAAAM 125V, CSRE 125V

POLISCI 126P. Constitutional Law. 3 Units.
This course covers Supreme Court case law concerning governmental powers, equal protection, and certain fundamental rights. The course investigates the constitutional foundation for democratic participation in the United States, covering topics such as the Fourteenth Amendment’s protections against discrimination on grounds of race, gender, and other classifications, as well as the individual rights to voting and intimate association, and an introduction to First Amendment rights of free speech and press. Students will be evaluated on class participation, a midterm moot court with both a written and oral component, and a take-home final exam. Lectures will be twice per week and a discussion section once per week.
Same as: COMM 152, COMM 252

POLISCI 127A. Finance and Society for non-MBAs. 4 Units.
This interdisciplinary course explores the economic, political, and cultural forces that shape the financial system and, through this system, have major effects on the economy and on society. You will gain an understanding of how the interactions between individuals, corporations, governments, and the media can help the financial system and the economy work better or in turn allow those with better information and control to harm others unnecessarily. Topics include the basic principles of investment and funding, corporations and their governance, financial markets and institutions, and political and ethical issues. We will discuss recent and ongoing news events and analyses immediately relevant to the material. The approach will be rigorous and analytical but not overly mathematical. A few visitors will further enrich the discussion.
Prerequisite: Econ 1 or equivalent.
Same as: ECON 143, INTLPOL 227, MS&E 147, PUBLPOL 143

POLISCI 127P. Economic Inequality and Political Dysfunction. 5 Units.
This course will examine how two of the defining features of contemporary U.S. politics, economic inequality and political polarization, relate to each other and to Congressional gridlock. The reading list will focus on several books recently authored by preeminent political scientists on this important topic. The course will cover a range of topics, including the disparity in political representation of the preferences of the affluent over those of the poor, the origins of Congressional polarization, the influence of money in politics, budgetary politics, immigration policy, and electoral and institutional barriers to reform.

POLISCI 128F. The Constitution: A Short History. 3 Units.
(Same as HISTORY 157. History majors and others taking 5 units, enroll in 157.) A broad survey of the Constitution, from its Revolutionary origins to the contemporary disputes over interpretation. Topics include the invention of the written constitution and interpretative canons; the origins of judicial review; the Civil War and Reconstruction as constitutional crises; the era of substantive due process; the rights revolution; and the Constitution in wartime.
Same as: HISTORY 57
POLISCI 128S. The Constitution: A Brief History. 5 Units.
A broad survey of the Constitution, from its Revolutionary origins to the contemporary disputes over interpretation. Topics include the invention of the written constitution and interpretative canons; the origins of judicial review; the Civil War and Reconstruction as constitutional crises; the era of substantive due process; the rights revolution; and the Constitution in wartime.
Same as: AMSTUD 157, HISTORY 157

POLISCI 12N. Climate Change and Conflict: Will Warming Lead to Warring?. 3 Units.
This course examines the potential effects of climate change on international relations. We explore how environmental pressures could contribute to violent conflicts and ask how we can prevent such outcomes. Readings include works by Nozick, Sandel, Young, and Nussbaum. Nozick, Michael Sandel, Iris Marion Young, and Martha Nussbaum. No

POLISCI 130. 20th Century Political Theory. Liberalism and its Critics. 5 Units.
In this course, students learn and engage with the debates that have animated political theory since the early 20th century. What is the proper relationship between the individual, the community, and the state? Are liberty and equality in conflict, and, if so, which should take priority? What does justice mean in a large and diverse modern society? The subtitle of the course, borrowed from a book by Michael Sandel, is "Liberalism and its Critics" because the questions we discuss in this class center on the meaning of, and alternatives to, the liberal idea that the basic goal of society should be the protection of individual rights. Readings include selections from works by John Rawls, Hannah Arendt, Robert Nozick, Michael Sandel, Iris Marion Young, and Martha Nussbaum. No prior experience with political theory is necessary.
Same as: ETHICSOC 130, PHIL 171P

POLISCI 131A. The Ethics and Politics of Collective Action. 3-4 Units.
Collective action problems arise when actions that are individually rational give rise to results that are collectively irrational. Scholars have used such a framework to shed light on various political phenomena such as revolutions, civil disobedience, voting, climate change, and the funding of social services. We examine their findings and probe the theoretical foundations of their approach. What does this way of thinking about politics bring into focus, and what does it leave out? What role do institutions play in resolving collective action problems? And what if the required institutions are absent? Can we, as individuals, be required to cooperate even if we expect that others may not play their part? Readings drawn from philosophy, political science, economics, and sociology.
Same as: ETHICSOC 180M, PHIL 73, PUBLPOL 304A

POLISCI 131L. Modern Political Thought: Machiavelli to Marx and Mill. 5 Units.
This course offers an introduction to the history of Western political thought from the late fifteenth through the nineteenth centuries. We will consider the development of ideas like individual rights, government by consent, and the protection of private property. We will also explore the ways in which these ideas continue to animate contemporary political debates. Thinkers covered will include: Niccolò Machiavelli, Thomas Hobbes, John Locke, Jean-Jacques Rousseau, Edmund Burke, John Stuart Mill, and Karl Marx.
Same as: ETHICSOC 131S

POLISCI 132A. The Ethics of Elections. 5 Units.
Do you have a duty to vote? Should immigrants be allowed to vote? Should we make voting mandatory? How (if at all) should we regulate campaign finance? Should we even have elections at all? In this course, we will explore these and other ethical questions related to electoral participation and the design of electoral institutions. We will evaluate arguments from political philosophers, political scientists, and politicians to better understand how electoral systems promote important democratic values and how this affects citizens’ and political leaders’ ethical obligations. We will focus, in particular, on issues in electoral design that have been relevant in recent US elections (e.g. gerrymandering), though many of the ethical issues we will discuss in this course will be relevant in any electoral democracy.
Same as: ETHICSOC 134R

POLISCI 133. Ethics and Politics of Public Service. 3-5 Units.
Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford.
Same as: CSRE 178, ETHICSOC 133, HUMBIO 178, PHIL 175A, PHIL 275A, PUBLPOL 103D, URBANST 122

POLISCI 133D. The Paradigm Shift. 1 Unit.
Examination of the idea of ‘paradigm shift’ by considering paradigm shifts in different academic fields of inquiry. Serial accumulation of guest lectures by distinguished faculty representing the University’s many and varied departments, each asking and answering the question ‘What is the most important paradigm shift in the history of my field? Are paradigm shifts revolution or evolution? Do they move us closer to truth? How frequently do they occur? Can humans plan for, cause, or resist them?’. Same as: MUSIC 150D

POLISCI 133Z. Ethics and Politics in Public Service. 4 Units.
Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford.
Same as: CSRE 133P, PUBLPOL 103Z, URBANST 122Z
POLISCI 134L. Introduction to Environmental Ethics. 4-5 Units.
How should human beings relate to the natural world? Do we have moral obligations toward non-human animals and other parts of nature? And what do we owe to other human beings, including future generations, with respect to the environment? The first part of this course will examine such questions in light of some of our current ethical theories: considering what those theories suggest regarding the extent and nature of our environmental obligations; and also whether reflection on such obligations can prove informative about the adequacy of our ethical theories. In the second part of the course, we will use the tools that we have acquired to tackle various ethical questions that confront us in our dealings with the natural world, looking at subjects such as: animal rights; conservation; economic approaches to the environment; access to and control over natural resources; environmental justice and pollution; climate change; technology and the environment; and environmental activism.
Same as: ETHICSOC 178M, ETHICSOC 278M, PHIL 178M, PHIL 278M

POLISCI 134P. Contemporary Moral Problems. 4-5 Units.
Conflict is a natural part of human life. As human beings we represent a rich diversity of conflicting personalities, preferences, experiences, needs, and moral viewpoints. How are we to resolve or otherwise address these conflicts in a way fair to all parties? In this course, we will consider the question as it arises across various domains of human life, beginning with the classroom. What are we to do when a set of ideas expressed in the classroom offends, threatens, or silences certain of its members? What is it for a classroom to be safe? What is it for a classroom to be just? We will then move from the classroom to the family, considering a difficult set of questions about how we are to square the autonomy rights of children, elderly parents, and the mentally ill with our desire as family members to keep them safe. Finally, we will turn to the conflicts of citizenship in a liberal democratic society in which the burdens and benefits of citizenship have not always been fairly distributed. We will consider, among others, the question of whether or not civil disobedience is ever morally permissible, of whether there is a right to healthcare, and of whether or not some citizens are owed reparations for past injustices.
Same as: ETHICSOC 185M, PHIL 72

POLISCI 135. Citizenship. 5 Units.
This class begins from the core definition of citizenship as membership in a political community and explores the many debates about what that membership means. Who is (or ought to be) a citizen? Who gets to decide? What responsibilities come with citizenship? Is being a citizen analogous to being a friend, a family member, a business partner? How can citizenship be gained, and can it ever be lost? These debates figure in the earliest recorded political philosophy but also animate contemporary political debates. This class uses ancient, medieval, and modern texts to examine these questions and different answers given over time. We will pay particular attention to understandings of democratic citizenship but look at non-democratic citizenship as well. Students will develop and defend their own views on these questions, using the class texts as foundations. No experience with political philosophy is required or expected, and students can expect to learn or hone the skills (writing / reading / analysis) of political philosophy.
Same as: ETHICSOC 135

POLISCI 135D. The Ethics of Democratic Citizenship. 5 Units.
We usually think about democratic citizenship in terms of rights and opportunities, but are these benefits of democracy accompanied by special obligations? Do citizens of a democracy have an obligation to take an interest in politics and to actively influence political decision-making? How should citizens respond when a democracy’s laws become especially burdensome? Do citizens of a democracy have a special obligation to obey the law? In this course, we will read classical and contemporary political philosophy including Plato’s Crito and King’s “Letter from a Birmingham Jail” to explore how political thinkers have understood and argued for the ethics of citizenship. Students in this course will draw on these materials to construct their own arguments, and to identify and assess implicit appeals to the ethics of citizenship in popular culture and contemporary public discourse, from The Simpsons to President Obama’s speeches.
Same as: ETHICSOC 135R

POLISCI 135P. Moral Limits of the Market. 4 Units.
Morally controversial uses of markets and market reasoning in areas such as organ sales, procreation, education, and child labor. Would a market for organ donation make saving lives more efficient; if it did, would it thereby be justified? Should a nation be permitted to buy the right to pollute? Readings include Walzer, Arrow, Rawls, Sen, Frey, Titmuss, and empirical cases.
Same as: ETHICSOC 174A, PHIL 174A, PHIL 274A

POLISCI 136R. Introduction to Global Justice. 4 Units.
This course provides an overview of core ethical problems in international politics, with special emphasis on the question of what demands justice imposes on institutions and agents acting in a global context. It is divided into three sections. The first investigates the content of global justice, and comprises of readings from contemporary political theorists and philosophers who write within the liberal contractualist, utilitarian, cosmopolitan, and nationalist traditions. The second part looks at the obligations which global justice generates in relation to a series of real-world issues of international concern: global poverty, human rights, poverty and development, climate change and natural resources, international migration, and the well-being of women. The final section asks whether a democratic international order is necessary for global justice to be realized.
Same as: ETHICSOC 136R, INTNLREL 136R, PHIL 76, POLISCI 336

POLISCI 137A. Political Philosophy: The Social Contract Tradition. 4 Units.
(Graduate students register for 276.) Why and under what conditions do human beings need political institutions? What makes them legitimate or illegitimate? What is the nature, source, and extent of the obligation to obey the legitimate ones, and how should people alter or overthrow the others? Study of the answers given to such questions by major political theorists of the early modern period: Hobbes, Locke, Rousseau, and Kant.
Same as: ETHICSOC 176, PHIL 176, PHIL 276, POLISCI 337A
POLISCI 138E. Egalitarianism: A course on the history and theory of egalitarianism and anti-egalitarianism. 4 Units.

Egalitarianism is a conception of justice that takes the value of equality to be of primary political and moral importance. There are many different ways to be an egalitarian - it all depends on what we take to be the `currency¿ of egalitarian justice. Are we simply trying to equalize basic rights and liberties, or also resources, opportunities, positions, status, respect, welfare, or capabilities? Is equality really what we should try to achieve in a just society? An alternative would be to make sure everyone has enough or to promote individual freedom instead of equality. Why do egalitarians think that such society would still be unjust? How do they proceed to argue for equality?nnThis class will introduce students to egalitarian and anti-egalitarian thought by looking both at the history of egalitarian thinking and at contemporary accounts in defense of equality. It will provide an in depth introduction to the concepts that are used when inequalities are discussed by philosophers, economists, scientists and politicians. The class will attest of the varieties of approaches and perspectives to equality. For instance, we will learn from the 19th century debate on racial inequalities to understand how anti-egalitarian discourses are constructed; we will look into Rousseau¿s conception of social equality in the Second Discourse and the Social Contract; and we will engage with contemporary egalitarian theories by studying Rawlsian and post-Rawlsian forms of egalitarianism.nnThere are no prerequisites for this course. The class will enable you to develop your own interests and expertise as you work towards understanding egalitarian thinking. If you have prior experience in ethics, political philosophy or political theory, it will allow you to deepen your knowledge and to learn new theories of justice. If you do not have any such knowledge, this class will introduce you to the normative approach to politics (that is the approach that consists in asking what a just society requires) and will help you develop some understanding of how one proceeds when arguing for justice.nnA substantial part of the 3 hours we have each week will be devoted to discussions and presentations, since this is the best way to `practice normative thinking.¿ The class will also include mini-lectures lead by the primary instructor.

Same as: ETHICSOC 174E, PHIL 174E, PHIL 274E

POLISCI 140L. China in World Politics. 5 Units.

The implications of the rise of China in contemporary world politics and for American foreign policy, including issues such as arms and nuclear proliferation, regional security arrangements, international trade and investment, human rights, environmental problems, and the Taiwan and Tibet questions.

Same as: POLISCI 340L

POLISCI 140P. Populism and the Erosion of Democracy. 5 Units.

What is populism, and how much of a threat to democracy is it? How different is it from fascism or other anti-liberal movements? This course explores the conditions for the rise of populism, evaluates how much of a danger it poses, and examines the different forms it takes.

Same as: GLOBAL 106

POLISCI 141A. Immigration and Multiculturalism. 5 Units.

What are the economic effects of immigration? Do immigrants assimilate into local culture? What drives native attitudes towards immigrants? Is diversity bad for local economies and societies and which policies work for managing diversity and multiculturalism? We will address these and similar questions by synthesizing the conclusions of a number of empirical studies on immigration and multiculturalism. The emphasis of the course is on the use of research design and statistical techniques that allow us to move beyond correlations and towards causal assessments of the effects of immigration and immigration policy.

Same as: CSRE 141S

POLISCI 141S. Politics of India. 5 Units.

This course provides an overview of the political institutions, processes, and issues in post-independence India. The purpose is not merely to familiarize students to the politics of India, but also to facilitate a good understanding of, and stimulate keen interest in, the subject. The course hopes to build a strong foundation for acquiring a deeper understanding of Indian politics. The subject-matter will be approached from a comparative perspective, and students are encouraged to think about the topics covered with a view on cases beyond India.

POLISCI 142B. British Politics. 5 Units.

The impact on the world's oldest democracy of major changes in policies, politics, and the institution of government made over the last two decades by Margaret Thatcher and Tony Blair.

POLISCI 143S. Comparative Corruption. 3 Units.

Causes, effects, and solutions to various forms of corruption in business and politics in both developing regions (e.g. Asia, E. Europe) and developed ones (the US and the EU).

Same as: SOC 113

POLISCI 144A. Revolution and Reconciliation Through Film. 5 Units.

The course uses the Spanish political experience in the 20th Century, both in the Spanish civil war and in its transition to democracy in the late 1970s, as a starting point, to focus on the human and social effects of the numerous political upheavals in the transitions from democracy to authoritarianism and back again. Using films about revolutionary change in several different societies, we will treat these as the `texts¿ to motivate our thinking, and examine both the process of social breakdown during periods of civil strife and the role of reconciliation in the reconstruction of societies. We will focus on multiple elements of social consequences in political transitions, including gender, children, non-violent resistance, racism, social class, and the role of the United States. Course requirements will include weekly film screening, discussion, and two critical response papers written across the quarter.

POLISCI 146A. African Politics. 4-5 Units.

Africa has lagged the rest of the developing world in terms of economic development, the establishment of social order, and the consolidation of democracy. This course seeks to identify the historical and political sources accounting for this lag, and to provide extensive case study and statistical material to understand what sustains it, and how it might be overcome.

Same as: AFRICAAM 146A

POLISCI 147. Comparative Democratic Development. 5 Units.

Social, cultural, political, economic, and international factors affecting the development and consolidation of democracy in historical and comparative perspective. Individual country experiences with democracy, democratization, and regime performance. Emphasis is on global third wave of democratization beginning in the mid-1970s, the recent global recession of democracy (including the rise of illiberal populist parties and movements), and the contemporary challenges and prospects for democratic change.

Same as: SOC 112
POLISCI 147P. The Politics of Inequality. 5 Units.
This course is about the distribution of power in contemporary democratic societies, and especially in the US: who governs? Is there a "power elite" whose preferences dominate public policy making? Or, does policy reflect a wide range of interests? What is the relationship between income and power? What are the political consequences of increasing income inequality? How do income differences across racial and ethnic groups affect the quality of their representation? What are effective remedies for unequal influence? Finally, which institutions move democratic practice furthest toward full democratic equality? This course will address these questions, focusing first on local distributions of power, and then considering the implications of inequality in state and national politics. Students will have the opportunity to study income inequality using income and labor force surveys in a mid-term assignment. Then, in a final paper, students will conduct an empirical examination of the implications of income inequality for American democracy.
Same as: PUBLPOL 247, SOC 178

POLISCI 148. Chinese Politics. 3-5 Units.
China, one of the few remaining communist states in the world, has not only survived, but has become a global political actor of consequence with the fastest growing economy in the world. What explains China's authoritarian resilience? Why has the CCP thrived while other communist regimes have failed? How has the Chinese Communist Party managed to develop markets and yet keep itself in power? What avenues are there for political participation? How does censorship work in the information and 'connected' age of social media? What are the prospects for political change? How resilient is the part in the face of technological and economic change? Materials will include readings, lectures, and selected films. This course has no prerequisites. (Graduate students register for 348.).
Same as: POLISCI 348

POLISCI 149S. Islam, Iran, and the West. 5 Units.
Changes in relative power and vitality of each side. The relationship in the Middle Ages revolved around power and domination, and since the Renaissance around modernity. Focus is on Muslims of the Middle East.

POLISCI 149T. Middle Eastern Politics. 5 Units.
Topics in contemporary Middle Eastern politics including institutional sources of underdevelopment, political Islam, electoral authoritarianism, and the political economy of oil.

POLISCI 150A. Data Science for Politics. 5 Units.
Data science is quickly changing the way we understand and engage in the political process. In this course we will develop fundamental techniques of data science and apply them to large political datasets on elections, campaign finance, lobbying, and more. The objective is to give students the skills to carry out cutting edge quantitative political studies in both academia and the private sector. Students with technical backgrounds looking to study politics quantitatively are encouraged to enroll.
Same as: POLISCI 355A

POLISCI 150B. Machine Learning for Social Scientists. 5 Units.
Machine learning - the use of algorithms to classify, predict, sort, learn and discover from data - has exploded in use across academic fields, industry, government, and the non-profit sector. This course provides an introduction to machine learning for social scientists. We will introduce state of the art machine learning tools, show how to use those tools in the programming language R, and demonstrate why a social science focus is essential to effectively apply machine learning techniques in social, political, and policy contexts. Applications of the methods will include forecasting social phenomena, evaluating the use of algorithms in public policy, and the analysis of social media and text data. Prerequisite: POLISCI 150A/355A.
Same as: POLISCI 355B

POLISCI 150C. Causal Inference for Social Science. 5 Units.
Causal inference methods have revolutionized the way we use data, statistics, and research design to move from correlation to causation and rigorously learn about the impact of some potential cause (e.g., a new policy or intervention) on some outcome (e.g., election results, levels of violence, poverty). This course provides an introduction that teaches students the toolkit of modern causal inference methods as they are now widely used across academic fields, government, industry, and nonprofits. Topics include experiments, matching, regression, sensitivity analysis, difference-in-differences, panel methods, instrumental variable estimation, and regression discontinuity designs. We will illustrate and apply the methods with examples drawn from various fields including policy evaluation, political science, public health, economics, business, and sociology. Prerequisites: POLISCI 150A and POLISCI 150B.
Same as: POLISCI 355C

POLISCI 152. Introduction to Game Theoretic Methods in Political Science. 3-5 Units.
Concepts and tools of non-cooperative game theory developed using political science questions and applications. Formal treatment of Hobbes' theory of the state and major criticisms of it; examples from international politics. Primarily for graduate students; undergraduates admitted with consent of instructor.
Same as: POLISCI 352

POLISCI 153. Thinking Strategically. 5 Units.
This course provides an introduction to strategic reasoning. We discuss ideas such as the commitment problem, credibility in signaling, cheap talk, moral hazard and adverse selection. Concepts are developed through games played in class, and applied to politics, business and everyday life.
Same as: POLISCI 354

POLISCI 153Z. Thinking Strategically. 4 Units.
This course provides an introduction to strategic reasoning. We discuss ideas such as the commitment problem, credibility in signaling, cheap talk, moral hazard and adverse selection. Concepts are developed through games played in class, and applied to politics, business and everyday life.

POLISCI 155. Political Data Science. 5 Units.
Introduction to methods of research design and data analysis used in quantitative political research. Topics covered include hypothesis testing, linear regression, experimental and observational approaches to causal inference, effective data visualization, and working with big data. These topics will be introduced using data sets from American politics, international relations, and comparative politics. The course begins with an intensive introduction to the R programming language used throughout the course. Satisfies quantitative methods requirement for the Political Science Research Honors Track. Prerequisites: Stat 60 or instructor consent.
Same as: PUBLPOL 157

POLISCI 18N. Civil War and International Politics: Syria in Context. 3 Units.
How and why do civil wars start, drag on, and end? What does focus of post-Cold War U.S. foreign policy on countries torn apart by civil war tell us about contemporary international relations? We consider these and related questions, with the conflict in Syria as our main case study.

POLISCI 18SC. The Federal Government and the West. 2 Units.
Historical development and current status of the relationship between the U.S. federal government and the American West. Land ownership, natural resource management, agriculture, water, energy, and environmental quality.
POLISCI 19N. Politics of Energy Efficiency. 5 Units.
We will examine the political context of energy efficiency and climate change. Why are some countries, such as Japan and France, able to achieve high levels of energy efficiency while others, such as the United States and Australia, struggle to do so? What political factors facilitate or impede energy efficiency policies? Why is international cooperation on climate change so difficult?

POLISCI 2. Introduction to American National Government and Politics. 5 Units.
American political institutions (the Presidency, Congress, and the Court) and political processes (the formation of political attitudes and voting) have for some time now been criticized as inadequate to the task of making modern public policy. Against the backdrop of American culture and political history we examine how public policy has been and is being made. We use theories from Political Science and Economics to assess the state of the American system and the policy making process. We use case studies and lectures to analyze contemporary issues including environmental policy, taxes and spending, gun control, economic growth and inequality and mobility. In some of these issue areas we use comparative data from other countries to see how the U.S. is doing relative to other countries. In addition to class room lecture and discussion, student groups are formed to analyze policy issues of relevance to them. (This course has merged with Political Science 123/ PubPol 101).
Same as: AMSTUD 2

POLISCI 209. Curricular Practical Training. 1 Unit.
Qualified Political Science students obtain employment in a relevant research or industrial activity to enhance their professional experience consistent with their degree programs. The student if responsible for arranging their own internship/employment and gaining faculty sponsorship. Prior to enrolling students must complete a petition due no later than May 15th. An offer letter will need to be submitted along with the petition. At the completion of the summer quarter, a final report must be submitted to the faculty sponsor documenting work done and relevance to degree program. Meets the requirements for Curricular Practical Training for students on F-1 visas. May be repeated for credit but the course will not count toward the Political Science major requirements.

POLISCI 209Z. Research in Political Science and International Relations. 6 Units.
Students will assist faculty with research projects. They will also attend workshops/seminars and complete written assignments that demonstrate their knowledge of research design, data analysis, and software. Students must apply through Summer Session and may not enroll without permission of the instructors.

POLISCI 20Q. Democracy in Crisis: Learning from the Past. 3 Units.
This Sophomore Seminar will focus on U.S. democracy and will use a series of case studies of major events in our national history to explore what happened and why to American democracy at key pressure points. This historical exploration should shed light on how the current challenges facing American democracy might best be handled. (Cardinal Course certified by the Haas Center).
Same as: EDUC 1220, HISTORY 52Q

POLISCI 210A. Special Topics: Solving Global Challenges. 5 Units.
Most of us study international relations to help improve the state of our world. Yet, political scientists and policy makers increasingly operate in two completely different spheres. The purpose of this seminar is to help bridge this gap: to develop a social science-based toolkit for solving complex global problems. By the end of the quarter, you will be deeply familiar with the most important explanations of international relations, be comfortable reading contemporary political-scientific literature, and instinctively assess world events and identify solutions by leveraging theory and evidence. Prerequisites: POLISCI 101.

POLISCI 211A. Special Topics: Humanizing War. 5 Units.
War exposes the most barbarous face of human nature, so the notion that societies can impose order and morality on warfare may seem paradoxical and even futile. Yet throughout history, people have sought to humanize war. Who are the political actors that have attempted this Herculean task? What strategies have they taken to do so? What are the laws, norms, and organizations structure the ways in which wars are fought? This course will answer these questions, drawing primarily from political science theory and evidence.
Same as: HUMRTS 105

POLISCI 211B. International Cooperation and Institutions. 4 Units.
World politics is often described as a state of war. And yet, the historical record suggests that war is the exception, not the rule. In this course, we seek to understand why relations between most states, most of the time, are defined by peace and cooperation. We will explore the causes of international conflict and how international institutions -- from formal international organizations to international law and norms -- promote cooperation and help states resolve their conflicts peacefully.
Students will engage classic texts and cutting-edge research and leverage evidence-based theory to develop policy solutions to important contemporary global challenges in policy design labs.

POLISCI 211M. Past, Present, and Future of War. 4 Units.
This course offers a forward-looking introduction to international security. Students will learn how political science historically explains conflict and assess how well these explanations describe international security threats in 2018, including those surrounding China, North Korea, Syria, and ISIS.

POLISCI 211N. Nuclear Politics. 3-5 Units.
Why do states develop nuclear weapons and why do some states, that have the technological capacity to build nuclear weapons, refrain from doing so? What are the strategic consequences of new states deploying nuclear weapons? What is the relationship between the spread of nuclear energy and the spread of nuclear weapons? Have international and domestic views on nuclear weapons changed since 1945? In this course, we will first examine the political science literature on these key questions about nuclear politics. We will read and critique works using different approaches in political science including quantitative analysis, experiments, game theory, historical case studies, and mixed methods. Students will then design and execute small research projects to address questions that have been inadequately addressed in the existing literature.
Same as: POLISCI 311N

POLISCI 211P. International Security in South Asia: Pakistan, India and the United States. 5 Units.
This course critically examines the dynamics of continuity and change in American interactions with nuclear armed adversaries, India and Pakistan. It also aims to sensitized the students to Indian and Pakistani perspectives on regional security and the mainsprings of their interactions with United States. There will be an in-depth exploration of the impact of the Indo-US strategic partnership for evolving balance of power in South Asia.

POLISCI 211S. Special Topics: The United States and Europe: A Renewed Imperative?. 5 Units.
New challenges in Asia, the Middle-East, Europe's Eastern and Southern periphery, and even within Europe itself, are making the Transatlantic relationship more central and more critical in world politics than is usually thought. Is there a new dawn in Transatlantic relations? How are the foundations, objectives and "rules of the game" of US-Europe relations being redefined in the context of an emerging new international dis/order? What will it take for the US and Europe to successfully defend their joint interests and values in an increasingly unstable and dangerous world? The course will discuss the main political, strategic, economic and cultural dynamics and issues at the heart of this new US-Europe relationship.
POLISCI 212A. Special Topics: EGYPT: Politics, Terror and Society: From Vision to Reality. 5 Units.
Egypt has for centuries been one of the world’s central civilizations: a country characterized by social tolerance, at the avant-garde of Middle East culture, which also occupies a critically important geostrategic position in the region. This course will examine the political, social, and security challenges Egypt has had to deal with since becoming a modern state. The course will look at the decision-making process of its different rulers, focusing on the nuances between the theoretical and the practical. The course is designed around three central pillars: a look at the country’s history, its ideological undercurrents, and expectations for the future. It will look at the causes of the country’s social problems and look at the deterioration of the security situation that has led to an emergence of extremism. In addition, it will address what needs to be done to restore stability and efficient government. The lecturer will bring his own first-hand testimony, as an eyewitness to the Egyptian Revolution in 2011 that led to the downfall of the President. The purpose of the course is to provide students with the tools to be able to look at the current developments in the country, conduct a self-analysis and answer one seeming endless question: Whither Egypt?

POLISCI 212C. Civil War and International Politics: Syria in Context. 5 Units.
The Syrian civil war is both a humanitarian disaster and a focal point for a set of interlocking regional and international political struggles. This course uses the Syrian case as an entry for exploring broader questions, such as why do civil wars begin, how do they end, and what are the international politics of civil war. Political Science majors taking this course to fulfill the WIM requirement should enroll in POLISCI 212C.

POLISCI 212X. Civil War and International Politics: Syria in Context. 5 Units.
The Syrian civil war is both a humanitarian disaster and a focal point for a set of interlocking regional and international political struggles. This course uses the Syrian case as an entry for exploring broader questions, such as why do civil wars begin, how do they end, and what are the international politics of civil war. Political Science majors taking this course to fulfill the WIM requirement should enroll in POLISCI 212C.

POLISCI 213. US-Russia Relations After the Cold War. 2 Units.
A quarter century ago, the Soviet Union collapsed and the Cold War ended. At the time, Russian leaders aspired to build democratic and market institutions at home. They also wanted to join the West. American presidents Democrat and Republican encouraged these domestic and international changes. Today, U.S.-Russia relations are once again confrontational, reminiscent of relations during the Cold War. This course seeks to analyze shifts in U.S.-Russia relations, with special attention given to the U.S.-Russia relationship during Obama’s presidency. Readings will include academic articles and a book manuscript by Professor McFaul on Obama’s reset policy. Open to students with previous coursework involving Russia.

POLISCI 213A. Russia and the West. 5 Units.
(Formerly IPS 231A) Today, American-Russian relations, and Russia’s relations with West more generally, are tense and confrontational. One has to look deep into the Cold War to find a similar era of confrontation and competition. Yet, relations between Russia and the West were not always this way. The end of the Cold War, for instance, ushered in a period of cooperation. Back then, many believed that Russia was going to develop democratic and market institutions and integrate into Western international institutions. This seminar will examine various explanations for these variations in Russia’s relations with the West, starting in the 19th century, and briefly examining the Cold War period, but a real focus on the last thirty years. In evaluating competing explanations, the course will focus on balance of power theories, culture, historical legacies, institutional design, and individual actors in both the United States (and sometimes Europe) and Russia. **NOTE:** The enrollment of the class is by application only. Please send a one page document to Anya Shkurko (ashkurko@stanford.edu) by March 23rd with the following information: full name, class year, major, contact email, which version of the course you want to enroll in (POLisci/REES/IPs). In the document please also outline previous associated coursework and/or relevant experience and write why you want to enroll in the seminar. Application results will be announced on March 30th. Any questions related to this course can be directed to Anya Shkurko.

Same as: INTLREL 231A, REES 231A

POLISCI 213E. Introduction to European Studies. 5 Units.
This course offers an introduction to major topics in the study of historical and contemporary Europe. We focus on European politics, economics and culture. First, we study what makes Europe special, and how its distinct identity has been influenced by its history. Next, we analyze Europe’s politics. We study parliamentary government and proportional representation electoral systems, and how they affect policy. Subsequently, we examine the challenges the European economy faces. We further study the European Union and transatlantic relations.

Same as: INTNLREL 122

POLISCI 213R. Political Economy of Financial Crisis. 5 Units.
Political responses to domestic and international financial crises. Monetary and fiscal policy. The role of interest groups. International cooperation and the role of the IMF.

Same as: POLISCI 313R

POLISCI 213S. A Post American Century? American Foreign Policy in a Uni-Multi-unipolar World. 5 Units.
This seminar examines recent policy from Bush to Obama in the context of two classic traditions: Wilsonianism vs. Realism. What is the role of the international system, what is the weight of domestic forces like ideology, history and identity? Prerequisite: junior or senior standing.

POLISCI 214R. Challenges and Dilemmas in American Foreign Policy. 5 Units.
This seminar will examine the complexities and trade-offs involved in foreign policy decision-making at the end of the twentieth century and the dawn of the post-9/11 era. Students will analyze dilemmas confronting policymakers through case studies including post-conflict reconstruction and state-building, nuclear proliferation, democratization and peace negotiation. The seminar will conclude with a 48-hour crisis simulation. For advanced undergraduates and graduate students. Application for enrollment required. Applications will be available for pick up in Political Science Department (Encina West 100) starting late-October.

Same as: POLISCI 314R

POLISCI 215. Explaining Ethnic Violence. 5 Units.
What is ethnic violence and why does it occur? Should elite machinations, the psychology of crowds, or historical hatreds be blamed? Case studies and theoretical work on the sources and nature of ethnic violence. Counts as Writing in the Major for PoliSci majors.
POLISCI 215A. Special Topics: State-Society Relations in the Contemporary Arab World-Key Concepts and Debates. 5 Units.
(Formerly IPS 215) This course looks at key concepts pertaining to state-society relations in the Arab world as they have evolved in regional intellectual and political debates since the 1990s. Citizenship, minority rights, freedom of expression, freedom of association, the rule of law, government accountability, independence of the judiciary, civil-military relations, and democratic transition will be among the concepts discussed.
Same as: INTLPOL 215

POLISCI 215D. Special Topics: Dilemmas of Democracy and Security in Israel and the Middle East. 5 Units.
The Middle East is known to be a volatile region, characterized by political violence, armed conflicts, and social instabilities. This volatility is of relevance for many countries including the US with its invested interests in the region and Israel that exists at the heart of the region, and along with its conflict with the Palestinians is considered to be one of the root causes of this volatility. Moreover, the volatility brings into encounter two kinds of collective goods: democracy and security. Their encounter in a conflictual and unstable environment raises a host of questions and dilemmas, both moral and practical: should we balance democracy and security and if so how? Can the two be accommodated at all? Does democracy is better or worse in addressing security problems? Does democracy and security constitute each other conceptually? Do democratic states tend to cooperate with each other when confronting security issues? And what about democratization: how good a ca use is it as a foreign policy? How good a cause is it in justifying war and/or not ending one? From its establishment the State of Israel found itself torn by these and others related questions and the recent decades saw the US drawn by these dilemmas as well (think of the Bybee Memo and the Patriot acts). In the course we will introduce these dilemmas, analyze them and examine different normative and policy answers that were discussed in academia and in the policy world.
Same as: JEWISHST 275D

POLISCI 215F. Nuclear Weapons and International Politics. 5 Units.
Why do states develop nuclear weapons and why do some states, that have the technological capacity to build nuclear weapons, refrain from doing so? What are the strategic consequences of new states deploying nuclear weapons? What is the relationship between the spread of nuclear energy and the spread of nuclear weapons? We will study the political science and history literature on these topics. Research paper required.
Same as: POLISCI 315F

POLISCI 216. State Building. 5 Units.
How and when can external actors (others states, aid agencies, NGOs?) promote institutional change in weak and badly governed states?

POLISCI 216G. International Organizations and Institutions. 5 Units.
What is the appropriate balance between government regulation and market freedom? Introduction to important theoretical and policy debates in international political economy. Topics include: political economy of trade; exchange rate policy; the liberalization of trade and finance; the global move to openness; development, debt and aid; and the role of international organizations. Discussion of application of academic insights to key policy debates, including whether governments should offset the welfare costs of globalization, whether the IMF and World Bank should be reformed to meet the needs of the 21st century, and how the international community should respond to financial crises. Students will research, write and orally present policy briefs on specific policy questions.

POLISCI 217A. American Foreign Policy: Interests, Values, and Process. 5 Units.
(Formerly IPS 242) This seminar will examine the tension in American foreign policy between pursuing U.S. security and economic interests and promoting American values abroad. The course will retrace the theoretical and ideological debates about values versus interests, with a particular focus on realism versus liberalism. The course will examine the evolution of these debates over time, starting with the French revolution, but with special attention given to the Cold War, American foreign policy after September 11th, and the Obama administration. The course also will examine how these contending theories and ideologies are mediated through the U.S. bureaucracy that shapes the making of foreign policy. ** NOTE: The enrollment of the class is by application only. Please provide a one page double-spaced document outlining previous associated coursework and why you want to enroll in the seminar to Anna Coll (acoll@stanford.edu) by February 22nd. Any questions related to this course can be directed to Anna Coll.
Same as: GLOBAL 220, INTL POL 242

POLISCI 217M. Special Topics: International Democratization. 5 Units.
Analyzing the international aspects of democratization involves understanding at least the following: (1) what is democracy (2) what domestic-level processes increase or decrease the level of democracy (3) what kind of influences from the outside world work, and do not work, in furthering democracy, and in what ways. This course spans all subfields of political science, and spills over into law, economics, and sociology. A complicating factor is the geographical expanse of democratic institutions and efforts to promote them. Eastern Europe, Russia, the Middle East, Sub-Saharan Africa, post-civil war El Salvador and Cambodia, are only some of the regions and countries that have been impacted. Their vastly different backgrounds challenge anyone attempting the puzzle. A further complication is the variety of ways in which the outside world may affect the scope and quality of democracy. These ways include but are not limited to: pressures exercised by regional economic institutions and alliances, the power of ideas and socialization, transfers of wealth, demands for trade liberalization, the training of civic activists, reports issued by foreign election observers.
Same as: POLISCI 317M

POLISCI 218. Special Topics: Democratic Peace-A Political Biography. 3-5 Units.
The theories of democratic peace are among the most salient theories in the discipline of International Relations. The academic discussions surrounding their validity have been quite fierce as they concern also the inter-paradigmatic debates so prevalent in IR. No less interestingly, though, is the theories’ migration outside of the halls of academia into the political arena in countries such as the United States and Israel. Noteworthy is the impact those theories had on public discussions and on the shaping of foreign policies of the US following the Cold War. This phenomenon raises important meta-theoretical questions about the nature of theory, its powers, and the responsibilities of academia to society. The course will follow the political biography of the theories of democratic peace: their academic origins, migration into the public and political spheres, the politicization process they underwent, the political and rhetorical uses and misuses of the theories (including the Iraq War), and the outcomes of this charged meeting of academia and politics. No less importantly, the course will discuss the responsibility theorists bear for the real-world ramifications of their theories, and the way they should act to discharge their responsibilities.
Same as: POLISCI 318

POLISCI 218J. Japanese Politics and International Relations. 5 Units.
The domestic politics, political economy, and international relations of contemporary Japan. The role of political parties, the bureaucracy, and private actors. Economic development and challenges. Relations with the United States and East Asia.
Same as: POLISCI 318J
POLISCI 218S. Political Economy of International Trade and Investment. 5 Units.
How domestic and international politics influence the economic relations between countries. Why do governments promote or oppose globalization? Why do countries cooperate economically in some situations but not others? Why do countries adopt bad economic policies? Focus on the politics of international trade and investment. Course approaches each topic by examining alternative theoretical approaches and evaluate these theories using historical and contemporary evidence from many geographical regions around the world. Prerequisites: ECON 1A, ECON 1B, and a statistics course.
Same as: INTNLREL 118S

POLISCI 219. Directed Reading and Research in International Relations. 1-10 Unit.
For undergraduates. Directed reading in Political Science with a focus on international relations. To be considered for enrollment, interested students must complete the directed reading petition form available on the Political Science website before the end of week 1 of the quarter in which they'd like to enroll. May be repeated for credit.

POLISCI 220. Urban Policy Research Lab. 5 Units.
This collaborative reading and research seminar considers the numerous ways that governments conduct social policy by shaping and remaking geographic places. Representative topics include: housing aid programs, exclusionary zoning, controls on internal migration and place of residence, and cars' role in cities. Students will contribute to faculty field research on the consequences of these policies for economic, social, and political outcomes. Prerequisites: None.
Same as: PUBLPOL 225, URBANST 170

POLISCI 220C. The Politics of the Administrative State. 3-5 Units.
Same as: POLISCI 320C

POLISCI 220R. The Presidency. 3-5 Units.
This course provides students with a comprehensive perspective on the American presidency and covers a range of topics: elections, policy making, control of the bureaucracy, unilateral action, war-making, and much more. But throughout, the goal is to understand why presidents behave as they do, and why the presidency as an institution has developed as it has, with special attention to the dynamics of the American political system and how they condition incentives, opportunities, and power.
Same as: POLISCI 320R

POLISCI 221A. American Political Development, 1865-present. 3-5 Units.
In this reading-intensive course, we will conduct a wide-ranging survey of major transformations in the American political system in the post-Civil War period. Our inquiries about these transformations will focus on the origins of the modern administrative state, the interactive role of the state and social movements, and changes in the party system. We will examine these developments not only to understand institutional change, but to learn how changing institutions have shaped the behavior of the American electorate.
Same as: POLISCI 421R

POLISCI 222. The Political Psychology of Intolerance. 5 Units.
This seminar explores the political psychology of intolerance. It focuses on two problems in particular race in America and the challenge of Muslim inclusion in Western Europe. It concentrates on primary research. The readings consist of both classic and contemporary (including ongoing) studies of prejudice and politics.
Same as: CSRE 222

POLISCI 222P. Creating the American Republic. 4-5 Units.
Concepts and developments in the late 18th-century invention of American constitutionalism; the politics of constitution making and ratifying; emergence of theories of constitutional interpretation including originalism; early notions of judicial review. Primary and secondary sources.
Same as: AMSTUD 251X, HISTORY 251, HISTORY 351, POLISCI 422P

POLISCI 223S. Topics in Constitutional History. 5 Units.
Ideas of rights in American history emphasizing the problem of defining constitutional rights, the free exercise of religion, freedom of expression, and the contemporary debate over rights talk and the idioms of human rights.
Same as: AMSTUD 251, HISTORY 251G

POLISCI 223. The Politics of Gender in the United States. 5 Units.
Gender is one of the most recognizable and important identities in daily life. Yet it has been paid scant attention by political scientists in terms of its role on access to political power, opinion formation, group identity politics, election outcomes, and political representation. This class provides a survey of the literature on gender in American politics. We begin with the interdisciplinary research on the social construction of gender to understand what gender is and is not. Throughout the course we will use these theories to analyze and critique the approaches of quantitative research on gender politics.
Same as: FEMGEN 223X

POLISCI 223A. Public Opinion and American Democracy. 5 Units.
This course focuses on the public mood and politics in America today. It accordingly examines, among other things, the coherence (or lack of it) of public opinion; the partisan sorting of the electorate; and the ideological and affective polarization of mass politics. It also examines contemporary critiques of representation and citizenship in liberal democracies.

POLISCI 223B. Money, Power, and Politics in the New Gilded Age. 5 Units.
During the past two generations, democracy has coincided with massive increases in economic inequality in the U.S. and many other advanced democracies. The course will explore normative and practical issues concerning democracy and equality and examine why democratic institutions have failed to counteract rising inequality. Topics will include the influence of money in politics, disparity in political representation of the preferences of the affluent over those of the poor, the implications of political gridlock, and electoral and institutional barriers to reform.

POLISCI 223R. Pivotal Moments in American Institutions and Public Law, 1781-Present. 5 Units.
American lawyers and policymakers work today in a system of institutions that are strikingly unique in comparative and historical terms. With some exceptions, that system is characterized by relatively stable political and legal institutions, low levels of explicit corruption, high bureaucratic capacity in public organizations, and relatively open, impersonal access to political, policymaking, and legal institutions. Although these characteristics are now too often taken for granted, the process through which they emerged remains remarkably opaque. In the 1780s under the Articles of Confederation, the United States was a poor developing country on the fringe of the Atlantic community with limited capacity and a striking inability to provide basic public goods, such as security. One hundred years later, it well along the way to becoming the richest nation in the world. How did this transformation occur? Drawing on judicial opinions, legal scholarship, political science, economics, and history, this course explores how institutions evolved to create such a system. It traces the problem of institutional development through several critical periods in the history of American public law, including the emergence of the Constitution, the events leading up to and following the Civil War, the Progressive era, World War II, 1964-75, and the emergence of the modern administrative state. Although the primarily focus is on the American experience, we place these developments in comparative context as well.
POLISCI 224X. Sustainable Urban Systems Fundamentals. 3-5 Units.
This course is designed to provide students with fundamental mindsets and toolsets that they can apply to real-world problem solving in the context of urban systems. It focuses on fundamental quantitative and qualitative methods for acquiring knowledge and assessing performance of urban systems. Quantitative methods covered include geographic information systems, advanced Excel methods and basic statistics, and qualitative approaches will include stakeholder engagement as well as ethical guidelines governing work with community groups. The course will also introduce four key types of systems performance: well-being, sustainability, resilience and equity. Topics covered are those students can expect to encounter as they pursue their future careers. The course is also a prerequisite for participation in the Sustainable Urban Systems Projects which take place in Winter (CEE 224Y) and Spring (CEE 224Z). Those SUS Projects are designed to immerse student teams in current planning challenges through service to local public and private sector stakeholders; they will require high levels of self-driven learning, time commitment, professionalism, and collaboration. Open to undergraduate and graduate students in any major. For more information, visit http://sus.stanford.edu/courses.

POLISCI 225C. Fixing US Politics: Political Reform in Principle and Practice. 5 Units.
Americans have been trying to perfect their system of government since its founding. Despite some notable achievements, there is a pervasive sense of frustration with political reform. This course will examine the goals and political consequences of American political regulation. Topics will vary by year to some degree but examples include campaign finance, lobbying, term limits, conflict of interest regulation, direct democracy, citizen commissions and assemblies, vote administration problems, transparency, and open meeting laws.

POLISCI 225L. Law and the New Political Economy. 3-5 Units.
(Same as LAW 7515) In this seminar, we consider key legal topics through the lens of political economy - that is, is the interplay among economics, law, and politics. This perspective has had a powerful and growing impact on how scholars and judges view the nature and scope of law and politics in the modern regulatory state. We look at a range of topics from this perspective, including: constitutional law, statutory interpretation, administrative law and regulation, and jurisprudence - all with an eye toward better understanding the dynamic interaction among law, politics, and social change. There are no prerequisites for this seminar. The final assignment will be a substantial research paper.
Same as: POLISCI 325L

POLISCI 226. Race and Racism in American Politics. 5 Units.
Topics include the historical conceptualization of race; whether and how racial animus reveals itself and the forms it might take; its role in the creation and maintenance of economic stratification; its effect on contemporary U.S. partisan and electoral politics; and policy making consequences.
Same as: AMSTUD 226, CSRE 226, POLISCI 326

POLISCI 226A. The Changing Face of America. 4-5 Units.
This upper division seminar will explore some of the most significant issues related to educational access and equity facing American society in the 21st century. Designed for students with significant leadership potential who have already studied these topics in lecture format, this seminar will focus on in-depth analysis of the impact of race on educational access and a variety of educational reform initiatives. Students will be expected to write three papers: a 5-7 page paper on the civil rights movement, an 8-10 page paper on affirmative action strategies, and a 2 page paper on personal reflections regarding leadership and social change.
Same as: CSRE 108X, EDUC 108
POLISCI 22SC. The Face of Battle. 2 Units.
Our understanding of warfare often derives from the lofty perspective of political leaders and generals: what were their objectives and what strategies were developed to meet them? This top-down perspective slight the experience of the actual combatants and non-combatants caught in the crossfire. This course focuses on the complexity of the process by which strategy is translated into tactical decisions by the officers and foot soldiers on the field of battle. We will review theories about civil-military relations and the nature of modern warfare and then visit Washington DC to discuss strategy and politics with current and former policy makers. We will also study two important battles in American history: Gettysburg (July 1863) and the Battle of Little Bighorn (June 1876). We will travel to Gettysburg, Pennsylvania, and the Little Bighorn battlefield in Montana. The course's battlefield tours are based on the "staff rides" developed by the Prussian Army in the mid-1800s and employed by the U.S. Army since the early 1900s. While at Stanford, students will conduct extensive research on individual participants at Gettysburg and Little Bighorn. Then, as we walk through the battlefield sites, students will brief the group on their subjects' experience of battle and on why they made the decisions they did. Why did Lt. General Longstreet oppose the Confederate attack on the Union Army at Gettysburg? What was the experience of a military surgeon on a Civil War battlefield? Why did Custer divide his 7th Cavalry troops as they approached the Little Bighorn River? What was the role of Lakota Sioux women after a battle? Travel will be provided and paid by Sophomore College (except incidentals) and is made possible by the support of the Center for International Security and Cooperation (CISAC). The course is open to students from a range of disciplines; an interest in the topic is the only prerequisite.

POLISCI 22SI. Issues in American Politics and Public Policy. 1 Unit.
This course, administered in conjunction with Stanford Government, will explore prominent contemporary issues in American politics and public policy. It will consist of six guest lectures by Stanford professors and visiting scholars on salient issues in public policy, and student-led discussion sections in non-lecture weeks. Grading will be on a satisfactory/no-credit basis, and to receive credit a student must attend at least five of the six lectures and at least eight of the ten total class sessions.

POLISCI 230A. Classical Seminar: Origins of Political Thought. 3-5 Units.
(Formerly CLASSHIS 133/333.) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change.
Same as: CLASSICS 181, CLASSICS 381, ETHICSOC 130A, PHIL 176A, PHIL 276A, POLISCI 330A

POLISCI 231. High-Stakes Politics: Case Studies in Political Philosophy, Institutions, and Interests. 3-5 Units.
Normative political theory combined with positive political theory to better explain how major texts may have responded to and influenced changes in formal and informal institutions. Emphasis is on historical periods in which catastrophic institutional failure was a recent memory or a realistic possibility. Case studies include Greek city-states in the classical period and the northern Atlantic community of the 17th and 18th centuries including upheavals in England and the American Revolutionary era.
Same as: CLASSICS 382, POLISCI 331

POLISCI 231Z. Topics in Democratic Theory. 5 Units.
Democratic rule is rule of the people. But what does that mean? This course explores democracy's roots in ancient Athens to its modern incarnation. The course aims to familiarize students with the various strands of democratic theory as well as the way democratic theory responds to hot political issues such as immigration and freedom of speech. The goal of the course is to equip students to think critically about democracy in the modern world and the different interpretation democratic rule can have. The questions we will investigate include: What does democracy require? What is the relationship between democracy and human rights or social justice? Can democracy justify border control? What restrictions, if any, does democracy place on hate speech? What is the role of courts in a democracy? The course provides tools to answer these questions by surveying different approaches to democracy in contemporary literature, as well surveying the history of democratic theory from ancient Athenian democracy to the modern age, with a look to the future of democracy in a globalized era.

POLISCI 232T. The Dialogue of Democracy. 4-5 Units.
All forms of democracy require some kind of communication so people can be aware of issues and make decisions. This course looks at competing visions of what democracy should be and different notions of the role of dialogue in a democracy. Is it just campaigning or does it include deliberation? Small scale discussions or sound bites on television? Or social media? What is the role of technology in changing our democratic practices, to mobilize, to persuade, to solve public problems? This course will include readings from political theory about democratic ideals - from the American founders to J.S. Mill and the Progressives to Joseph Schumpeter and modern writers skeptical of the public will. It will also include contemporary examinations of the media and the internet to see how those practices are changing and how the ideals can or cannot be realized.
Same as: AMSTUD 137, COMM 137W, COMM 237, POLISCI 332T

POLISCI 233. Justice and Cities. 5 Units.
Cities have most often been where struggles for social justice happen, where injustice is most glaring and where new visions of just communities are developed and tested. This class brings political theories of justice and democracy together with historical and contemporary empirical work on city design, planning, and policies to ask the following questions: What makes a city just or unjust? How have people tried to make cities more just? What has made these efforts succeed or fail? Each session will include a case study of a particular city, largely with a focus on the United States. Students will develop research projects examining a city of their choice through the lens of a particular aspect of justice and injustice.
Same as: URBANST 134

POLISCI 233F. Science, technology and society and the humanities in the face of the looming disaster. 3-5 Units.
How STS and the Humanities can together help think out the looming catastrophes that put the future of humankind in jeopardy.
Same as: FRENCH 228, ITALIAN 228

POLISCI 234. Democratic Theory. 5 Units.
Most people agree that democracy is a good thing, but do we agree on what democracy is? This course will examine the concept of democracy in political philosophy. We will address the following questions: What reason(s), if any, do we have for valuing democracy? What does it mean to treat people as political equals? When does a group of individuals constitute "a people" and how can a people make genuinely collective decisions? Can democracy really be compatible with social inequality? With an entrenched constitution? With representation?.
Same as: ETHICSOC 234, PHIL 176P
POLISCI 234P. Deliberative Democracy and its Critics. 3-5 Units.
This course examines the theory and practice of deliberative democracy and engages both in a dialogue with critics. Can a democracy which emphasizes people thinking and talking together on the basis of good information be made practical in the modern age? What kinds of distortions arise when people try to discuss politics or policy together? The course draws on ideas of deliberation from Madison and Mill to Rawls and Habermas as well as criticisms from the jury literature, from the psychology of group processes and from the most recent normative and empirical literature on deliberative forums. Deliberative Polling, its applications, defenders and critics, both normative and empirical, will provide a key case for discussion.
Same as: AMSTUD 135, COMM 135, COMM 235, COMM 335, POLISCI 334P

POLISCI 236. Theories and Practices of Civil Society, Philanthropy, and the Nonprofit Sector. 5 Units.
What is the basis of private action for the public good? How are charitable dollars distributed and what role do nonprofit organizations and philanthropic dollars play in a modern democracy? In the Philanthropy Lab component of the course, students will award $100,000 in grants to local nonprofits. Students will explore how nonprofit organizations operate domestically and globally as well as the historical development and modern structure of civil society and philanthropy. Readings in political philosophy, history, political sociology, and public policy. Political Science majors who are taking this course to fulfill the WIM requirement should enroll in POLISCI 236S.
Same as: ETHICSOC 232T, POLISCI 236S

POLISCI 236S. Theories and Practices of Civil Society, Philanthropy, and the Nonprofit Sector. 5 Units.
What is the basis of private action for the public good? How are charitable dollars distributed and what role do nonprofit organizations and philanthropic dollars play in a modern democracy? In the Philanthropy Lab component of the course, students will award $100,000 in grants to local nonprofits. Students will explore how nonprofit organizations operate domestically and globally as well as the historical development and modern structure of civil society and philanthropy. Readings in political philosophy, history, political sociology, and public policy. Political Science majors who are taking this course to fulfill the WIM requirement should enroll in POLISCI 236S.
Same as: ETHICSOC 232T, POLISCI 236

POLISCI 237M. Politics and Evil. 5 Units.
In the aftermath of the Second World War, the political theorist Hannah Arendt wrote that the problem of evil will be the fundamental question of postwar intellectual life in Europe. This question remains fundamental today. The acts to which the word evil might apply—genocide, terrorism, torture, human trafficking, etc.—persist. The rhetoric of evil also remains central to American political discourse, both as a means of condemning such acts and of justifying preventive and punitive measures intended to combat them. In this advanced undergraduate seminar, we will examine the intersection of politics and evil by considering works by philosophers and political theorists, with occasional forays into film and media. The thinkers covered will include: Hannah Arendt, Immanuel Kant, Niccolò Machiavelli, Friedrich Nietzsche, and Michael Walzer.
Same as: ETHICSOC 237M

POLISCI 237S. Civil Society and Democracy in Comparative Perspective. 5 Units.
A cross-national approach to the study of civil societies and their role in democracy. The concept of civil society—historical, normative, and empirical. Is civil society a universal or culturally relative concept? Does civil society provide a supportive platform for democracy or defend a protected realm of private action against the state? How are the norms of individual rights, the common good, and tolerance balanced in diverse civil societies? Results of theoretical exploration applied to student-conducted empirical research projects on civil societies in eight countries. Summary comparative discussions. Prerequisite: a course on civil society or political theory. Students will conduct original research in teams of two on the selected nations. Enrollment limited to 18. Enrollment preference given to students who have taken PoliSci 236S/EthnicSoc 232T.
Same as: ETHICSOC 237

POLISCI 238. Political Disagreement. 5 Units.
Disagreement is a permanent and ubiquitous feature of political life. Furthermore, political disagreement can stem from a wide range of sources. Perhaps most importantly, democratic citizens disagree at the level of values: they disagree about the proper form of the good life as well as the human interests that political laws and institutions ought to serve. This course will focus primary attention on the implications of such value-based disagreement for how we should think about political justice.

POLISCI 238C. Governing the 21st Century World. 5 Units.
How is our world governed, and by whom? How are decisions made on the most important issues of our time, including climate change, global inequality, and protection of human rights? A traditional answer to these questions is that only official governments have the power to govern—to set and enforce rules on these and other issues. In contrast, this class explores the emerging roles of non-state actors, including NGOs, for-profit corporations, informal social movements, and international institutions, in governing our world and making decisions on these and other key issues. We will also study the ways that the governance by non-state actors challenges our ideas of democracy, legitimacy, and justice. The class thus seeks to bring together perspectives and tools from both empirical social science and political theory in order to better understand this important phenomenon.

POLISCI 238R. The Greeks and the Rational: Deliberation, Strategy, and Choice in Ancient Greek Political Thought. 3-5 Units.
The course explores the role of practical reasoning (instrumental rationality) in the ethical-political works of e.g. Plato and Aristotle, in the historical-political projects of e.g. Herodotus and Thucydides, and in the design of classical Greek institutions. We ask to what degree ancient Greeks shared intuitions concerning the rationality of choice with contemporary decision and game theorists. The Greek tradition recognized the limits of expected utility maximization in predicting or explaining the actual behavior of individuals, groups, and states, and sought to explain divergences from predicted rational behavior. Greek social theorists may, therefore, also have shared some of the intuitions of contemporary behavioral economists. Topics will include individual rationality, rationality of groups and states, the origins of social order, emergence and persistence of monarchical and democratic regimes, conflict and cooperation in interstate relations, competition and cooperation in exchange. Examining the Greek tradition of thought on practical reasoning has some implications for we might think about deliberation and bargaining in contemporary democratic-political, interpersonal-ethical, and interstate contexts.
Same as: CLASSICS 395, POLISCI 438R
POLISCI 239. Directed Reading and Research in Political Theory. 1-10 Unit.

For undergraduates. Directed reading in Political Science with a focus on political theory. To be considered for enrollment, interested students must complete the directed reading petition form available on the Political Science website before the end of week 1 of the quarter in which they'd like to enroll. May be repeated for credit.

POLISCI 230. Analyzing the 2016 Elections. 3 Units.

The seminar will normally meet for two hours, but after three seminars there will be lab sessions to acquaint students with basic quantitative methods and major social science databases. After every election the commentator promulgates a story line to explain the results. Typically later analysis shows the media story line to be wrong (eg. “values voters” in 2004). Participants in this seminar will analyze the results of the 2016 elections. The seminar is about ANALYSIS, not ideology. Some familiarity with quantitative methods is a prerequisite.

POLISCI 240A. Democratic Politics. 3-5 Units.

This course examines the relationship between democratic ideals and contemporary democratic politics. Same as: POLISCI 340A

POLISCI 240C. The Comparative Political Economy of Post-Communist Transitions. 3-4 Units.

Dominant theoretical perspectives of comparative democratization and marketization; focus is on the political economy of transition in Eastern Europe and Eurasia while comparing similar processes in Latin America and Asia. Topics include: meanings of democracy, synergy between democracies and markets, causes of the collapse of communism, paths to political liberalization and democracy, civil society, constitutions, parliaments, presidents, the rule of law, electoral systems, market requirements, strategies of reform, the Russian experience of market building, exporting democracy and the market, and foreign aid and assistance.

POLISCI 240T. Democracy, Promotion, and American Foreign Policy. 5 Units.

Theoretical and intellectual debates about democracy promotion with focus on realism versus liberalism. The evolution of these debates with attention to the Cold War, the 90s, and American foreign policy after 911. Tools for and bureaucratic struggles over how to promote democracy. Contemporary case studies.

POLISCI 241A. Political Economy of Development. 5 Units.

This course is an upper-level undergraduate seminar providing an introduction to the political economy of development. We explore many of the key academic debates surrounding how nations develop politically and economically. Course topics will include: theories of state development, the role of institutions, inequality and societal divisions, the impact of natural resources, the consequences of corruption, and the effect of globalization on the world’s poor. The course emphasizes teaching students how to read the literature critically.

POLISCI 241B. Special Topics: Comparative Political Economy. 5 Units.

Why do countries present public policies that are stable and coherent over time, whereas others policies tend to be more volatile and inconsistent? This course applies theoretical tools of comparative political economy to investigate the functioning of political institutions, political systems and the policymaking process, and their effect on public policies and on economic performance with special focus on Latin America. The goal of the course, therefore, is for students to become acquainted with the diversity of institutional combinations of Latin American countries and their effect on the profile of public policies. Same as: Latin America

POLISCI 241C. Campaigns and Elections in Israel. 5 Units.

Employing a theoretical and comparative framework, this seminar focuses on campaigns and elections in Israel. The seminar is divided into two interrelated sections. In the first section, we will cover voting behavior. Here we will look at Israel’s election laws, its political culture, socialization and cleavages, turnout, political sophistication, ideology, partisanship and issue voting. In the second half of the semester we will examine elections from the perspective of candidates and campaign strategists. The topics we will focus on include election laws, public and private campaign finance, campaign strategy, media, polling, and advertising. In examining these topics, we will cover a variety of elections campaigns since Israel’s birth, with an emphasis on the most recent ones. Same as: JEWISHST 271C

POLISCI 241S. Spatial Approaches to Social Science. 5 Units.

This multidisciplinary course combines different approaches to how GIS and spatial tools can be applied in social science research. We take a collaborative, project oriented approach to bring together technical expertise and substantive applications from several social science disciplines. The course aims to integrate tools, methods, and current debates in social science research and will enable students to engage in critical spatial research and a multidisciplinary dialogue around geographic space. Same as: ANTHRO 130D, ANTHRO 230D, URBANST 124

POLISCI 241T. Political Economy of Gender. 5 Units.

This course provides an introduction to the political economy of gender. The course explores the key areas of debate on women’s representation. Why are women underrepresented in formal political institutions? What affects women’s representation in politics? What are the effects of women’s representation? Do women politicians behave differently than their male counterparts? We review the literature to address these questions. No prior knowledge is required.

POLISCI 242. Foreign Policy Decision Making in Comparative Perspective. 3 Units.

This seminar will examine how countries and multilateral organizations make decisions about foreign and international policy. The hypothesis to be explored in the course is that individuals, bureaucracies, and interest groups shape foreign policy decisions. That hypothesis will be tested against other more structural explanations of how countries behave in the international system. After a brief review of the academic literature in the first part of the course, the seminar will focus on several cases studies of foreign policy decisionmaking by the United States, China, Russia, Iran, and North Korea, as well as the United Nations and NATO. This seminar is intended for masters, and fourth-year undergraduates. NOTE: The enrollment of the class is by application only. Please send a one page document to Anya Shkurko (ashkurko@stanford.edu) by March 10th with the following information: full name, class year, major, contact email, which version of the course you want to enroll in (e.g., POLISCI or INTLPOL). In the document please also outline previous associated coursework and/or relevant experience and write why you want to enroll in the seminar. Application results will be announced on March 22nd. Any questions related to this course can be directed to Anya Shkurko. Same as: INTLPOL 232, POLISCI 342

POLISCI 242A. Why is Africa Poor?. 5 Units.

Living standards around the world have increased, in many cases exponentially, throughout the previous century. Yet sub-Saharan Africa remains, by a considerable margin, the poorest region on Earth. This course asks three questions: Why is Africa poor? When did it become so? And will it remain so for the foreseeable future? The course draws on a range of social science disciplines, including anthropology, economics, history, political science, and sociology, to offer tentative answers.
POLISCI 242C. Corruption, Conflict and Financial Crisis: Contemporary Global Politics and Journalism. 5 Units.

This course offers students interested in contemporary global politics a unique introduction to the critical analysis of current events through the lens of award-winning non-fiction writing. Each week, we will explore a new political issue crucial to understanding today’s world by reading some of the most gripping (and best written!) first- and second-hand narratives of these events, as recounted by journalists, academics and documentarians working in the field. Topics will include: global poverty, the overthrow of authoritarian regimes, terrorism, genocide and crimes against humanity, the Israel-Palestinian conflict, financial crises, and political corruption. In class, students will discuss the readings and learn to apply major social scientific theories to systematically analyze these complex political issues. Through this course, students will not only gain exposure to some exemplary writing on topics of current importance, but also acquire the skills and tools necessary to understand some of the most intractable and interesting problems in the world today.

POLISCI 243C. The Political Economy of Development. 5 Units.

Why are some countries rich and others poor? What explains the economic policies that governments adopt, and how do those policies affect economic performance? Why some policies persist over time while other don’t? We will use tools from political science and economics to explore these important questions. The readings for this course will include conceptual and historical material from many geographic regions. As we explore the fascinating relationship between politics and economics, we will evaluate hypotheses according to robust and sound empirical evidence.

POLISCI 243D. Special Topics: Taiwan’s Democratic Evolution. 5 Units.

This course is an introduction to the contemporary politics of Taiwan. Once a poor, insecure autocracy, today Taiwan has been transformed into a prosperous and stable liberal democracy, albeit one whose long-term security remains imperiled by the rising power of the People’s Republic of China. We will draw on concepts and theories from political science to explore distinct aspects of this ongoing political evolution, including the transition to and consolidation of democracy, origins and trajectory of economic and social development, sources of Taiwanese nationalism, security of the Taiwanese state and its relationship to the PRC and the United States, parties and elections, and public policy processes and challenges.

POLISCI 243E. Political Economy of Development in Rural India. 5 Units.

When and why do farmers accept, manipulate, or overthrow the pre-existing distribution of political, economic and social power? This course will help students utilize political economy theories and methods of analysis to understand the institutional dynamics of change in rural India. First, it will provide students with a deeper understanding of the nature of change in a particularly dynamic, diverse and influential state with a mainly-rural population: India. Second, it will focus on three major topics in political economy: control over land; taxation and investment; and interstate-state resistance. The course will draw from political science, examinations of how farmers change from a small to large scale agriculture, and models of voice and innovation from which the rest of the world has much to learn. Over the course, we will explore the factors that drive the evolution of political institutions and the development of policy responses to them. The course will challenge students to think through how a better understanding of theory and the impact of prior policies might change the decisions of U.S. policymakers.

POLISCI 243L. Politics of Economic Reform. 5 Units.

Description to come.
POLISCI 245A. Politics and Public Finance. 5 Units.
The main related but different questions addressed by course are: how states have, through history, financed their expenditures, e.g. by taxing people or issuing public debt; how different political and fiscal institutions have been shaped by the varying need of the state to collect revenues (such as war revolution threats, increasing demand of redistribution by the median voter). We will focus mainly, but not only, on the historical experience of the Western World (e.g. Europe and the US), and pay special attention to the nature of political institutions in place (e.g. absolutist regimes, constitutional monarchies, different forms of democracy), over a relatively long period of time (i.e. beginning with the). The exposition will not necessarily follow a chronological order, but rather a logical one (in some sense).

POLISCI 245E. Middle East Politics. 5 Units.
This course offers a thematic approach to the study of Middle Eastern politics. We will overview the major areas of political science research on the contemporary Middle East while simultaneously building empirical knowledge about the politics of individual countries in the region. Topics to be covered include: state capacity and democracy; economic development and mineral resources; the politics of religion and gender; international relations and civil conflict; terrorism and revolution.

POLISCI 245R. Politics in Modern Iran. 5 Units.
Modern Iran has been a smithy for political movements, ideologies, and types of states. Movements include nationalism, constitutionalism, Marxism, Islamic fundamentalism, social democracy, Islamic liberalism, and fascism. Forms of government include Oriental despotism, authoritarianism, Islamic theocracy, and liberal democracy. These varieties have appeared in Iran in an iteration shaped by history, geography, proximity to oil and the Soviet Union, and the hegemony of Islamic culture.

POLISCI 246A. Paths to the Modern World: Islam and the West. 3-5 Units.
How and why did Europe develop political institutions that encouraged economic growth and industrialization? And why has the Islamic world lagged in the creation of growth-promoting institutions? This course uses a comparative approach to understanding two routes to the modern world – the historical experiences of Christian Europe and the Islamic world. We will explore questions including, when do representative parliamentary assemblies emerge and how does urbanization affect economic development?

Same as: POLISCI 446A

POLISCI 247A. Games Developing Nations Play. 3-5 Units.
If, as economists argue, development can make everyone in a society better off, why do leaders fail to pursue policies that promote development? The course uses game theoretic approaches from both economics and political science to address this question. Incentive problems are at the heart of explanations for development failure. Specifically, the course focuses on a series of questions central to the development problem: Why do developing countries have weak and often counterproductive political institutions? Why is violence (civil wars, ethnic conflict, military coups) so prevalent in the developing world, and how does it interact with development? Why do developing economies fail to generate high levels of income and wealth? We study how various kinds of development traps arise, preventing development for most countries. We also explain how some countries have overcome such traps. This approach emphasizes the importance of simultaneous economic and political development as two different facets of the same developmental process. No background in game theory is required.

Same as: ECON 162, POLISCI 347A

POLISCI 247G. Governance and Poverty. 5 Units.
Poverty relief requires active government involvement in the provision of public services such as drinking water, healthcare, sanitation, education, roads, electricity and public safety. Failure to deliver public services is a major impediment to the alleviation of poverty in the developing world. This course will use an interdisciplinary approach to examining these issues, bringing together readings from across the disciplines of political science, economics, law, medicine and education to increase understanding of the complex causal linkages between political institutions, the quality of governance, and the capacity of developing societies to meet basic human needs. Conceived in a broadly comparative international perspective, the course will examine cross-national and field-based research projects, with a particular focus on Latin America and Mexico.

POLISCI 248C. Key Issues in Chinese Politics. 4-5 Units.
(Course is available only to students participating in Stanford's SCPKU study abroad program in Beijing, which is operated by the Stanford Freeman Spogli Institute for International Studies (FSI).) A broad overview of China's politics and the role of the state in the economy. It will cover party and government organization, including central-local relations, and the challenges of governance that have emerged as China has moved from a central-planned Leninist system to a market economy. What institutions have allowed China to thrive while other communist states in the world have disappeared? How has the Chinese Communist Party managed to develop markets and yet maintain control over the economy? What are the potential challenges to China's future? What are the prospects for political change? How resilient is the party in the face of technological and economic change?

Same as: INTLPOP 248C, POLISCI 348C

POLISCI 248L. Political-Economy of Crime and Violence in Latin America. 5 Units.
Latin America has experienced a significant wave of crime and violence in the past two decades. Criminal organizations have penetrated State organizations and are increasingly embedded in society. These organizations have created wide and solid networks all over the region, including the United States. The activities of criminal organizations in Latin America have eroded the social fabric, weakened State institutions, caused a significant number of deaths, and have created strong disincentives for productive investment. The course aims at acquainting students with the political-economy of crime and violence. It focuses on understanding the incentives that individuals face for engaging in criminal activities; the incentives that criminal organizations have to use violence against each other, against citizens, and against State forces; the incentives that citizens face outside, or not, with criminal organizations; and the responses that States have structured against crime and violence. The course focuses on Latin America, but also learns from the case of the United States for which there is a relatively more extensive literature. The course makes extensive use of available data on the topic and emphasizes the learning of adequate methods and measuring these phenomena.

Same as: POLISCI 348L

POLISCI 248S. Latin American Politics. 3-5 Units.
Fundamental transformations in Latin America in the last two decades: why most governments are now democratic or semidemocratic; and economic transformation as countries abandoned import substitution industrialization policies led by state intervention for neoliberal economic policies. The nature of this dual transformation.

Same as: POLISCI 348S

POLISCI 249. Directed Reading and Research in Comparative Politics. 1-10 Unit.
For undergraduates. Directed reading in Political Science with a focus on comparative politics. To be considered for enrollment, interested students must complete the directed reading petition form available on the Political Science website before the end of week 1 of the quarter in which they’d like to enroll. May be repeated for credit.
POLISCI 24Q. Law and Order. 3 Units.
Preference to sophomores. The role of law in promoting social order. What is the rule of law? How does it differ from the rule of men? What institutions best support the rule of law? Is a state needed to ensure that laws are enforced? Should victims be allowed to avenge wrongs? What is the relationship between justice and mercy?

POLISCI 24SC. Conservatism and Liberalism in American Politics and Policy. 2 Units.
What influence do political ideologies have in American politics and government? In this course, students will study liberal and conservative ideology in American politics and public policy from the mid-20th century onward. The course begins with an examination of ideology in the American public and then considers ideology among political activists and elected officials, focusing on members of Congress and the president. The course will also cover the ideological polarization of political elites and its impact on the policy-making process. In the final part of the course, through a series of policy case studies, students will also evaluate how well certain public policies have met the ideological goals of their liberal and conservative sponsors. The course will included several lunches and dinners with guest speakers.

POLISCI 251A. Introduction to Machine Learning for Social Scientists. 4 Units.
This course introduces techniques to collect, analyze, and utilize large collections of data for social science inferences. The ultimate goal of the course is to familiarize students to modern machine learning techniques and provide the skills necessary to apply these methods widely. Students will leave the course equipped with a broad understanding of machine learning and on how to continue building new skills. This is an introductory course, so most of the lectures and problem sets will be focused on the intuition and the mechanics behind machine learning concepts rather than the mathematical fundamentals. There are no formal prerequisites for the course, but calculus and introductory statistics are strongly recommended. Students are not expected to have any programming knowledge, and the course will be centered around bite-size assignments that will help build R coding and statistical skills from scratch.

POLISCI 259. Directed Reading and Research in Political Methodology. 1-10 Unit.
For undergraduates. Directed reading in Political Science with a focus on political methodology. To be considered for enrollment, interested students must complete the directed reading petition form available on the Political Science website before the end of week 1 of the quarter in which they'd like to enroll. May be repeated for credit.

POLISCI 25N. The US Congress in Historical and Comparative Perspective. 3 Units.
This course traces the development of legislatures from their medieval European origins to the present, with primary emphasis on the case of the U.S. Congress. Students will learn about the early role played by assemblies in placing limits on royal power, especially via the power of the purse. About half the course will then turn to a more detailed consideration of the U.S. Congress's contemporary performance, analyzing how that performance is affected by procedural legacies from the past that affect most democratic legislatures worldwide.

POLISCI 27N. Thinking Like a Social Scientist. 3 Units.
Preference to freshman. This seminar will consider how politics and government can be studied systematically: the compound term Political SCIENCE is not an oxymoron. The seminar will introduce core concepts and explore a variety of methodological approaches. Problems of inference from evidence will be a major concern. Classic and contemporary research studies will be the basis of discussion throughout.

POLISCI 28N. The Changing Nature of Racial Identity in American Politics. 3 Units.
Almost one-third of Americans now identify with a racial/ethnic minority group. This seminar examines the relationship between racial identity, group consciousness, and public opinion. Topics include the role of government institutions in shaping identification, challenges in defining and measuring race, attitudes towards race-based policies, and the development of political solidarity within racial groups. Particular attention will be paid to the construction of political identities among the growing mixed-race population.

POLISCI 291. Political Institutions. 5 Units.
This course focuses on the role of political institutions in shaping policy outcomes around the world, with special attention to the United States. Students will become familiar with a wide range of theoretical approaches to the study of institutions, and they will learn the basics of applied quantitative empirical analysis. Enrollment is restricted to Political Science Research Honors Track students.

POLISCI 292. Political Behavior. 5 Units.
This research seminar will survey important topics in the study of mass political behavior including public opinion, political participation, partisanship and voting. Open only to students in the Political Science Research Honors Track.

POLISCI 299A. Research Design. 5 Units.
This course is designed to teach students how to design a research project. The course emphasizes the specification of testable hypotheses, the building of data sets, and the inferences from that evidence. This course fulfills the WIM requirement for Political Science Research Honors students.

POLISCI 299B. Honors Thesis Seminar. 5 Units.
Restricted to Political Science Research Honors students who have completed POLISCI 299A.

POLISCI 299C. Honors Thesis. 1-5 Unit.
Restricted to students in the Research Track Honors Program in Political Science.

POLISCI 299D. Honors Thesis. 1-5 Unit.
Students conduct independent research work towards a senior honors thesis. Restricted to students in the Research Track Honors Program in Political Science.

POLISCI 299B. Honors Thesis Seminar. 5 Units.
Restricted to Political Science Research Honors students who have completed POLISCI 299A.

POLISCI 299C. Honors Thesis. 1-5 Unit.
Students conduct independent research work towards a senior honors thesis. Restricted to Political Science Research Honors students who have completed POLISCI 299B.

POLISCI 299D. Honors Thesis. 1-5 Unit.
Students conduct independent research work towards a senior honors thesis. Restricted to Political Science Research Honors students who have completed POLISCI 299B.

POLISCI 29N. Mixed-Race Politics and Culture. 3 Units.
Today, almost one-third of Americans identify with a racial/ethnic minority group, and more than 9 million Americans identify with multiple races. What are the implications of such diversity for American politics and culture? In this course, we approach issues of race from an interdisciplinary perspective, employing research in the social sciences and humanities to assess how race shapes perceptions of identity as well as political behavior in 21st century U.S. We will examine issues surrounding the role of multiculturalism, immigration, acculturation, racial representation and racial prejudice in American society. Topics we will explore include the political and social formation of “race”; racial representation in the media, arts, and popular culture; the rise and decline of the “one-drop rule” and its effect on political and cultural attachments; the politicization of Census categories and the rise of the Multiracial Movement.

Same as: AFRICAAM 52N, ENGLISH 52N
POLISCI 30SI. Digital Security and Civil Society. 2 Units.
This class will instruct students in the political economy of software and digital infrastructure as they relate to civil society in democracies. We will consider the role of privacy, anonymity, free expression and free association in democracies and examine the digital tools and practices that enable these freedoms. The class consists of three interwoven themes: 1) The role of civil society in democracies 2) The political economy of digital tools and their influence on society 3) Individual and collective digital security.

Same as: POLISCI 211N

POLISCI 311N. Nuclear Politics. 3-5 Units.
Why do states develop nuclear weapons and why do some states, that have the technological capacity to build nuclear weapons, refrain from doing so? What are the strategic consequences of new states deploying nuclear weapons? What is the relationship between the spread of nuclear energy and the spread of nuclear weapons? Have international and domestic views on nuclear weapons changed since 1945? In this course, we will first examine the political science literature on these key questions about nuclear politics. We will read and critique works using different approaches in political science including quantitative analysis, experiments, game theory, historical case studies, and mixed methods. Students will then design and execute small research projects to address questions that have been inadequately addressed in the existing literature.
Same as: POLISCI 211N

POLISCI 313. US-Russia Relations After the Cold War. 2 Units.
A quarter century ago, the Soviet Union collapsed and the Cold War ended. At the time, Russian leaders aspired to build democratic and market institutions at home. They also wanted to join the West. American presidents Democrat and Republican encouraged these domestic and international changes. Today, U.S.-Russia relations are once again confrontational, reminiscent of relations during the Cold War. This course seeks to analyze shifts in U.S.-Russia relations, with special attention given to the U.S.-Russia relationship during Obama’s presidency. Readings will include academic articles and a book manuscript by Professor McFaul on Obama's reset policy. Open to students with previous coursework involving Russia.
Same as: POLISCI 213, REES 213

POLISCI 313R. Political Economy of Financial Crisis. 5 Units.
Political responses to domestic and international financial crises. Monetary and fiscal policy. The role of interest groups. International cooperation and the role of the IMF.
Same as: POLISCI 213R

POLISCI 314D. Democracy, Development, and the Rule of Law. 5 Units. (Formerly IPS 230)
This course explores the different dimensions of development - economic, social, and political - as well as the way that modern institutions (the state, rule of law, and democratic accountability) developed and interacted with other factors across different societies around the world.
Same as: INTLPOL 230, INTNLREL 114D, POLISCI 114D

POLISCI 314R. Challenges and Dilemmas in American Foreign Policy. 5 Units.
This seminar will examine the complexities and tradeoffs involved in foreign policy decision-making at the end of the twentieth century and the dawn of the post-9/11 era. Students will analyze dilemmas confronting policymakers through case studies including post-conflict reconstruction and state-building, nuclear proliferation, democratization and peace negotiation. The seminar will conclude with a 48-hour crisis simulation. For advanced undergraduates and graduate students. Application for enrollment required. Applications will be available for pick up in Political Science Department (Encina West 100) starting late-October.
Same as: POLISCI 214R

POLISCI 315A. The Rise of Asia. 3-5 Units.
We will examine the sources and implications of the rise of Asia in the international system. Topics will include military competition, international cooperation, regional integration, domestic politics, business and investment, illegalization of the environment, including nuclear energy and the spread of nuclear weapons? We will study the political science and history literature on these topics. Research paper required.
Same as: POLISCI 115A

POLISCI 315F. Nuclear Weapons and International Politics. 5 Units.
Why do states develop nuclear weapons and why do some states, that have the technological capacity to build nuclear weapons, refrain from doing so? What are the strategic consequences of new states deploying nuclear weapons? What is the relationship between the spread of nuclear energy and the spread of nuclear weapons? We will study the political science and history literature on these topics. Research paper required.
Same as: POLISCI 215F

POLISCI 316S. Decision Making in U.S. Foreign Policy. 5 Units.
Formal and informal processes involved in U.S. foreign policy decision making. The formation, conduct, and implementation of policy, emphasizing the role of the President and executive branch agencies. Theoretical and analytical perspectives; case studies. Interested students should attend the first day of class. Admission will be by permission of the instructor. Priority to IPS students.
Same as: IPS 316S

POLISCI 317M. Special Topics: International Democratization. 5 Units.
Analyzing the international aspects of democratization involves understanding at least the following: (1) what is democracy (2) what domestic-level processes increase or decrease the level of democracy (3) what kind of influences from the outside world work, and do not work, in furthering democracy, and in what ways. This course spans all subfields of political science, and spills over into law, economics, and sociology. A complicating factor is the geographical expanse of democratic institutions and efforts to promote them. Eastern Europe, Russia, the Middle East, Sub-Saharan Africa, post-civil war El Salvador and Cambodia, are only some of the regions and countries that have been impacted. Their vastly different backgrounds challenge anyone attempting the puzzle. A further complication is the variety of ways in which the outside world may affect the scope and quality of democracy. These ways include but are not limited to: pressures exercised by regional economic institutions and alliances, the power of ideas and socialization, transfers of wealth, demands for trade liberalization, the training of civic activists, reports issued by foreign election observers.
Same as: POLISCI 217M

POLISCI 318. Special Topics: Democratic Peace-A Political Biography. 3-5 Units.
The theories of democratic peace are among the most salient theories in the discipline of International Relations. The academic discussions surrounding their validity have been quite fierce as they concern also the inter-paradigmatic debates so prevalent in IR. No less interestingly, though, is the theories’ migration outside of the halls of academia into the political arena in countries such as the United States and Israel. Noteworthy is the impact those theories had on public discussions and on the shaping of foreign policies of the US following the Cold War. This phenomenon raises important meta-theoretical questions about the nature of theory, its powers, and the responsibilities of academia to society. The course will follow the political biography of the theories of democratic peace: their academic origins, migration into the public and political spheres, the politicization process they underwent, the political and rhetorical uses and misuses of the theories (including the Iraq War), and the outcomes of this charged meeting of academia and politics. No less importantly, the course will discuss the responsibility theorists bear for the real-world ramifications of their theories, and the way they should act to discharge their responsibilities.
Same as: POLISCI 218
POLISCI 318J. Japanese Politics and International Relations. 5 Units.
The domestic politics, political economy, and international relations of
contemporary Japan. The role of political parties, the bureaucracy, and
private actors. Economic development and challenges. Relations with the
United States and East Asia.
Same as: POLISCI 218J

POLISCI 319. Directed Reading in International Relations. 1-10 Unit.
For PhD students. Directed reading in Political Science with a focus on
international relations. May be repeated for credit.

POLISCI 31N. Political Freedom: Rights, Justice, and Democracy in the
Western Tradition. 3 Units.
Freedom is one of our core values. Most people can agree that freedom
is a good thing. Yet there is far less agreement about how to understand
the concept itself and what kinds of political arrangements are best
suited to protect and enhance freedom. Is freedom about being left
alone? Undertaking action with others? Participating in governance?
Does freedom require a limited state? An active and interventionist
government? A robustly participatory political system? How is freedom
connected to other political values, like justice and equality? This
seminar will consider and evaluate some of the most controversial
and challenging answers that have been given to these questions by
canonical thinkers like John Locke, John Stuart Mill, and Karl Marx, as
well as by more contemporary political and legal thinkers like Jeremy
Waldron and Cass Sunstein. We will also examine how questions about
the nature of freedom play out on college campuses and in the courts.

POLISCI 31Q. Justice and Cities. 3 Units.
Cities have most often been where struggles for social justice happen,
where injustice is most glaring and where new or renewed visions of
just communities are developed and tested. What makes a city just or
unjust? How have people tried to make cities more just? Why have these
efforts succeeded or failed? Each of our sessions will focus on questions
like these and include a case study of a particular city, largely with a
focus on the United States, including very local cases like San Francisco,
Palo Alto and East Palo Alto. The central goal of this class is for you to
gain an understanding of the roles of urban design and urban policies in
making cities just or unjust places. You will critically engage with some
of the debates on cities and justice and gain experience connecting
theoretical debates about justice and democracy to empirical data
and contemporary work on city design, planning, and policies through
readings, our class discussions, and a sustained research project looking
a particular city in depth.

POLISCI 320C. The Politics of the Administrative State. 3-5 Units.

Same as: POLISCI 220C

POLISCI 320R. The Presidency. 3-5 Units.
This course provides students with a comprehensive perspective on
the American presidency and covers a range of topics: elections,
policy making, control of the bureaucracy, unilateral action, war-
making, and much more. But throughout, the goal is to understand why
presidents behave as they do, and why the presidency as an institution
has developed as it has, with special attention to the dynamics of
the American political system and how they condition incentives,
opportunities, and power.
Same as: POLISCI 220R

POLISCI 321. Law and Politics Workshop. 2-3 Units.
This workshop will feature guest speakers who are political scientists
or law professors specializing in the legal regulation of politics.
Students will be responsible for response papers to each scholarly paper
presented. On weeks without guest speakers, topics to be covered will
include election law, administrative law, legislation, judicial behavior and
public opinion, as well as the political science relevant to those areas
of law. The final grade will be determined by class participation (10%),
response papers (30%) and final research paper (60%). Students can take
the course for R credit for either 2 or 3 units, depending on paper length.
Elements used in grading: Class participation (10%), Response papers
(30%) and final paper of no less than 18 pages for 2 units of credit and 26
pages for 3 units of credit (60%). (Cross-listed as POLISCI 321).

POLISCI 322A. Advances in Political Psychology. 3-5 Units.
Among the topics: the comparative contributions of rational choice
and political psychology; political information process; coordinating vs.
inducing preferences; identities and values; and prejudice and politics.

POLISCI 322S. Topics in Constitutional History. 5 Units.
Originalism has become the dominant topic in contemporary
constitutional interpretation. Is it possible to interpret the Constitution
according to its original, meaning, intentions, and understandings?
Should we think of the Constitution as a fixed set of rules laid down
linguistically, or a set of understandings shaped by the nation's history?
How should modern interpreters assess the legacy of major epochs of
constitutional change, from the founding era through Reconstruction and
on to the great disputes over the New Deal and civil rights? These are the
questions this course will entertain.

POLISCI 323. Pivotal Moments in American Institutions and Public Law,
1781-1994. 5 Units.
(Same as Law 680) American lawyers and policymakers work today in
a system of institutions that are strikingly unique in comparative
and historical terms. With some exceptions, that system is characterized
by relatively stable political and legal institutions, low levels of explicit
reform, high bureaucratic capacity in public organizations, and
relatively open, impersonal access to political, policymaking, and legal
institutions. Although these characteristics are now too often taken for
granted, the process through which they emerged remains remarkably
opaque. In the 1780s under the Articles of Confederation, the United
States was a poor developing country on the fringe of the Atlantic
community with limited capacity and a striking inability to provide
basic public goods, such as security. One hundred years later, it well
along the way to becoming the richest nation in the world. How did this
transformation occur? In this seminar, you will engage critically with the
legal, political, and cultural history of American institutions and their
function in American society. This seminar will feature guest speakers
who are political scientists and legal scholars. The seminar will focus
on the relationship between legal institutions and political institutions,
and on the role that political institutions play in shaping legal institutions.
In the seminar we will explore the following questions:

1. How did American institutions develop?
2. How do American institutions function today?
3. How do American institutions compare to those in other countries?

Same as: POLISCI 220C

POLISCI 324L. The Psychology of Communication About Politics in
America. 4-5 Units.
Focus is on how politicians and government learn what Americans want
and how the public’s preferences shape government action; how surveys
measure beliefs, preferences, and experiences; how poll results are
interpreted; and how conflict between polls is viewed by the
public; how accurate surveys are and when they are accurate; how to
conduct survey research to produce accurate measurements; designing
questionnaires that people can understand and use comfortably; how
question wording can manipulate poll results; corruption in survey
research.
Same as: COMM 164, COMM 264, POLISCI 124L, PSYCH 170
POLISCI 325L. Law and the New Political Economy. 3-5 Units.
(Also as LAW 7515) In this seminar, we consider key legal topics through the lens of political economy—that is, the interplay among economics, law, and politics. This perspective has had a powerful and growing impact on how scholars and judges view the nature and scope of law and politics in the modern regulatory state. We look at a range of topics from this perspective, including: constitutional law, statutory interpretation, administrative law and regulation, and jurisprudence—all with an eye toward better understanding the dynamic interaction among law, politics, and social change. There are no prerequisites for this seminar. The final assignment will be a substantial research paper.
Same as: POLISCI 225L

POLISCI 326. Race and Racism in American Politics. 5 Units.
Topics include the historical conceptualization of race; whether and how racial animus reveals itself and the forms it might take; its role in the creation and maintenance of economic stratification; its effect on contemporary U.S. partisan and electoral politics; and policy making consequences.
Same as: AMSTUD 226, CSRE 226, POLISCI 226

POLISCI 326T. The Politics of Education. 3-5 Units.
America's public schools are government agencies, and virtually everything about them is subject to political authority—and thus to decision through the political process. This seminar is an effort to understand the politics of education and its impacts on the nation's schools. Our focus is on the modern era of reform, with special attention to the most prominent efforts to bring about fundamental change through accountability (including No Child Left Behind), school choice (charter schools, vouchers), pay for performance, and more and more to the politics of blocking that has made genuine reform so difficult to achieve.
Same as: POLISCI 226T

POLISCI 327. Minority Behavior and Representation. 5 Units.
Politics of minorities in the U.S. Topics include: historic and contemporary struggles of Latinos, African Americans, and gays and lesbians for political power and social acceptance; group-level public opinion and electoral behavior; scholarship on group influence in the policy making process and policy issues of importance; and the jurisprudence shaping minority political access and civil rights.

POLISCI 327C. Law of Democracy. 3-5 Units.
Combined with LAW 7036 (formerly LAW 577). This course is intended to give students a basic understanding of the themes in the legal regulation of elections and politics. We will cover all the major Supreme Court cases on topics of voting rights, reapportionment/redistricting, ballot access, regulation of political parties, campaign finance, and the 2000 presidential election controversy. The course pays particular attention to competing political philosophies and empirical assumptions that underlie the Court’s reasoning while still focusing on the cases as litigation tools used to serve political ends. Elements used in grading: Class participation and one day take home final exam. (POLISCI 327C; LAW 577).
Same as: COMM 361

POLISCI 329. Directed Reading and Research in American Politics. 1-10 Unit.
For PhD students. Directed reading in Political Science with a focus on American politics. May be repeated for credit.

POLISCI 330A. Classical Seminar: Origins of Political Thought. 3-5 Units.
(Formerly CLASSHIS 133/333.) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change.
Same as: CLASSICS 181, CLASSICS 381, ETHICSOC 130A, PHIL 176A, PHIL 276A, POLISCI 230A

POLISCI 331. High-Stakes Politics: Case Studies in Political Philosophy, Institutions, and Interests. 3-5 Units.
Normative political theory combined with positive political theory to better explain how major texts may have responded to and influenced changes in formal and informal institutions. Emphasis is on historical periods in which catastrophic institutional failure was a recent memory or a realistic possibility. Case studies include Greek city-states in the classical period and the northern Atlantic community of the 17th and 18th centuries including upheavals in England and the American Revolutionary era.
Same as: CLASSICS 382, POLISCI 231

POLISCI 332. Topics in Political Philosophy. 5 Units.
Same as: PHIL 372D

POLISCI 332T. The Dialogue of Democracy. 4-5 Units.
All forms of democracy require some kind of communication so people can be aware of issues and make decisions. This course looks at competing visions of what democracy should be and different notions of the role of dialogue in a democracy. Is it just campaigning or does it include deliberation? Small scale discussions or sound bites on television? Or social media? What is the role of technology in changing our democratic practices, to mobilize, to persuade, to solve public problems? This course will include readings from political theory about democratic ideals - from the American founders to J.S. Mill and the Progressives to Joseph Schumpeter and modern writers skeptical of the public will. It will also include contemporary examinations of the media and the internet to see how those practices are changing and how the ideals can or cannot be realized.
Same as: AMSTUD 137, COMM 137W, COMM 237, POLISCI 232T

POLISCI 333. Social Agency. 2-4 Units.
Humans are agents who live in a social world. Philosophical reflection on human agency needs to include reflection both on the agency of individual human agents and on forms of social agency that involve multiple individuals. This seminar will focus on aspects of the latter. What is it for multiple individuals to think and to act together—to engage in shared intentional/shared cooperative activity? To deliberate together? to engage in what some have called team reasoning? What kinds of social agency are characteristic of larger social organizations or groups? What would it be for larger groups themselves to be agents, ones who have their own distinctive intentions on the basis of which they act? What is the relation between these larger forms of social agency and small-scale shared cooperative activity? In all these cases how do we best understand what we are talking about when we speak of what we intend or believe and of what we are doing? Readings to be drawn from recent work of Michael Bratman, Margaret Gilbert, Christian List, Kirk Ludwig, Philip Pettit, John Searle, Scott Shapiro, and others, as well as classic work of H.L.A. Hart.

Prerequisite: graduate standing in Philosophy or permission of instructor. 2 unit option for PhD students only; all others must enroll for 4 units.
Same as: PHIL 377

POLISCI 333M. Research and Methods in Political Theory. 3-5 Units.
This seminar has two aims. First, we discuss recent scholarship that examines the relationship between normative and empirical (or positive) work. In particular, we focus on normative work in political theory/philosophy and empirical work in political science and other social sciences. Second, we discuss in an informal workshop setting the ongoing work of graduate students, considering how, if at all, the readings on methodology could inform this work.
POLISCI 333S. Marx. 2-4 Units.
This course examines the works of a thinker who radically transformed the ways that we think about modern society. Marx saw fundamental problems with capitalist societies, including: un-freedom, alienation, inequality, and bureaucratization. He developed a theory to account for these problems. Our task will be to read his works critically and to evaluate their contributions to our understanding of the relationship between politics, social structure, knowledge and human agency. We will also be especially interested in comparing his view with alternative diagnoses of the problems of modern capitalist societies, especially those of Max Weber and John Rawls.
Same as: PHIL 339

POLISCI 334. Philanthropy and Civil Society. 1-3 Unit.
Cross-listed with Law (LAW 781), Political Science (POLISCI 334) and Sociology (SOC 374). Associated with the Center for Philanthropy and Civil Society (PACS). Year-long workshop for doctoral students and advanced undergraduates writing senior theses on the nature of civil society or philanthropy. Focus is on pursuit of progressive research and writing contributing to the current scholarly knowledge of the nonprofit sector and philanthropy. Accomplished in a large part through peer review. Readings include recent scholarship in aforementioned fields. May be repeated for credit for a maximum of 9 units.
Same as: EDUC 374, SOC 374

POLISCI 334P. Deliberative Democracy and its Critics. 3-5 Units.
This course examines the theory and practice of deliberative democracy and engages both in a dialogue with critics. Can a democracy which emphasizes people thinking and talking together on the basis of good information be made practical in the modern age? What kinds of distortions arise when people try to discuss politics or policy together? The course draws on ideas of deliberation from Madison and Mill to Rawls and Habermas as well as criticisms from the jury literature, from the psychology of group processes and from the most recent normative and empirical literature on deliberative forums. Deliberative Polling, its applications, defenders and critics, both normative and empirical, will provide a key case for discussion.
Same as: AMSTUD 135, COMM 135, COMM 235, COMM 335, POLISCI 234P

POLISCI 335A. Adam Smith: From Moral Philosophy to Political Economy. 3-5 Units.
This course is designed for graduate students and advanced undergraduates interested in moral philosophy or modern political economy. The course blends two approaches to Adam Smith. We use political thought and intellectual history to introduce students to the intellectual roots of classical Liberalism; asking: What are the moral psychological foundations of justice? Does the free market make everyone, including the least advantaged, better off? How do we sustain a good society? We use social science to study Smith’s integrated approach to human cooperation in three realms, society, politics, and markets; asking: Why isn’t the entire world developed? How did Europe develop out of feudalism? How does a community sustain moral behavior? The two perspectives allow us to discover that Smith has ideas on these subjects that expand today’s frontiers of both positive and normative social science.

POLISCI 336. Introduction to Global Justice. 4 Units.
This course provides an overview of core ethical problems in international politics, with special emphasis on the question of what demands justice imposes on institutions and agents acting in a global context. It is divided into three sections. The first investigates the content of global justice, and comprises of readings from contemporary political theorists and philosophers who write within the liberal contractualist, utilitarian, cosmopolitan, and nationalist traditions. The second part looks at the obligations which global justice generates in relation to a series of real-world issues of international concern: global poverty, human rights, poverty and development, climate change and natural resources, international migration, and the well-being of women. The final section asks whether a democratic international order is necessary for global justice to be realized.
Same as: ETHICSOC 136R, INTNLREL 136R, PHIL 76, POLISCI 136R

POLISCI 336S. Justice. 4-5 Units.
Focus is on the idea of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include financing schools and elections, regulating markets, discriminating against people with disabilities, and enforcing sexual morality. Political Science majors taking this course to fulfill the WIM requirement should enroll in POLISCI 103.
Same as: ETHICSOC 171, PHIL 171, POLISCI 103, PUBLPOL 103C, PUBLPOL 307

POLISCI 337A. Political Philosophy: The Social Contract Tradition. 4 Units.
(Graduate students register for 276.) Why and under what conditions do human beings need political institutions? What makes them legitimate or illegitimate? What is the nature, source, and extent of the obligation to obey the legitimate ones, and how should people alter or overthrow the others? Study of the answers given to such questions by major political theorists of the early modern period: Hobbes, Locke, Rousseau, and Kant.
Same as: ETHICSOC 176, PHIL 176, PHIL 276, POLISCI 137A

POLISCI 337L. Ancient Greek Law and Justice. 3-5 Units.
The development and practice of law and legal procedure in the ancient Greek world, emphasizing the well documented case of classical Athens. Constitutional, criminal, and civil law, approached through analysis of actual laws and speeches by litigants in Athenian courtrooms. Review of a growing scholarship juxtaposing Greek law to other prominent legal traditions and exploring the role of law in Greek social relations, economics, and literature, and its relationship to Greek conceptions of justice.
Same as: CLASSICS 378
POLISCI 338. Universal Basic Income: the philosophy behind the proposal. 4 Units.
The past three decades have seen the elaboration of a vast body of literature on unconditional basic income as a radical policy proposal. Philippe Van Parijs referred to as a disarmingly simple idea. It consists of a monthly cash allowance given to all citizens, regardless of personal desert and without means test to provide them with a standard of living above the poverty line. The seminar will seek to engage students in normative debates in political theory (feminism, liberalism, republicanism, communism, libertarianism, etc.) by appealing to the concrete example of basic income. It will allow students to learn a great deal about a policy that is gaining tremendous currency in academic and public debates, while discussing and learning about prominent political theorists - many of whom have written against or for basic income at one point in their career. The seminar is open to undergraduate and graduate students in all departments. There are no pre-requisites. We will ask questions such as: is giving people cash no strings attached desirable and just? Would basic income promote a more gender equal society through the remuneration of care-work, or would it risks further entrenching the position of women as care-givers? Would alternative policies be more successful (such as the job guarantees, stakeholder grants or a negative income tax)? How can we test out basic income? What makes for a reliable and ethical basic income pilot? Students in Politics, Philosophy, Public Policy, Social Work, and Sociology should find most of those questions relevant to their interests. Some discussions on how to fund basic income, on the macro-economic implications of basic income and on the existing pilots projects (in Finland, Namibia, India, Canada and the US) may be of interest to Economists; while our readings on the impact of new technologies and artificial intelligence on the future of work and whether a basic income could be a solution, are likely to be of interest to computer scientists and engineers. By the end of the class, students will have an in depth knowledge of the policy and will have developed skills in the normative analysis of public policy. They will be able to deploy those critical and analytical skills to assess a broad range of other policies. 

Same as: ETHICSOC 174B, ETHICSOC 274B, PHIL 174B, PHIL 274B

POLISCI 339. Directed Reading and Research in Political Theory. 1-5 Unit.
For PhD students. Directed reading in Political Science with a focus on political theory. May be repeated for credit.

Same as: POLISCI 240A

POLISCI 340A. Democratic Politics. 3-5 Units.
This course examines the relationship between democratic ideals and contemporary democratic politics.

Same as: POLISCI 240A

POLISCI 340L. China in World Politics. 5 Units.
The implications of the rise of China in contemporary world politics and for American foreign policy, including issues such as arms and nuclear proliferation, regional security arrangements, international trade and investment, human rights, environmental problems, and the Taiwan and Tibet questions.

Same as: POLISCI 140L

POLISCI 342. Foreign Policy Decision Making in Comparative Perspective. 3 Units.
This seminar will examine how countries and multilateral organizations make decisions about foreign and international policy. The hypothesis to be explored in the course is that individuals, bureaucracies, and interest groups shape foreign policy decisions. That hypothesis will be tested against other more structural explanations of how countries behave in the international system. After a brief review of the academic literature in the first part of the course, the seminar will focus on several cases studies of foreign policy decision-making by the United States, China, Russia, Iran, and North Korea, as well as the United Nations and NATO. This seminar is intended for masters' students and fourth-year undergraduates. NOTE: The enrollment of the class is by application only. Please send a one page document to Anya Shkurko (ashkurko@stanford.edu) by March 10th with the following information: full name, class year, major, contact email, which version of the course you want to enroll in (e.g., POLISCI or INTLPOL). In the document please also outline previous coursework and/or relevant experience and write why you want to enroll in the seminar. Application results will be announced on March 22nd. Any questions related to this course can be directed to Anya Shkurko.

Same as: INTLPOL 232, POLISCI 242

POLISCI 343A. Field Methods. 3-5 Units.
Familiarizes students with a variety of field methods potentially applicable to ongoing research projects and dissertations. Topics include case selection, process tracing, participant observation, interviewing, archival research, survey design, labexperiments, field experiments, and ethical concerns in the field. Students develop a field research strategy as a final project. Prerequisites: 440A,B,C.

POLISCI 344. Politics and Geography. 3-5 Units.
The role of geography in topics in political economy, including development, political representation, voting, redistribution, regional autonomy movements, fiscal competition, and federalism.

POLISCI 344A. Authoritarian Politics. 3-5 Units.
Examination of how authoritarian regimes govern. Topics include: historical determinants of authoritarian government, typologies of authoritarian rule and impact of authoritarian governance on economic growth.

Same as: POLISCI 244A

POLISCI 344U. Political Culture. 3-5 Units.
The implications of social norms, preferences and beliefs for political and economic behavior and societal outcomes.

Same as: POLISCI 244U

POLISCI 347A. Games Developing Nations Play. 3-5 Units.
If, as economists argue, development can make everyone in a society better off, why do leaders fail to pursue policies that promote development? The course uses game theoretic approaches from both economics and political science to address this question. Incentive problems are at the heart of explanations for development failure. Specifically, the course focuses on a series of questions central to the development problem: Why do developing countries have weak and often counterproductive political institutions? Why is violence (civil wars, ethnic conflict, military coups) so prevalent in the developing world, and how does it interact with development? Why do developing economies fail to generate high levels of income and wealth? We study how various kinds of development traps arise, preventing development for most countries. We also explain how some countries have overcome such traps. This approach emphasizes the importance of simultaneous economic and political development as two different facets of the same developmental process. No background in game theory is required.

Same as: ECON 162, POLISCI 247A
POLISCI 347D. Rebooting Government with Design Thinking. 3-4 Units. Students apply tools of human-centered design to issues of government performance. Small project teams work with NGO and government partners (in the U.S. and abroad) on concrete design challenges focused on issues such as how to deliver services more effectively and ensure that citizens’ voices are heard. Students identify needs, generate concepts, create prototypes, and test their appropriateness. Taught through the Hasso Plattner Institute of Design at Stanford (http://dschool.stanford.edu). Enrollment limited. Application required. Prerequisites: consent of instructor(s). Same as: PUBLPOL 347D

POLISCI 347G. Governance and Poverty. 3-5 Units. Poverty relief requires active government involvement in the provision of public services such as drinking water, healthcare, sanitation, education, roads, electricity and public safety. Failure to deliver public services is a major impediment to the alleviation of poverty in the developing world. This course will use an interdisciplinary approach to examining these issues, bringing together readings from across the disciplines of political science, economics, law, medicine and education to increase understanding of the complex causal linkages between political institutions, the quality of governance, and the capacity of developing societies to meet basic human needs. Conceived in a broadly comparative international perspective, the course will examine national and field-based research projects, with a particular focus on Latin America and Mexico.

POLISCI 348. Chinese Politics. 3-5 Units. China, one of the few remaining communist states in the world, has not only survived, but has become a global political actor with the fastest growing economy in the world. What explains China’s authoritarian resilience? Why has the CCP thrived while other communist regimes have failed? How has the Chinese Communist Party managed to develop markets and yet keep itself in power? What avenues are there for political participation? How does censorship work in the information and ‘connected’ age of social media? What are the prospects for political change? How resilient is the part in the face of technological and economic change? What institutions have allowed China to thrive while other communist regimes have failed? How has the Chinese Communist Party managed to increase understanding of the complex causal linkages between political institutions, the quality of governance, and the capacity of developing societies to meet basic human needs. Conceived in a broadly comparative international perspective, the course will examine cross-national and field-based research projects, with a particular focus on Latin America and Mexico.

POLISCI 348C. Key Issues in Chinese Politics. 4-5 Units. (Course is available only to students participating in Stanford’s SCPKU study abroad program in Beijing, which is operated by the Stanford Freeman Spogli Institute for International Studies (FSI).) A broad overview of China’s politics and the role of the state in the economy. It will cover party and government organization, including central-local relations, and the challenges of governance that have emerged as China has moved from a central-planned Leninist system to a market economy. What institutions have allowed China to thrive while other communist states in the world have disappeared? How has the Chinese Communist Party managed to develop markets and yet keep itself in power? What avenues are there for political participation? What is the role of the internet? What are the prospects for political change? How resilient is the party in the face of technological and economic change?.

Same as: INTLPOL 248C, POLISCI 248C

POLISCI 348L. Political-Economy of Crime and Violence in Latin America. 5 Units. Latin America has experienced a significant wave of crime and violence in the past two decades. Criminal organizations and drug-trafficking cartels have been emboldened and emboldened as new governments have come to power. These organizations have created wide and solid networks all over the region, eroding the social fabric, weakening state institutions, and causing a significant number of deaths, and have caused strong disincentives for productive investment. The course aims to acquaint students with the political-economy of crime and violence. It focuses on understanding the incentives that individuals face for engaging in criminal activities; the incentives that criminal organizations have to use violence against each other, against citizens, and against state forces; the incentives that citizens face to side, or not, with criminal organizations; and the responses that States have structured against crime and violence. The course focuses on Latin America, but also learns from the case of the United States for which there is a relatively more extensive literature. The course makes extensive use of available data on the topic and emphasizes the learning of adequate methods for measuring these phenomena. Same as: POLISCI 248L

POLISCI 348S. Latin American Politics. 3-5 Units. Fundamental transformations in Latin America in the last two decades: why these governments are now democratic or semidemocratic; and economic transformation as countries abandoned import substitution industrialization policies led by state intervention for neoliberal economic policies. The nature of this dual transformation. Same as: POLISCI 248S

POLISCI 349. Directed Reading and Research in Comparative Politics. 1-10 Unit. For PhD students. Directed reading in Political Science with a focus on comparative politics. May be repeated for credit.

POLISCI 34S. Religion and Politics. 3 Units. What is the relationship between religion, international conflict and peace? This course takes up this question by examining contemporary thinking in international relations, conflict management, political science, and religious ethics. Topics to be taken up include: whether religion is fundamentally a positive or negative force in conflict management; how do major world religions think about war and peace; the relationship of religion to terrorism; whether thinking about religion in international conflict requires its own categories, distinct from models concerning ethnic or nationalistic communities in conflict; varieties of religious militancy; religion’s potential role in conflict resolution; among others. Through these investigations, students will better grasp the contemporary scholarship on the place of religion in international conflict and peace building. Readings are interdisciplinary in nature, and include case studies. No prerequisite. Open to all majors/minors, and will be particularly beneficial to students in International Relations, Religious Studies, International Policy Studies, and Political Science, as well as students with specific regional political interests where the themes of the course are especially relevant (e.g., Middle East, Latin America, Russia and Eastern Europe, Africa, and so on).

POLISCI 351A. Foundations of Political Economy. 3 Units. Introduction to political economy with an emphasis on formal models of collective choice, public institutions, and political competition. Topics include voting theory, social choice, institutional equilibria, agenda setting, interest group politics, bureaucratic behavior, and electoral competition.
POLISCI 351B. Economic Analysis of Political Institutions. 4 Units.
Applying techniques such as information economics, games of incomplete information, sequential bargaining theory, repeated games, and rational expectations of microeconomic analysis and game theory to political behavior and institutions. Applications include agenda formation in legislatures, government formation in parliamentary systems, the implications of legislative structure, elections and information aggregation, lobbying, electoral competition and interest groups, the control of bureaucracies, interest group competition, and collective choice rules.

POLISCI 351C. Institutions and Bridge-Building in Political Economy. 4 Units.
This course critically surveys empirical applications of formal models of collective-choice institutions. It is explicitly grounded in philosophy of science (e.g., Popperian positivism and Kuhn's notions of paradigms and normal science). Initial sessions address the meanings and roles of the concept of institutions in social-science research. Historically important works of political science and/or economics are then considered within a framework called Components of Institutional Analysis (or CIA), which provides a fully general way of evaluating research that is jointly empirical and formal theoretical. The course concludes with contemporary instances of such bridge-building. The over-arching objectives are to elevate the explicitness and salience of desirable properties of research and to illustrate the inescapable tradeoffs among the stipulated criteria. Although this is a core course in the GSB Political Economy PhD curriculum, its substantive foci may differ across years depending on the instructor. For Professor Krebs's sessions, the emphasis is on legislative behavior, organization, and lawmaking, and on inter-institutional strategic interaction (e.g., between executive, legislative, and judicial branches in various combinations). Students should have taken POLECON 680 and POLECON 681. Also listed as Political Science 351C.

POLISCI 352. Introduction to Game Theoretic Methods in Political Science. 3-5 Units.
Concepts and tools of non-cooperative game theory developed using political science questions and applications. Formal treatment of Hobbes' theory of the state and major criticisms of it; examples from international politics. Primarily for graduate students; undergraduates admitted with consent of instructor.
Same as: POLISCI 152

POLISCI 353A. Workshop in Political Methodology. 1-2 Unit.
Mathematical and statistical models and applications to political science. Guest speakers, faculty, and students present research papers. May be repeated for credit.

POLISCI 353B. Workshop in Political Methodology. 1-2 Unit.
Continuation of POLISCI 353A. Mathematical and statistical models and applications to political science. Guest speakers, faculty, and students present research papers. May be repeated for credit.

POLISCI 353C. Workshop in Political Methodology. 1-2 Unit.
Continuation of POLISCI 353B. Mathematical and statistical models and applications to political science. Guest speakers, faculty, and students present research papers. May be repeated for credit.

POLISCI 354. Thinking Strategically. 5 Units.
This course provides an introduction to strategic reasoning. We discuss ideas such as the commitment problem, credibility in signaling, cheap talk, moral hazard and adverse selection. Concepts are developed through games played in class, and applied to politics, business and everyday life.
Same as: POLISCI 153

POLISCI 355A. Data Science for Politics. 5 Units.
Data science is quickly changing the way we understand and engage in the political process. In this course we will develop fundamental techniques of data science and apply them to large political datasets on elections, campaign finance, lobbying, and more. The objective is to give students the skills to carry out cutting edge quantitative political studies in both academia and the private sector. Students with technical backgrounds looking to study politics quantitatively are encouraged to enroll.
Same as: POLISCI 150A

POLISCI 355B. Machine Learning for Social Scientists. 5 Units.
Machine learning - the use of algorithms to classify, predict, sort, learn and discover from data - has exploded in use across academic fields, industry, government, and the non-profit sector. This course provides an introduction to machine learning for social scientists. We will introduce state of the art machine learning tools, show how to use those tools in the programming language R, and demonstrate why a social science focus is essential to effectively apply machine learning techniques in social, political, and policy contexts. Applications of the methods will include forecasting social phenomena, evaluating the use of algorithms in public policy, and the analysis of social media and text data. Prerequisite: POLISCI 150A/355A.
Same as: POLISCI 150B

POLISCI 355C. Causal Inference for Social Science. 5 Units.
Causal inference methods have revolutionized the way we use data, statistics, and research design to move from correlation to causation and rigorously learn about the impact of some potential cause (e.g., a new policy or intervention) on some outcome (e.g., election results, levels of violence, poverty). This course provides an introduction that teaches students the toolkit of modern causal inference methods as they are now widely used across academic fields, government, industry, and non-profits. Topics include experiments, matching, regression, sensitivity analysis, difference-in-differences, panel methods, instrumental variable estimation, and regression discontinuity designs. We will illustrate and apply the methods with examples drawn from various fields including policy evaluation, political science, public health, economics, business, and sociology. Prerequisites: POLISCI 150A and POLISCI 150B.
Same as: POLISCI 150C

POLISCI 356A. Formal Theory I: Game Theory for Political Science. 3-5 Units.
An introduction to noncooperative game theory through applications in political science. Topics will include the Hotelling-Downs model, the probabilistic voting model, political bargaining models and political agency models, among others.

POLISCI 356B. Formal Theory II: Models of Politics. 3-5 Units.
A continuation of Formal Theory I covering advanced topics, including classical political economy, comparative institutions, theories of conflict and cooperation, dynamic political economy, and the new behavioral political economy.

POLISCI 357. Sampling and Surveys. 5 Units.
The importance of sample surveys as a source of social science data including public opinion, voting, welfare programs, health, employment, and consumer behavior. Survey design, sampling theory, and estimation. Nonresponse, self-selection, measurement error, and web survey methods. Prerequisite: 350B or equivalent.

POLISCI 358. Data-driven Politics. 3-5 Units.
Covers advanced computational and statistical methods for collecting and modeling large-scale data on politics. Topics will include automated and computer-assisted methods for collecting, disambiguating, and merging unstructured data (web-scraping, identity resolution, and record-linkage), database management (SQL, data architecture), data-reduction techniques for measuring the political preferences for large numbers of individuals, topic models applied to political text/speech, and social network analysis for mapping relationships and identifying influential actors.
POLISCI 359. Advanced Individual Study in Political Methodology. 1-10 Unit.
For PhD students. Directed reading in Political Science with a focus on political methodology. May be repeated for credit.

POLISCI 362. New Economics of Organization. 5 Units.
Survey of economic approaches to organization, emphasizing theory and application, with attention to politics.

POLISCI 400. Dissertation. 1-18 Unit.
Pre-TGR dissertation research. Open to Poli Sci PhD students who have advanced to candidacy.

POLISCI 400C. Research Design. 5 Units.
This course is a research design practicum. Students are required to propose a research question that speaks to a consequential political issue, and one which can be successfully addressed relying on disciplinary tools. Over the quarter, they will be guided through the elements of research design (narrative, theory, and statistics). The final product will be a project description of the form demanded by the National Science Foundation for its research proposals. Required of all Political Science PhD students. Those not in the Ph.D. program in political science must get consent from the instructor to enroll.

POLISCI 404. Dispute Resolution in International Economic Law. 1 Unit.
(Same as LAW 356.) Topics include: theoretical work on international trade and investment disputes; empirical work on WTO dispute resolution and the efficacy of developing country participation; and legal analysis of current, prominent disputes in the WTO and under international investment treaties. Substantial paper required. May be repeated for credit.

POLISCI 401B. Workshop in International Relations. 1-2 Unit.
For graduate students. Contemporary work. Organized around presentation of research by students and outside scholars. May be repeated for credit.

POLISCI 401C. Workshop in International Relations. 1-2 Unit.
For graduate students. Contemporary work. Organized around presentation of research by students and outside scholars. May be repeated for credit.

POLISCI 411A. Workshop in International Relations. 1-2 Unit.
For graduate students. Contemporary work. Organized around presentation of research by students and outside scholars. May be repeated for credit.
POLISCI 422P. Creating the American Republic. 4-5 Units.
Concepts and developments in the late 18th-century invention of American constitutionalism; the politics of constitution making and ratifying; emergence of theories of constitutional interpretation including originalism; early notions of judicial review. Primary and secondary sources.
Same as: AMSTUD 251X, HISTORY 251, HISTORY 351, POLISCI 222P

POLISCI 423A. The Laboratory of the Study of American Values. 1-5 Unit.
Designed for graduate students who are writing dissertations about American public opinion. Students participate in all phases of the research process and include questions on nationally representative surveys. Enrollment is limited to members of the Laboratory for the Study of American Values.

POLISCI 423B. The Laboratory of the Study of American Values II. 1-5 Unit.
Designed for graduate students who are writing dissertations about American public opinion. Students participate in all phases of the research process and include questions on nationally representative surveys. Enrollment is limited to members of the Laboratory for the Study of American Values.

POLISCI 423C. The Laboratory of the Study of American Values III. 1-5 Unit.
Designed for graduate students who are writing dissertations about American public opinion. Students participate in all phases of the research process and include questions on nationally representative surveys. Enrollment is limited to members of the Laboratory for the Study of American Values.

POLISCI 424A. Democratic Elections. 3-5 Units.
How do democratic elections work? Do elections make representatives accountable, and if so, under what conditions? What preferences do electorates reveal to us when they choose candidates for office, and how do candidates and representatives respond to these preferences? What external factors change the dynamics between candidates and electorates? In this class we will study the functioning of democratic elections, mainly in the context of legislative elections. Because this is an elections course, the unit of analysis will be the constituency or the candidate rather than the individual voter, as it might be in a behavior course. We want to understand how candidates make it to office, i.e., the aggregated choices of many voters, and how the prospect of reelection shapes their behavior in office.

POLISCI 425. Political Communication. 1-5 Unit.
An overview of research in political communication with particular reference to work on the impact of the mass media on public opinion and voting behavior. Limited to Ph.D. students. Prerequisite: 260 or consent of instructor.
Same as: COMM 360G

POLISCI 425S. Topics in Political Communication: Media Bias, Selective Exposure, and Political Polarization. 1-5 Unit.
This course surveys theories of media bias, biased processing of information, and the empirical challenges facing researchers attempting to link changes in the composition of audiences to attitudinal and behavioral outcomes. (Limited to PhD students)
Same as: COMM 362

POLISCI 426S. Theories of Racism in American Politics: A Critique. 0 Units.

POLISCI 427R. Race and Racism in American Politics. 5 Units.
Topics include the historical conceptualization of race; whether and how racial animus reveals itself and the forms it might take; its role in the creation and maintenance of economic stratification; its effect on contemporary U.S. partisan and electoral politics; and policy making consequences.

POLISCI 428. Political Economy and Political Behavior. 4 Units.
[Same as POLECON 677] This seminar will expose students to cutting-edge research in political behavior and political economy published in the leading political science (and other social science) journals. The aim is for students to learn the contemporary literature so that they can be producers of research. To that end, the required assignments in the class will be aimed at professional development: writing an original research note, writing a review, and delivering a scholarly presentation.

POLISCI 42Q. The Rwandan Genocide. 5 Units.
Between April and July of 1994 more than 800,000 Rwandans, mostly Tutsi but also moderate Hutus, were killed in the most rapid genocide the world has ever known. The percentage of Rwandans killed in a single day of the genocide was ten times greater than the percentage of Americans killed in the entire Vietnam war. What could bring humans to plan and carry out such an orgy of violence? Could it have been prevented? Why did the United States or any other major power not intervene to stop the killing? To what extent should the United Nations be held accountable for the failure to end the genocide? What were the consequences of the genocide for the region of Central Africa? How did international actors respond to the challenges of reconstructing Rwanda after the killings? What has happened to the perpetrators of the genocide? This course surveys scholarly and journalistic accounts of the genocide to seek answers to these questions.
This seminar will be residence based in Crothers, but will be open to Crothers residents and non-residents.

POLISCI 430. Origins of Political Thought. 3-5 Units.
Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change.
Same as: CLASSICS 390, PHIL 276D

POLISCI 430A. Ancient Greek Economic Development. 4-5 Units.
(Formerly CLASSHIS 330A.) Drawing on Herodotus and other literary sources, ancient historians have traditionally seen classical Greece as a very poor land. Recent research, however (much of it conducted here at Stanford), suggests that Greece in fact saw substantial economic growth and rising standards of living across the first millennium BCE. This seminar tests the poor Hellas/wealthy Hellas models against literary and archaeological data. We will develop and test hypotheses to explain the rate and pace of economic change in the Greek world.
Same as: CLASSICS 384A

POLISCI 430B. Ancient Greek Economic Development. 1-5 Unit.
(Formerly CLASSHIS 330B.) Drawing on Herodotus and other literary sources, ancient historians have traditionally seen classical Greece as a very poor land. Recent research, however (much of it conducted here at Stanford), suggests that Greece in fact saw substantial economic growth and rising standards of living across the first millennium BCE. This seminar tests the poor Hellas/wealthy Hellas models against literary and archaeological data. We will develop and test hypotheses to explain the rate and pace of economic change in the Greek world.
Same as: CLASSICS 384B
POLISCI 431L. INEQUALITY: Economic and Philosophical Perspectives. 5 Units.
The nature of and problem of inequality is central to both economics and philosophy. Economists study the causes of inequality, design tools to measure it and track it over time, and examine its consequences. Philosophers are centrally concerned with the justification of inequality and the reasons why various types of inequality are or are not objectionable. We bring both of these approaches together.

Our class explores the different meanings of and measurements for understanding inequality, our best understandings of how much inequality there is, its causes, its consequences, and whether we ought to reduce it, and if so, how. This is an interdisciplinary graduate seminar. We propose some familiarity with basic ideas in economics and basic ideas in contemporary political philosophy; we will explain and learn about more complex ideas as we proceed. The class will be capped at 20 students.

Same as: ECON 380, ETHICSOC 371R, PHIL 371D

POLISCI 432R. Selections in Modern Political Thought. 3-5 Units.
This graduate-level seminar explores selections from the canon of Western political thought from the late fifteenth through nineteenth centuries. Throughout the course, we will engage in close textual readings of individual thinkers and consider some of the larger questions raised by political modernity. The Fall 2015 offering of the course will focus on the three modern social contract thinkers: Thomas Hobbes, John Locke, and Jean-Jacques Rousseau.

Same as: ETHICSOC 432X

POLISCI 433. Workshop in Political Theory. 1-2 Unit.
For graduate students. Faculty, guest speakers, and graduate students conducting research in political theory present works-in-progress. May be repeated for credit.

POLISCI 434. Egalitarianism. 5 Units.
This seminar will explore different theories of equality in contemporary political philosophy. Topics include: the currency of equality (equality of what?); equality versus sufficiency or prioritarianism; the relationship between equality and responsibility; the value of equality; and different interpretations of equality of opportunity. Readings will be drawn from the work of Elizabeth Anderson, G.A. Cohen, Ronald Dworkin, Thomas Nagel, Derek Parfit, John Rawls, Thomas Scanlon, Amartya Sen, and others.

POLISCI 434A. Ethics, Economics and the Market. 4 Units.
Economic analysis inevitably raises moral questions. Getting clear on those moral questions, and the competing answers to them, can help improve both economic analysis and our understanding of the values involved in alternative social policies. This course focuses on a central economic institution: the market. How have the benefits and costs of using markets been understood? For example, it is often claimed that markets are good for welfare, but how is welfare to be understood? What is the connection between markets and different values such as equality and autonomy? What, if anything is wrong with markets in everything? Are there moral considerations that allow us to distinguish different markets? This course examines competing answers to these questions, drawing on historical and contemporary literature. Readings include Adam Smith, J.S. Mill, Karl Marx, Michael Walzer, Dan Hausman and Michael McPherson and Debra Satz among others. For graduate students only.

Same as: ETHICSOC 303R, PHIL 375

POLISCI 435R. Political Realism. 3-5 Units.
This seminar will explore various articulations of political realism in their historical contexts. Realism is generally taken to be a pragmatic approach to a political world marked by the competition for material interests and the struggle for power. Yet beyond a shared critique of idealism and an insistence on the priority and autonomy of the political, realists tend to have very different normative visions and political projects. We will consider the works of several political realists from the history of political and international relations thought, including: Thucydides, Machiavelli, Hobbes, Carr, Niebuhr, and Morgenthau.

Same as: PHIL 372R
POLISCI 43Q. Immigration Crisis? Policy Dilemmas in the US and Europe. 3 Units.
Immigration is a hotly contested social, economic, and political phenomenon in countries throughout the world. People migrate for many reasons, including the desire to start careers, reunite families, and escape oppression. While each story of migration is unique, migration in the modern world has certain commonalities, and these patterns often manifest as political conflict. Labor migration promises economic productivity and efficiency but may threaten existing labor protections and social welfare guarantees to natives. Facilitating migration from failed nation-states may protect the human rights of migrants but introduce security concerns. In the 21st century, the world has witnessed political violence by natives and migrants, both first and second generations, including the September 11th attacks, the London bombings, the mass killings in Norway, and the Paris attacks. How can policymakers harness the promises of immigration without succumbing to its pitfalls? Why do some countries respond so differently than others in similar circumstances? When does the meaning of citizenship evolve and when does it stay the same? What lessons do other countries have for the United States as it considers immigration reform? n n This course is designed to provide students with an overview of immigration law and politics in the United States and other countries, particularly in the European Union. Students will develop the necessary tools to critically analyze immigration policies, starting with the historical evolution of immigration policy in the United States. We will visit Angel Island and discuss the legacy of the Chinese Exclusion Act as well as contemporary immigration policies in San Francisco, a so-called sanctuary city, for undocumented immigrants. There will also be a screening on La Haine (Hate), an acclaimed French film which chronicles the challenges of immigrant integration. Students will study the economics of immigration and the politics of refugees in the context of post-9/11 security dilemmas. Students will design a concrete immigration policy proposal.

POLISCI 440A. Theories in Comparative Politics. 3-5 Units.
Required of Political Science Ph.D. students with comparative politics as first or second concentration; others by consent of instructor. Theories addressing major concerns in the comparative field including identity, order, regime type, legitimacy, and governance.

POLISCI 440B. Comparative Political Economy. 3-5 Units.
Required of Political Science Ph.D. students with comparative politics as a first or second concentration; others by consent of the instructor. The origins of political and economic institutions and their impact on long-run outcomes for growth and democracy. Emphasis is on the analysis of causal models, hypothesis testing, and the quality of evidence.

POLISCI 440C. Methods in Comparative Politics. 5 Units.
Required of Political Science Ph.D. students with comparative politics as a first or second concentration; others by consent of instructor. Current methodological standards in comparative politics. Students develop their own research design that meets these standards.

POLISCI 440D. Workshop in Comparative Politics. 1-2 Unit.
Faculty, guest speakers, and graduate students conducting research in comparative politics present work-in-progress. May be repeated for credit.

POLISCI 441L. Grad Seminar on Middle Eastern Politics. 3-5 Units.
Survey of major topics in the study of Middle Eastern politics including state formation, authoritarian resilience and political Islam.

POLISCI 443S. Political Economy of Reform in China. 3-5 Units.
Content, process, and problems of China’s post-Mao reforms. Changes in property rights, markets, credit, and the role of the state in economic development. Comparative insights about reform in the Chinese communist system that distinguishes it from the experience of regimes in E. Europe and the former Soviet Union.

POLISCI 443T. Approaches to Chinese Politics. 3-5 Units.
Major secondary literature on Chinese politics, involving the evolution of theoretical concepts and social scientific approaches characterizing the field. Subjects include changes made to defining fundamental issues of Chinese political theory, and the implications of shifts in research methods and analytical tools. Prerequisite: basic knowledge of politics of post-1949 China.

POLISCI 444. Comparative Political Economy: Advanced Industrial Societies. 3-5 Units.
Political economy approaches to key policy outcomes including redistribution, the size of government, fiscal behavior, and pork-barrel politics. Theories related to institutions, interest groups, and geography, focusing on middle- and upper-income countries.

POLISCI 446. Models and Empirical Methods in Political Economy. 5 Units.
This course surveys the use and empirical evaluation of formal models in political economy to explain policy outcomes, the determinants of political regimes, the sources of institutional persistence, and the causes and consequences of electoral rules. The course has two main goals. The first is to become better consumers and producers of formal work through the study of leading applications in political economy. The second is to introduce innovative approaches to research design and measurement for evaluating formal theories in political economy.

POLISCI 446A. Paths to the Modern World: Islam and the West. 3-5 Units.
How and why did Europe develop political institutions that encouraged economic growth and industrialization? And why has the Islamic world lagged in the creation of growth-promoting institutions? This course uses a comparative approach to understanding two routes to the modern world – the historical experiences of Christian Europe and the Islamic world. We will explore questions including, when do representative parliamentary assemblies emerge and how does urbanization affect economic development?.

POLISCI 446E. Seminar on Political Economy Experiments. 3-5 Units.
This seminar introduces recent experimental work in political economy and comparative politics. Instead of surveying research in this area broadly, we will work through a number of recent working papers. Each week we will have a guest speaker in the class whose work will be discussed by a team of students. The students will replicate, extend, and comment on the weekly paper. The first objective of the seminar is to develop an understanding of different elements of a field experiment. To this end, we will untangle project parts related to implementation, data collection, analysis, and writing. A typical weekly meeting will include the following: discussion on framing and contribution to literature, replication of the study material, and potential extensions of the analysis. We will also go through survey instruments and any other material made available by authors. A second objective is to introduce students to writing pre-analysis plans for their own research. Each student will be expected to prepare a detailed pre-analysis plan for a proposed experiment or quasi-experiment, and will have the opportunity to workshop this plan with the class towards the end of the quarter.

POLISCI 448R. Workshop: China Social Science. 1 Unit.
For Ph.D. students in the social sciences and history. Research on contemporary society and politics in the People’s Republic of China. May be repeated for credit. Prerequisite: consent of instructor.

POLISCI 450A. Political Methodology I: Regression. 3-5 Units.
Introduction to statistical research in political science, with a focus on linear regression. Teaches students how to apply multiple regression models as used in much of political science research. Also covers elements of probability and sampling theory.
POLISCI 450B. Political Methodology II: Causal Inference. 3-5 Units.
Survey of statistical methods for causal inference in political science research. Covers a variety of causal inference designs, including experiments, matching, regression, panel methods, difference-in-differences, synthetic control methods, instrumental variables, regression discontinuity designs, quantile regression, and bounds. Prerequisite: POLISCI 450A.

POLISCI 450C. Political Methodology III: Model-Based Inference. 3-5 Units.
Provides a survey of statistical tools for model-based inference in political science. Topics include generalized linear models for various data types and their extensions, such as discrete choice models, survival outcome models, mixed effects and multilevel models. Prerequisites: POLISCI 450A and POLISCI 450B.

POLISCI 450D. Political Methodology IV: Advanced Topics. 3-5 Units.
Covers advanced statistical tools that are useful for empirical research in political science. Possible topics include missing data, survey sampling and experimental designs for field research, machine learning, text mining, clustering, Bayesian methods, spatial statistics, and web scraping. Prerequisites: POLISCI 450A, POLISCI 450B and POLISCI 450C.

POLISCI 451. Design and Analysis of Experiments. 3-5 Units.
Political scientists increasingly rely on experimental methods. This course covers the principles and logic of experimental design as applied to laboratory, field and survey experiments. We discuss the strengths and limitations of experiments in relation to observational methods. Design considerations include randomization, the construction of treatments, the use of deception, the ethical implications of deception, and new developments in subject recruitment. Turning to the analysis of experimental data, we describe the methods for estimating treatment effects, interactions, and more complex indirect effects stemming from either mediator or moderator variables. We also cover appropriate data analytic strategies for quasi-experimental designs including interrupted time series, matching and propensity scores.

POLISCI 452. Machine Learning with Application to Text as Data. 3-5 Units.
Machine Learning methods are increasingly useful for the social sciences. This course introduces a framework for using machine learning methods to make social science inferences, with a particular focus on text as data. The course will explain how machine learning methods can be used to facilitate discovery, measure quantities of interest, and to make causal inferences and predictions. We will introduce a variety of methods for representing texts as quantitative data and then we will introduce a wide array of commonly used methods. Prerequisites are POLISCI 450A, 450B, and 450C.

POLISCI 45N. Civil War Narratives. 3 Units.
Preference to freshmen. Focus is on a new statistics-based theory to account for the susceptibility of countries to civil war. How to write a theory-based narrative. Students write and present an original historical narrative focusing on how well the theory explains a particular case of civil war onset. Why some people resist authoritarian rule while others do not and the implications for the body politic? Led by Rob Reich (Political Science, Common Sense Media), the course will bring together distinguished guests from across the world, both contemporary and historical. Using works of fiction in addition to historical and political science texts, we will consider why some people resist authoritarian rule while others do not and the conditions under which dictators are overthrown.

POLISCI 51K. Election 2016. 1 Unit.
The 2016 Presidential Election season has been anything but ordinary. So much in the Democratic and Republican primaries consistently defied conventional wisdom and upended the predictions of experts. This course will attempt, with the help of distinguished guests, to make sense of an election that defies all historical precedent and to take stock of the health of American democracy. Class is jointly offered for Continuing Studies students and Stanford students. As a 1 unit, online course for Stanford students, enrollment is unlimited. Registration for the course offers online access to a livestream of each class session, participation in online discussions, access to course website and materials, and admission to a lottery for attending each class in person.

POLISCI 57E. State of the Union 2014. 1 Unit.
This course will examine major themes that contribute to the health, or disease, of the US body politic. Challenges and opportunities abound: we live in an age of rising inequality, dazzling technological innovation, economic volatility, geopolitical uncertainty, and the accumulating impact of climate change. These conditions confront our political leaders and us as citizens of a democracy plagued by dysfunction. What are the implications for the body politic? Led by Rob Reich (Political Science, Stanford), David Kennedy (History, Stanford), and James Steyer (CEO, Common Sense Media), the course will bring together distinguished analysts of American politics. Together, we will examine the following topics: inequality; energy and the environment; media and technology; the economy; and the 2014 midterm elections. The course is designed for the entire Stanford community; jointly offered for undergraduate and graduate students at Stanford (through listings in Political Science and History) and for community members through the Continuing Studies Program. For students, the course is available for 1 credit. This course may not be taken for a Letter Grade.

POLISCI 70. Dangerous Ideas. 1 Unit.
Ideas matter. Concepts such as race, progress, and evil have inspired social movements, shaped political systems, and dramatically influenced the lives of individuals. Others, like religious tolerance, voting rights, and wilderness preservation play an important role in contemporary debates in the United States. All of these ideas are contested, and they have a real power to change lives, for better and for worse. In this one-unit class we will examine these dangerous ideas. Each week, a faculty member from a different department in the humanities and arts will explore a concept that has shaped human experience across time and space. Some weeks will have short reading assignments, but you are not required to purchase any materials.

POLISCI 71. Current Issues in European Security. 1 Unit.
Russia’s annexation of Crimea in Spring 2014 posed not only a threat to post-World War II Europe formed around the norm of national sovereignty, but possibly also the very real threat that Russia had awakened from its 20 years of peacefulness to once again impose its will on Eastern Europe. Is Europe again under threat from the East? In Current Issues in European Security, students will attend public events organized by Stanford’s Europe Center and Freeman Spogli Institute for International Studies. These events – talks by political leaders and scholars from the U.S. and Europe – will engage and encourage students to understand the deepening crises in Ukraine, conflict in the Baltics, and European security as a whole. Students will leave the course with a better understanding of the multi-faceted dilemma policy makers face, historical background, and possible paths forward for global decision makers. In addition to attending the events, students will write a final memo recommending a course of action for US policy makers. Events will typically be scheduled from 12 noon to 1:30 p.m. but may be held at other times. There will be approximately six events in spring quarter, and students may also be required to attend one or two separate discussion sessions.

POLISCI 72. What The 2018 Elections Told Us And How They Help Us See How Campaigns Can Win in 2020. 2 Units.
(Same as LAW 7057). The frequency of American elections means that we’re never that far away from the next contest. This course is situated shortly after the conclusion of the 2018 midterm elections at the very start of the invisible primary that precedes the 2020 presidential campaign. It will provide students with a behind-the-scenes understanding of how campaigns work. Each week, we will explore a different topic related to high-profile campaigns – policy formation, communications, grassroots strategy, digital outreach, campaign finance and feature prominent guest speakers who have served and will serve in senior roles on both Democratic and Republican campaigns. Our goal is to discern the lessons learned from the 2018 midterm elections, and how they will inform our understanding of what will happen in the 2020 presidential contest.
Same as: COMM 153A, COMM 253A, PUBLPOL 146, PUBLPOL 246

POLISCI 73. Energy Policy in California and the West. 1 Unit.
This seminar provides an in-depth analysis of the role of California state agencies and Western energy organizations in driving energy policy development, technology innovation, and market structures, in California, the West and internationally. The course covers three areas: 1) roles and responsibilities of key state agencies and Western energy organizations; 2) current and evolving energy and climate policies; and 3) development of the 21st century electricity system in California and the West. The seminar will also provide students a guideline of what to expect in professional working environment. Specific meeting dates for the course are as follows: April 21 10am-2pm/ May 12 10am-1pm/ June 2 10am-1pm.
Same as: CEE 263G, PUBLPOL 73

POLISCI 74. Presidential Politics: Race, Gender, and Inequality in the 2016 Election. 1 Unit.
From the 2016 nomination process to the election. The complexities of identity and its role in unifying and dividing the electorate. Panels covering the media, political participation, and group affiliation.
Same as: AFRICAAM 12, CSRE 12

POLISCI 75. The 2018 Midterm Election: Making Your Voice Heard. 2-3 Units.
Elections are critical to determining the direction of this country, but how do you get involved in ways beyond voting? How do campaigns work on a practical level? How can students make a difference in the upcoming midterm elections? This class offers an opportunity to gain knowledge of and firsthand experience in an American elections. Course credit is based on classroom time, reading time and time spent on volunteer work. Students in this course will be required to participate in some way in the upcoming US Midterm election. This could mean undertaking one or more activities such as training for and serving as a poll worker, working for groups that are registering voters, or volunteering for a campaign. Students are responsible for finding their election-related opportunity, but they may contact Stephanie Burbank about options and contact information. Once you determine what activity you will be volunteering for, please fill out this form: http://web.stanford.edu/~sburbank/PS75.fb. If you have any questions, please reach out to the instructor.

POLISCI 801. TGR Project. 0 Units.

POLISCI 802. TGR Dissertation. 0 Units.

POLISCI 96X. Mobilizing Democracy: Campaigns, Elections, and Voting. 1 Unit.
Alternative Spring Break: America is often thought of as the archetypal democracy. While most democracies have surprisingly short lifespans, America has persisted for 238 years. However, in the 21st century, we have grounds to question the quality of our democracy. Turnout of the Voting Age Population hovers around 50 percent and today, we are seeing increasing legal challenges to voting rights. In the backdrop of these statistics, there is an entire industry devoted to campaigns. In the 2012 presidential race alone, almost $2.5 billion was poured into the campaign-industrial complex. Given that this cycle is a presidential election year, those amounts are expected to be surpassed. As a consequence, many questions arise: How do politicians engage voters in elections at the various levels of government? Where do they spend their money and why? In the age of big data, how accurately can elections be predicted? How do we maximize participation in elections?

POLISCI 97X. Bridging the Civil-Military Divide: Military Service as Public Service in the 21st Century. 1 Unit.
Alternative Spring Break: Today, fewer than 0.5 percent of Americans serve in the military, as compared to roughly 12 percent during the second World War. This has led to a widening gap in knowledge about the military, its members and the functions they perform, as well as its basic structure and tradition of service. This course is intended to introduce students to the notion of military service as public service and explore how misperceptions on both sides affect the civil-military divide. We will explore military service from the life of an enlisted soldier deployed to Afghanistan, to an officer working at the Pentagon on broad national security strategy. How does society conceive of a soldier, a sailor, an airman, a marine? How do Americans perceive military service and what role do service members play in our society?

POLISCI 99Z. Introduction to the Science of Politics. 4 Units.
Why do countries go to war? Why are some countries democratic and others autocratic? How can we improve political representation in the United States and other countries? We will use scientific methods to answer these and other fundamental questions about politics.
