Linguistics

Courses offered by the Department of Linguistics are listed under the subject code LINGUIST on the Stanford Bulletin’s ExploreCourses web site.

Linguistics is the study of language as a fundamental human activity. Linguists consider language as a cultural, social, and psychological phenomenon and seek to determine what is universal to all languages and what is specific to individual languages, how language varies across individuals and communities, how it is acquired, how it changes, and how it is processed by humans and machines. Linguistics is an inherently interdisciplinary field that links the humanities, the social sciences, and the other cognitive sciences, as well as computer science, education, and hearing and speech sciences.

The department offers courses at the undergraduate and graduate levels. Some focus on analyzing structural patterns of sounds (phonetics and phonology), meanings (semantics and pragmatics), words (morphology), sentences (syntax). Others examine how these structures vary over time (historical linguistics), or over individuals and social groups (sociolinguistics), or how language is processed and learned by humans (psycholinguistics and language acquisition) or by computers (computational linguistics).

A variety of open forums provide for the discussion of linguistic issues, including colloquia and regularly scheduled workshops in computational linguistics, phonetics and phonology, psycholinguistics, semantics and pragmatics, sociolinguistics, and syntax and morphology.

Mission of the Undergraduate Program in Linguistics

The mission of the undergraduate program in Linguistics is to provide students with basic knowledge in the principal areas of linguistics (phonetics, phonology, morphology, syntax, semantics, pragmatics, historical linguistics, sociolinguistics, psycholinguistics, and computational linguistics) and the skills to do more advanced work in these subfields. Courses in the major also involve interdisciplinary work with connections to other programs including anthropology, communication, computer science, education, foreign languages, psychology, and symbolic systems. The program provides students with excellent preparation for further study in graduate or professional schools as well as careers in business, government agencies, social services, and teaching.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department’s undergraduate program. By the end of the program, students are expected to be able to:

1. formulate theoretically interesting and tractable research questions;
2. find and collect information relevant to answering their research questions;
3. bring linguistic theory to bear in analyzing and evaluating information;
4. articulate the questions and outcomes of the process described in 1-3; and
5. engage with peers in an intellectual community around linguistic issues.

Graduate Programs in Linguistics

The department offers an M.A., Ph.D., and Ph.D. minor in Linguistics. For admissions information, please see the Department of Linguistics admissions page (https://linguistics.stanford.edu/degree-programs/graduate-admissions). The GRE is not required.

Learning Outcomes (Graduate)

The purpose of the master’s program is to develop students’ knowledge and skills in Linguistics and to prepare them for a professional career or doctoral studies. This is achieved through completion of courses, including course work in an area of specialization within the field, and experience with independent research.

The Ph.D. is conferred upon candidates who have demonstrated the ability to conduct substantive, independent research in Linguistics. Through completion of advanced coursework and rigorous methodological and analytical training, the doctoral program prepares students to make original contributions to knowledge in linguistics, to articulate the results of their work, and to demonstrate its significance to linguistics and related fields.

Cognitive Science

Linguistics is participating with the departments of Philosophy and Psychology in an interdisciplinary program in Cognitive Science for doctoral students. The program is intended to provide an interdisciplinary education as well as a deeper concentration in linguistics. Students who complete the Linguistics and Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Linguistics.

To receive this designation, students must complete 30 units of approved course work. The 30 units cannot include courses counted elsewhere towards the Ph.D. Courses may be drawn from the participating departments, as well as from other departments, as long as their content is appropriate to the designation. At least 18 of the 30 units must be from outside the student’s major department and must include course work in at least two other departments. The majority of the courses taken towards the 30 units of coursework must be taken for a letter grade and should be completed with at least a ‘B’. Special topic seminars are excluded in favor of more foundational courses.

Linguistics Course Catalog Numbering System

Courses numbered under 100 are designed primarily for pre-majors. Courses with 100-level numbers are designed for undergraduate majors and minors; a limited number of 100-level units may apply to a master’s or Ph.D. minor. Those with numbers 200 and above are primarily for graduate students, but with consent of the instructor some of them may be taken for credit by qualified undergraduates. At all levels, the final two digits of the course number indicate a special area, as follows:

<table>
<thead>
<tr>
<th>Number</th>
<th>Special Area</th>
</tr>
</thead>
<tbody>

Stanford Bulletin 2018-19
Bachelor of Arts in Linguistics

The undergraduate major stresses the study of language both as a fundamental human faculty and as a changing social institution. At the core of the program is a set of departmental courses on the nature of human language; the major also draws on courses offered by other departments and programs.

The Linguistics major cuts across the humanities and the social and physical sciences. It provides a solid general education as a background for advanced studies in such disciplines as anthropology, cognitive science, communication, computer science, education (language, literacy, and culture), hearing and speech sciences, languages, law, linguistics, philosophy, and psychology.

Degree Requirements

Requirements for the B.A. include at least 55 units of course work; at least 28 of these units must be in Linguistics. The remaining units may be in Linguistics or in related fields, and should form a coherent program of study. Majors should discuss this course work with faculty and get specific approval from the Linguistics undergraduate adviser for courses outside the department.

Of the 55 units required for the major, no more than 12 units may be below the 100-level and no more than two courses may be taken on a credit/no credit basis (CR/NC). All required courses must be taken for a letter grade of ‘C-’ or better.

Required Courses:

Gateway Course

LINGUIST 196 Introduction to Research for Undergraduates (to be taken Autumn Quarter, junior year)

Units

Capstone Course

LINGUIST 197A Undergraduate Research Seminar (to be taken Winter Quarter, senior year)

Units

Core Courses

Select at least one course each from two of the following three areas:

- **Phonetics and Phonology**
  - LINGUIST 105 Phonetics
  - or LINGUIST 205A Phonetics
  - LINGUIST 110 Introduction to Phonology

- **Morphology and Syntax**
  - LINGUIST 121A The Syntax of English
  - LINGUIST 121B Crosslinguistic Syntax

- **Semantics and Pragmatics**
  - LINGUIST 130A Introduction to Semantics and Pragmatics
  - or LINGUIST 230A Introduction to Semantics and Pragmatics
  - LINGUIST 130B Introduction to Lexical Semantics
  - LINGUIST 230B Semantics and Pragmatics I
  - LINGUIST 232A Lexical Semantics

Breadth Courses

Select at least one course each from two of the following four areas:

- **Historical Linguistics and Language Change**
  - LINGUIST 160 Introduction to Language Change
  - LINGUIST 260A Historical Morphology and Phonology
  - LINGUIST 260B Historical Morphosyntax

- **Sociolinguistics**
  - LINGUIST 150 Language and Society
  - LINGUIST 156 Language and Gender
  - LINGUIST 157 Sociophonetics
  - or LINGUIST 257 Sociophonetics
  - LINGUIST 250 Sociolinguistic Theory and Analysis

- **Psycholinguistics**
  - LINGUIST 35 Minds and Machines
  - LINGUIST 140 Learning to Speak: An Introduction to Child Language Acquisition
  - LINGUIST 145 Introduction to Psycholinguistics

- **Computational Linguistics**
  - LINGUIST 180 From Languages to Information
  - or LINGUIST 280 From Languages to Information
  - LINGUIST 188 Natural Language Understanding
  - or LINGUIST 288 Natural Language Understanding
  - LINGUIST 278 Programming for Linguists
  - LINGUIST 284 Natural Language Processing with Deep Learning

Depth Courses

Select at least two 200-level Linguistics courses, taken for 4 units each (for a total of at least 8 units). See ExploreCourses for current options.

Language Requirement

Linguistics majors must have competence in at least one language other than English as part of their understanding of the field of linguistics and its study. This requirement is fulfilled by completion of six quarters of language coursework at Stanford or by certification of equivalent proficiency through the Language Center (https://web.stanford.edu/dept/lc/language) or the relevant department (see University requirements). Majors may petition to be exempted from the language requirement if they have grown up speaking a language other than English and can use it for everyday purposes and for linguistic analysis.

Honors Program

Students who wish to undertake a more intensive program of study, including independent research, should pursue departmental honors. Students should apply for honors by the end of Spring Quarter of their junior year. As part of the application, the student must write a research proposal describing the honors project, which must be approved by the project adviser. Approval for honors is given only to students who have maintained a grade point average (GPA) of 3.3 (B+) or better in the courses required for the major.

Honors students complete a total of 65 units including the 55 units for the major, plus 10 additional units of Independent Study and Honors Research. In addition, they must complete an honors thesis based on research conducted with a project adviser, who must be a member of the Linguistics faculty, and a secondary faculty reader, who may, with the approval of the Linguistics Undergraduate Adviser, be a member of another department. In the Autumn Quarter of the senior year, honors students enroll in LINGUIST 199 Independent Study, to work closely
with one of their advisers on the research project. In Winter and Spring quarters, honors students enroll in LINGUIST 198 Honors Research, with the student's project adviser for close supervision of the honors thesis. The thesis must be submitted in final, acceptable, form by May 15. The thesis topic is presented orally at a department Honors Colloquium late in Spring Quarter.

**Joint Major Program in Linguistics and Computer Science**

The joint major program (JMP) was discontinued at the end of the academic year 2018-19. Students may no longer declare this program. All students with declared joint majors are permitted to complete their degree; faculty and departments are committed to providing the necessary advising support.

See the "Joint Major Program (http://exploredegrees.stanford.edu/undergraduatedegreesandprograms/#jointmajortext)" section of this bulletin for a description of University requirements for the JMP. See also the Undergraduate Advising and Research JMP (https://majors.stanford.edu/more-ways-explore/joint-majors-csx) web site and its associated FAQs.

Students completing the JMP receive a B.A.S. (Bachelor of Arts and Science).

**Linguistics Major Requirements in the Joint Major Program**

See the "Computer Science Joint Major Program (http://exploredegrees.stanford.edu/schoolofengineering/computerscience/#jointmajorprogramtext)" section of this bulletin for details on Computer Science requirements.

All majors must take at least 50 units of course work in Linguistics and related fields, with no more than 12 units below the 100 level and at least 8 units above the 200 level. No more than two courses may be taken on a credit/no credit basis (CR/NC). All required courses must be taken for a letter grade of C- or better.

Students in the joint major must take LINGUIST 180/CS 124 as one of these breadth courses. Students may count LINGUIST 180/CS 124 towards both major requirements as long as the units are not double-counted. If LINGUIST 180/CS 124 is required for both Linguistics and a student's specific CS track, Linguistics works with the student to identify another course (possibly independent study for 3-4 units) that would benefit the academic plan. (In this scenario, LINGUIST 180/CS 124 fulfills major requirements in both Linguistics and CS, but the units are only counted towards CS; additional units of work would be identified in Linguistics to meet the unit requirements.)

Within the 50-unit total, students in the joint major are encouraged to sign up for independent study units as part of completing the integrative capstone project. The expectation is that this project is supervised by a Linguistics faculty member. The specific number of units varies and is decided by the student and faculty adviser.

Different from Linguistics majors, CS + Linguistics joint majors are not required to display competence in a language other than English and therefore are not required to complete the equivalent of six quarters of language study.

**Required Courses for the Joint Major:**

**Gateway Course**

LINGUIST 196 Introduction to Research for Undergraduates (to be taken Autumn Quarter, junior year)

**Capstone Course**

LINGUIST 197A Undergraduate Research Seminar (to be taken Winter Quarter, senior year)

**Core Courses**

Select at least one course each from two of the following three areas:

**Phonetics and Phonology**

LINGUIST 105 or LINGUIST 205A Phonetics

LINGUIST 110 Introduction to Phonology

**Morphology and Syntax**

LINGUIST 120 Introduction to Syntax

LINGUIST 121A The Syntax of English

LINGUIST 121B Crosslinguistic Syntax

LINGUIST 222A Foundations of Syntactic Theory I

**Semantics and Pragmatics**

LINGUIST 130A or LINGUIST 230A Introduction to Semantics and Pragmatics

LINGUIST 130B Introduction to Lexical Semantics

LINGUIST 230B Semantics and Pragmatics I

LINGUIST 232A Lexical Semantics

**Breadth Courses**

Select Linguist 180/280 plus at least one additional breadth course:

LINGUIST 180 or LINGUIST 280 From Languages to Information

**Historical Linguistics and Language Change**

LINGUIST 160 Introduction to Language Change

LINGUIST 260A Historical Morphology and Phonology

LINGUIST 260B Historical Morphosyntax

**Sociolinguistics**

LINGUIST 150 Language and Society

LINGUIST 156 Language and Gender

LINGUIST 157 or LINGUIST 257 Sociophonetics

LINGUIST 250 Sociolinguistic Theory and Analysis

**Psycholinguistics**

LINGUIST 35 Minds and Machines

LINGUIST 140 Learning to Speak: An Introduction to Child Language Acquisition

LINGUIST 145 Introduction to Psycholinguistics

**Depth Courses**

Select at least two 200-level Linguistics courses, taken for 4 units each (for a total of at least 8 units). See ExploreCourses for current options.
Dropping a Joint Major Program

To drop the joint major, students must submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program (https://stanford.box.com/change-UG-program). Students may also consult the Student Services Center (http://studentservicescenter.stanford.edu) with questions concerning dropping the joint major.

Transcript and Diploma

Students completing a joint major graduate with a B.A.S. degree. The two majors are identified on one diploma separated by a hyphen. There will be a notation indicating that the student has completed a “Joint Major.” The two majors are identified on the transcript with a notation indicating that the student has completed a “Joint Major.”

Minor in Linguistics

Requirements for the minor include at least 28 units of course work in Linguistics and related fields, approved in advance by the Linguistics undergraduate adviser. All courses must be taken for at least 3 units. No more than two courses may be taken on a credit/no credit basis (CR/NC). All required courses must be taken for letter grade of ‘C’- or better. The courses counting towards the minor must be units beyond those needed to satisfy the student’s major course of study.

Required Courses for the Minor:

or, in advance consultation with the Linguistics Undergraduate Adviser, a course in historical linguistics or the history of a language.

Remaining courses are to be determined in advance consultation with the Linguistics undergraduate adviser. Students are encouraged to take at least one 200-level Linguistics course. Students may also choose to do independent work with a faculty member of their choice.

Master of Arts in Linguistics

The University’s basic requirements for the master’s degree are discussed in the "Graduate Degrees (http://exploredegrees.stanford.edu/graduatedegrees)" section of this bulletin. The following are additional departmental requirements.

1. Courses—Individual programs should be worked out in advance with an adviser in Linguistics keeping the following requirements and guidelines in mind. The master’s degree requires the completion of 45 units; at least 36 of these must be in Linguistics. The course work must include one introductory graduate-level course in each of the areas of syntax, semantics, and sound structure, as well as four courses in the student’s area of specialization. If the student can make a compelling case, the department may allow up to 9 of the 45 units to be in a department other than Linguistics. Courses from outside the department must have clear linguistic content or contribute methodological knowledge that facilitates the thesis project; furthermore, if the student is simultaneously enrolled in a degree program in another department, not all of these 9 units can be earned in that department. No more than two courses should be at the 100 level. The majority of the courses taken towards the 45 units of degree program course work must be taken for a letter grade; these should include the three required introductory courses and the four courses constituting the specialization, which should all be completed with at least a ‘B’. The overall course work grade point average (GPA) must be at least 3.0 (B).

2. Thesis or Thesis Project—A research paper supervised by a committee of three faculty (normally fulfilled by up to 6 units of LINGUIST 398 Directed Research).

Coterminal Master's Degree Program in Linguistics

The Department of Linguistics admits a limited number of undergraduates to the coterminal degree program. Students are required to submit to the department a complete application, which includes a statement of purpose identifying a thesis topic, a Stanford transcript, three letters of recommendation (at least one of which must be from a faculty member in Linguistics), and a proposed course of study (worked out in advance with a Linguistics adviser). Applicants for the coterminal degree may apply as early as their eighth quarter and no later than early in the eleventh quarter of undergraduate study. Decisions on admission to the coterminal degree program rest with the Graduate Admissions Committee of the Department of Linguistics.

University Coterminal Requirements

Coterminal master’s degree candidates are expected to complete all master’s degree requirements as described in this bulletin. University requirements for the coterminal master’s degree are described in the “Coterminal Master’s Program (http://exploredegrees.stanford.edu/cotermdegrees)” section. University requirements for the master’s degree are described in the “Graduate Degrees (http://exploredegrees.stanford.edu/graduatedegrees/#masterstext)” section of this bulletin.

After accepting admission to this coterminal master’s degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master’s degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master’s program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master’s degree requirements.

Course transfers are not possible after the bachelor’s degree has been conferred.

The University requires that the graduate adviser be assigned in the student’s first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master’s Degree Program Proposal be completed by the student and approved by the department by the end of the student’s first graduate quarter.

Doctor of Philosophy in Linguistics

The following requirements are in addition to the basic University requirements for the degree sought; see the “Graduate Degrees (http://exploredegrees.stanford.edu/graduatedegrees)” section of this bulletin. Students should review the department’s Department of Linguistics Ph.D.
Handbook (https://linguistics.stanford.edu/department-resources) for further particulars concerning these requirements.

1. **Courses**—a minimum of 135 units of graduate work beyond the bachelor’s degree, or 90 units beyond the master’s degree. The core course requirements detailed in the Department of Linguistics Ph.D. Handbook guarantee that each student covers a sufficient set of subareas within the field. Students must maintain a satisfactory record in the number and distribution of units completed. The overall course work GPA must be at least 3.0 (B), and all core courses should be completed with at least a ‘B’.

2. **Language**—each student must demonstrate an explicit in-depth knowledge of the structure of at least one language other than English, by writing a research paper on that language.

3. **Research**—each student is expected to complete two substantial qualifying papers. The deadline for completion of the first qualifying paper is the end of Autumn Quarter of the second year; the deadline for completion of the second qualifying paper is the end of Autumn Quarter of the third year. The subject matter of the two papers, although it may be related (for example, same language), must be clearly distinct. The requirement is fulfilled by one quarter of LINGUIST 395 Research Workshop (1-2 units), and by oral discussion of each paper with a committee of at least three faculty members selected by the faculty with input from the student.

4. **Candidacy**—each student must apply for candidacy for the Ph.D. by the end of the sixth academic year quarter, normally the Spring Quarter of the second year. Departmental prerequisites for candidacy include: (i) completion of a prescribed portion of the core course requirement (see item 1 above), (ii) completion of one qualifying paper (see item 3 above), and (iii) having an approved plan for completing the language requirement (see item 2 above). At the end of the academic year, the department faculty reviews each applicant and votes on whether to admit that student to candidacy. A student is only admitted to candidacy if, in addition to the student’s fulfilling the department prerequisites, the faculty makes the judgment that the student has the ability to complete the remaining stages of the Ph.D. program at a level of superior quality. Students who are not admitted to candidacy are terminated from the program; at the department’s discretion, they may be allowed to complete any requirements that remain for the master’s degree and receive this degree.

5. **Teaching**—at least three quarters serving as a teaching assistant in Linguistics courses.

6. **Dissertation**—
   a. appointment of a dissertation committee.
   b. an approved written dissertation proposal is required by the end of Autumn Quarter of the fourth year.
   c. oral discussion of the dissertation proposal with an augmented dissertation committee by the end of Spring Quarter of the fourth year.
   d. passing a University oral examination on the dissertation and related areas which includes a public presentation of the dissertation research.
   e. dissertation (up to 15 units of LINGUIST 399 Dissertation Research).

**Ph.D. Minor in Linguistics**

1. **Courses**—the student must complete 30 units of course work in Linguistics. The University requires that at least 20 of these units be at the 200 level or above; the remaining 10 units must be at the 100 level or above. The coursework for the minor must include one introductory course in each of sound structure, syntax, and semantics/pragmatics; this requirement is typically fulfilled by LINGUIST 105 Phonetics or LINGUIST 110 Introduction to Phonology, LINGUIST 121A The Syntax of English or LINGUIST 121B Crosslinguistic Syntax, LINGUIST 130A Introduction to Semantics and Pragmatics or LINGUIST 130B Introduction to Lexical Semantics or by 200-level introductory courses in the same areas. Courses submitted for the minor must be incremental units beyond those used to satisfy the major. Individual programs should be worked out in advance with the student’s Ph.D. minor adviser in Linguistics. The majority of the courses taken towards the 30 units of coursework must be taken for a letter grade; these should include the three required introductory courses, which should all be completed with at least a ‘B’. The overall course work grade point average (GPA) must be at least 3.0 (B).

2. **Research Project (optional)**—the student may elect to present a paper which integrates the subject matter of linguistics into the student’s field of specialization.

3. The Linguistics minor adviser or designee serves on the student’s University oral examination committee and may request that up to one-third of the examination be devoted to the minor subject.

**Graduate Advising Expectations**

The department is committed to providing academic advising in support of each graduate student’s scholarly and professional development. The advising relationship should entail collaborative engagement by both the adviser and the advisee. Faculty advisers guide students in key areas such as selecting courses, designing and conducting research, navigating degree requirements, exploring academic and professional opportunities, and preparing for their post-Ph.D. careers. Graduate students are active contributors to the advising relationship, proactively seeking academic and professional guidance and taking responsibility for informing themselves of policies and degree requirements for the Ph.D. program. An important part of the advisee-adviser relationship is that students learn to advocate for themselves; this includes discussing expectations for the adviser/advisee relationship with the adviser and revisiting these expectations periodically to ensure mutual understanding.

**Advisors and Advising Meetings**

A department faculty member serves as the Graduate Studies Advisor (GSA). Typically, the GSA keeps track of the general degree progress of all M.A. and Ph.D. students, offers advice on meeting department and University milestones, coordinates departmental advising and TA assignments, and approves special petitions.

**Ph.D. Students**

Each student has an individual adviser (also referred to as a second adviser in the pre-dissertation stage), usually chosen based on shared research interests, who advises on coursework, training in research methodologies, research projects, and professional development. Entering students are assigned a second adviser for their first two quarters in the program. The second adviser helps first year students make the transition to graduate school and take the initial steps towards their long-term goals. Beginning with Spring Quarter of the first year, the student’s current Qualifying Paper Committee Chair serves as the second adviser. On completion of these papers, the student chooses a faculty member as Chair of their dissertation Reading Committee; this faculty member becomes the main adviser. Throughout their graduate career, students are also encouraged to consult with other faculty, including the members of their Qualifying Paper and Reading Committees.

In order to meet the department’s advising expectations, twice a year each student and their adviser meet for a holistic, structured discussion of the student’s recent progress, short-term plans, and longer-term academic and professional goals and to discuss the steps that the student should take to meet these objectives. The GSA usually joins the discussion with students in the earlier stages of the Ph.D. program. Students who receive department Summer funding are also expected to fill out a Summer Commitments Agreement that lays out their activities, priorities and goals for the summer, and to discuss these with their adviser.
Students are expected to meet regularly with their advisers and to keep them informed about their academic progress. Each student and their adviser should mutually agree on the frequency of these meetings when the advising relation begins and reassess their frequency at the start of every quarter.

**M.A. Students**

At the start of graduate study, each student is assigned a faculty member as an M.A. program adviser, chosen based on shared research interests and the student's proposed M.A. thesis area. Usually this faculty member serves in this role for the duration of the M.A. program. Besides advising the student on the M.A. thesis, the adviser provides guidance on the student's overall path through the M.A. program. Students are expected to meet with their advisers at least once each quarter and to keep them informed about their academic progress. The precise meeting frequency should be mutually agreed upon and reassessed quarterly; it depends on the student's stage in the program.

**Additional resources**

The Department of Linguistics Ph.D. Handbook (https://stanford.app.box.com/file/319430327308) provides additional information. Students are also encouraged to familiarize themselves with the Policies and Best Practices for Advising Relationships at Stanford. Additional resources on advising are offered by VPGE. For a statement of University policy on graduate advising, see the "Graduate Advising" (https://exploredegrees.stanford.edu/graduatedegrees/#advisingandcredentialtext) section of the Bulletin.

**Faculty**

**Emeriti:** (Professors) Joan Bresnan, Eve V. Clark, Shirley Brice Heath, Martin Kay, William R. Leben, Stanley Peters, John R. Rickford, Elizabeth C. Traugott, Thomas A. Wasow

**Chair:** Daniel Jurafsky

**Director of Graduate Studies/Graduate Studies Adviser:** Vera Gribanova

**Director of Undergraduate Studies:** Robert Podesva

**Professors:** Cleo Condoravdi, Penelope Eckert, Daniel Jurafsky, Paul Kiparsky, Beth Levin (on leave Spring, 2020), Christopher Manning, Christopher Potts

**Associate Professors:** Arto Anttila, Vera Gribanova, Robert Podesva, Meghan Sumner

**Assistant Professors:** Judith Degen, Boris Harizanov, Daniel Lassiter

**Coursey Professors:** Kenji Hakuta, Yoshiko Matsumoto, James McClelland, Chao Fen Sun

**Coursey Associate Professors:** James A. Fox, Michael C. Frank, Noah Goodman, Miyako Inoue

**Coursey Assistant Professor:** Jonathan Rosa

**Lecturers:** Philip L. Hubbard (Senior Lecturer, Language Center)

**Adjunct Professors:** Jared Bernstein, Ronald Kaplan, Lauri Karttunen, Paul Kay, Annie Zaenen, Arnold Zwicky
