COMPARATIVE MEDICINE

Courses offered by the Department of Comparative Medicine are listed under the subject code COMPMED on the Stanford Bulletin’s ExploreCourses web site.

The Department of Comparative Medicine at Stanford is an academic, basic science department, the department is comprised of thirteen faculty, ten of whom are veterinarians. All faculty members are immersed in laboratory animal science and translational research. They teach at the undergraduate, graduate, professional, and postgraduate levels. The department’s clinical and basic science faculty, ten of whom are veterinarians, and accept student candidates for participation in research projects. The Department of Comparative Medicine was established at Stanford in 1990.

The department’s faculty is also engaged in collaborative and comparative research, with animal model expertise and programs in veterinary pathology, pain and anesthesia, rodent reproductive biology, infectious disease, cancer, bioengineering, animal welfare, and neuroscience. In addition, the veterinary faculty in the Department of Comparative Medicine has oversight responsibility for the campus-wide animal research program and provides clinical service in the Veterinary Service Center (VSC). The mission of the department is to advance human and animal health through outstanding research, veterinary care and training.

To learn more about the Veterinary Service Center Core and services provided, see the Veterinary Service Center (VSC) (http://med.stanford.edu/vsc.html) web site.

To learn more about Animal Research at Stanford, see the Animal Research at Stanford (http://med.stanford.edu/animalresearch.html) web site.

COVID-19-Related Degree Requirement Changes

For information on how Comparative Medicine degree requirements have been affected by the pandemic, see the "COVID-19 Policies tab (p. 2)" in this section of this bulletin. For University-wide policy changes related to the pandemic, see the "COVID-19 and Academic Continuity (http://exploredegrees.stanford.edu/covid-19-policy-changes)" section of this bulletin.

Master of Science in Laboratory Animal Science

The Master of Science (M.S.) in Laboratory Animal Science degree program may also be taken by Stanford undergraduates as a coterminal master’s degree program.

University requirements for the M.S. degree are described in the "Graduate Degrees (http://exploredegrees.stanford.edu/graduatedegrees/#masterstext)" section of this bulletin.

Degree Requirements

1. At least 4 units of academic work, all of which must be in courses at or above the 100 level. 36 of the 45 units must be at or above the 200 level.

2. Students must complete a master’s thesis, which may take the following form:
   a. Original analysis of original data
   b. A comprehensive literature review with a meta-analysis of data or a critical reanalysis of data
   c. Evaluation of a methodological problem using real data
   d. A comprehensive literature review with a grant proposal (NIH style format) for a new study to bridge a gap in the existing knowledge.

3. Per University policy (http://exploredegrees.stanford.edu/graduatedegrees/#masterstext), the master’s degree must be completed within three years.

Required Courses

Students are required to enroll in the following courses.

Autumn Quarter

<table>
<thead>
<tr>
<th>Course Code</th>

Stanford Bulletin 2019-20
How to Apply

External applicants and current Stanford graduate students

Review the information and instructions on the University Graduate Admissions web site (https://gradadmissions.stanford.edu). Submit your application online. The link to the online application is on the University Graduate Admissions web site (https://gradadmissions.stanford.edu/applying).

Admissions Deadline: Applications and admission decisions are reviewed on a rolling deadline. For more information, contact the department <compmed-mlas-info@stanford.edu>, (650) 724-7880.

Items which must be included in the online application:

- Completed School of Medicine Graduate Student Online Application Form (https://stanfordmedicine.qualtrics.com/SE/?SID=SV_eIlAYRZnPqkPGJ)
- Resume or CV
- Transcript (unofficial transcripts are acceptable)
- GRE is not required
- Statement of Purpose (1-2 pages, 1 inch margins, 12 point font, single-spaced)
  - The statement of purpose should describe succinctly the reasons for applying to the proposed program at Stanford, preparation for this field of study, research interests, future career plans, and other aspects of the student's background and interests which may aid the admissions committee in evaluating aptitude and motivation for graduate study.
- Two letters of recommendation; at least one of the two reference letters should come from a science-related faculty member or professor.
- $125 application fee is assessed by the Registrar at the time of the submission of the application.

Coterminal Applicants

The coterminal degree program allows current Stanford University undergraduates to study for a master's degree while completing their bachelor's degree(s) in the same or a different department. See the "Coterminal Degrees (http://exploredegrees.stanford.edu/cotermdegrees)" section of this bulletin for additional information.

- Review the eligibility requirements, deadlines, and fees.
- Complete the online Coterm Application at the University Graduate Admissions web site (https://gradadmissions.stanford.edu/applying).
- Submit your completed supplemental application package to the department <compmed-mlas-info@stanford.edu>, (650) 724-7880.

University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (http://exploredegrees.stanford.edu/cotermdegrees)" section. University requirements for the master's degree are described in the "Graduate Degrees (http://exploredegrees.stanford.edu/graduatedegrees/#masterstext)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first quarter graduate career even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

COVID-19 Policy Changes to Degree Requirements

On this page: Winter Quarter (p. 2) • Spring Quarter (p. 2) • Doctoral Programs (p. 5) (if applicable)

For a complete overview of academic policy changes related to the COVID-19 pandemic, see the "COVID-19 and Academic Continuity (http://exploredegrees.stanford.edu/covid-19-policy-changes)" section of this bulletin.

In response to the COVID-19 pandemic in 2020, Stanford University made a number of emergency changes to policies and procedures that impacted Winter and Spring quarters 2019-20. Those changes, as they relate to degree programs, are compiled on this page. These changes reflect the disruption that students and instructors experienced when the University transitioned to online learning on March 9, 2020, in addition to the disruption to the Stanford community caused by the pandemic itself.

Winter Quarter 2019-20

- University-wide Winter Quarter Academic Changes (http://exploredegrees.stanford.edu/covid-19-policy-changes/#winterquarteracademicchangestext)

The Committee on Undergraduate Standards and Policy (C-USP) and the Committee on Graduate Studies (C-GS) approved an exception for Winter Quarter 2019-20 to permit students to request late class withdrawals and/or changes to class grading basis to CR/NC (for those classes that had CR/NC as an option).

Graduate Degree Requirements

Grading Requirements

The Department of Comparative Medicine did not make any changes to graduate degree grade requirements for classes taken in Winter Quarter 2019-20.

Other Requirements

If a student has difficulty completing a graduate degree requirement due to the COVID-19 pandemic, (e.g., a study abroad requirement, a laboratory research requirement), the student should consult with the Student Services Officer to identify academic options to fulfill degree requirements.

return to top of page (p. 2)

Spring Quarter 2019-20

- University-wide Spring Quarter Academic Changes (http://exploredegrees.stanford.edu/covid-19-policy-changes/#winterquarteracademicchangestext)
The Faculty Senate approved a policy requiring that all undergraduate and graduate classes in Spring Quarter 2019-20 be offered only on the ‘S/NC’ (Satisfactory/No Credit) grading basis.

**Graduate Degree Requirements**

**Grading Requirements**
The Department of Comparative Medicine did not make any changes to graduate degree grade requirements for classes taken in Spring Quarter 2019-20.

**Other Requirements**
If a student has difficulty completing a graduate degree requirement due to the COVID-19 pandemic, (e.g., a study abroad requirement, a laboratory research requirement), the student should consult with the Student Services Officer to identify academic options to fulfill degree requirements.

**Graduate Advising Expectations**
The Department of Comparative Medicine (DCM) is committed to providing academic advising in support of graduate student scholarly and professional development. When most effective, this advising relationship entails collaborative and sustained engagement by both the advisor and the advisee.

Graduate students are expected to have selected a faculty mentor by their second quarter in the program.

Faculty mentors are expected to meet with graduate students at least once a quarter to discuss and to assist with development of the student’s Individual Development Plans (https://drive.google.com/open?id=1Xq4wWhbKRGmg25QWulbBk7wXr0NNx1). Additionally, the department encourages advisors and students to meet on a regular basis throughout the year to discuss the student’s professional development in key areas such as selecting courses, designing and conducting research, and exploring academic opportunities and professional pathways.

Graduate students are active contributors to the advising relationship. They should proactively seek academic and professional guidance and take responsibility for informing themselves of policies and degree requirements for the M.S. in Laboratory Animal Science (MLAS) program. All new MLAS students are expected to enroll in and to participate in the department’s formal professional development and mentoring course, COMPMED 290, offered quarterly.

As a best practice, advising expectations should be periodically discussed and reviewed to ensure mutual understanding. Both the advisor and the advisee are expected to maintain professionalism and integrity.

Academic progress and student completion of program requirements and milestones are monitored by the program director and staff, and are reviewed during the Masters of Laboratory Animal Science Faculty Advisory Committee each quarter. A detailed description of the program’s requirements, milestones, and advising expectations (for students and for their advisors) can be found on the program web site (http://med.stanford.edu/compmed/mlas.html).

Graduate students and their faculty mentors are encouraged to collaborate with the department’s student services officer for referrals to campus resources, which include Biosci Careers Center, Vaden Health, etc.

Additionally, the program adheres to the advising guidelines and responsibilities listed by the Office of the Vice Provost for Graduate Education (https://vpge.stanford.edu/academic-guidance/advising-mentoring) (VPGE) and in the Graduate Academic Policies (https://gap.stanford.edu/handbooks/gap-handbook/chapter-3/subchapter-3/page-3-3-1) (GAP).

For more information regarding Graduate Student Advising and Postdoctoral/Resident Mentoring, contact the following people:

- Graduate Student Advising: Tom Albert (Student Services Officer), tom.albert@stanford.edu.
- Program Director: Sherril Green (Comparative Medicine Chair), sherril@stanford.edu.
- Postdoctoral Student/Residents: Megan Albertelli (Laboratory Animal Medicine Residency Director), megan.albertelli@stanford.edu.
- Postdoctoral/Resident: Monika Huss ( Resident and Trainee Wellness Advisor), monikag@stanford.edu.

**Chair:** Sherril Green

**Director of Graduate Studies:** Sherril Green

**Co-Director of Graduate Studies:** Corinna Darian-Smith

**Professors:** David Bentzel (Clinical), Donna M. Bouley, Paul Buckmaster, Sherril Green, Shaul Hestrin

**Associate Professors:** Megan Albertelli, Corinna Darian-Smith, Stephen Felt, Joseph Garner, Claude Nagamine

**Assistant Professors:** Kerriann Casey (Clinical), Thomas Cherpes, Monika Huss (Clinical), Cholawat Pacharinsak, Jose Vilches-Moure
