Requirements

Mathematics and Science (45 units minimum):

Mathematics 23

Group A

MATH 53 Ordinary Differential Equations with Linear Algebra

CME 102 Ordinary Differential Equations for Engineers

Group B

CME 106 Introduction to Probability and Statistics for Engineers

STATS 60 Introduction to Statistical Methods: Precalculus

STATS 101 Data Science 101

STATS 110 Statistical Methods in Engineering and the Physical Sciences

Science 20

20 units minimum, including all of the following:

PHYSICS 41 Mechanics

or PHYSICS 41E Mechanics, Concepts, Calculations, and Context

PHYSICS 43 Electricity and Magnetism

or PHYSICS 45 Light and Heat

CHEM 31B Chemical Principles II

or CHEM 31X Chemical Principles Accelerated

CME 70 Environmental Science and Technology

Technology in Society (1 course) 3-5

One 3-5 unit course required; must be on School of Engineering Approved List the year taken.

Writing in the Major (WIM)

One 3-5 unit course required. Choose a TiS course that fulfills a WIM:

BIOE 131 Ethics in Bioengineering

COMM 120W Digital Media in Society

OR one of these WIM courses (do not fulfill TiS):

CEE 100 Managing Sustainable Building Projects

EARTHSYS 200 Environmental Communication in Action: The SAGE Project

Fundamentals and Depth: At least 40 units total must be from the School of Engineering

Engineering Fundamentals

Two courses minimum (recommend 3), including at least one of the following:

ENGR 25E Energy: Chemical Transformations for Production, Storage, and Use

ENGR 50E Introduction to Materials Science, Energy Emphasis

Plus at least one of the following:

ENGR 10 Introduction to Engineering Analysis

ENGR 70A Programming Methodology

A third Fundamental is optional but recommended (3-4 units)

Engineering Depth

Required: 6-8 units. Introductory seminars may not count toward Engineering Depth

CSE 64 Air Pollution and Global Warming: History, Science, and Solutions (cannot also fulfill science requirement) 3

CSE 107A Understanding Energy

or CSE 107S Understanding Energy - Essentials 3-5

34-36 units from the following with at least four courses from each group; at least 40 of the units in ENGR Fundamentals and Depth must be from the School of Engineering:

Group A: Atmosphere

AA 100 Introduction to Aeronautics and Astronautics

CSE 63 Weather and Storms

CSE 101B or ME 70 Mechanics of Fluids

CSE 161C Natural Ventilation of Buildings

CSE 161I Atmosphere, Ocean, and Climate Dynamics: The Atmospheric Circulation

CSE 162I Atmosphere, Ocean, and Climate Dynamics: the Ocean Circulation

CSE 172 Air Quality Management

CSE 178 Introduction to Human Exposure Analysis

EARTHSYS 111 Biology and Global Change

EARTHSYS 142 Remote Sensing of Land

or EARTHSYS 144 Fundamentals of Geographic Information Science (GIS)

EARTHSYS 188 Social and Environmental Tradeoffs in Climate Decision-Making

ME 131B Fluid Mechanics: Compressible Flow and Turbomachinery

PHYSICS 199 The Physics of Energy and Climate Change

EARTH 2 Climate and Society

EARTH 196 Implementing Climate Solutions at Scale

Group B: Energy

CSE 156 Building Systems
CEE 173S Electricity Economics
CEE 176A Energy Efficient Buildings
CEE 176B 100% Clean, Renewable Energy and Storage for Everything
CEE 177S Engineering and Sustainable Development
EARTHSYS 101 Energy and the Environment 5
EARTHSYS 102 Fundamentals of Renewable Power 5
ENERGY 104 Sustainable Energy for 9 Billion
ENGR 50E Introduction to Materials Science, Energy Emphasis 3
MATSCI 144 Thermodynamic Evaluation of Green Energy Technologies
MATSCI 156 Solar Cells, Fuel Cells, and Batteries: Materials for the Energy Solution
ME 182 Electric Transportation
POLISCI 73 Energy Policy in California and the West 5
OSPSANTG 29 Sustainable Cities: Comparative Transportation Systems in Latin America 5
OSPSANTG 52

Total Units 95-101

1 Can count as a science requirement or Engineering Fundamental, but not both.
2 CEE 64 can count as a science requirement or as Engineering Depth, but not both.
3 ENGR 50E can count as Engineering Fundamental or Engineering Depth, but not both.
4 A course may only be counted towards one requirement; it may not be double-counted. All courses taken for the major must be taken for a letter grade if that option is offered by the instructor. Minimum Combined GPA for all courses in Engineering Fundamentals and Depth is 2.0.
5 Courses outside of the School of Engineering (SoE) do not count toward the 40 units of engineering coursework required in the Fundamentals plus Depth categories.

Honors Program
The A/E honors program offers eligible students the opportunity to engage in guided original research, or project design, over the course of an academic year. Interested student must adhere to the following requirements:

1. Prospective honors students write up and submit a 1-2 page letter applying to the honors program in A/E describing the problem to be investigated. The letter must be signed by the student, the current primary adviser, and the proposed honors adviser, if different, and submitted to the student services office in the Department of Civil and Environmental Engineering (CEE). The application must include an unofficial Stanford transcript. Applications must be received in the fourth quarter prior to graduation. It is strongly suggested that prospective honors students meet with the proposed honors adviser well in advance of submitting an application.

2. Students must maintain a GPA of at least 3.5.

3. Students must complete an honors thesis or project over a period of three quarters. The typical length of the written report is 15-20 pages. The deadline for submission of the report is to be decided by the honors adviser, but should be no later than the end of the third week in May.

4. The report must be read and evaluated by the student's honors adviser and one other reader. It is the student’s responsibility to find and obtain both the adviser and the reader. At least one of the two must be a member of the Academic Council in the School of Engineering.

5. Students must present the completed work in an appropriate forum, e.g. in the same session as honors theses are presented in the department of the adviser. All honors programs require some public presentation of the thesis or project.

6. Students may take up to 10 units of CEE 199H Undergraduate Honors Thesis(optional). However, students must take ENGR 202S Directed Writing Projects or its equivalent (required). Units for the writing class are beyond those required for the A/E major.

7. Two copies of the signed thesis must be provided to the CEE student services office no later than two weeks before the end of the student’s graduation quarter.

For additional information and sample programs, see the Handbook for Undergraduate Engineering Programs (UGHB) (http://ughb.stanford.edu).
