## BIOENGINEERING UNDERGRADUATE MAJOR

### COVID-19-Related Degree Requirement Changes
For information on how Bioengineering degree requirements have been affected by the pandemic, see the "COVID-19 Policies tab (http://explordegrees.stanford.edu/schoolofengineering/bioengineering/#covid19policies)" in the "Bioengineering" of this bulletin. For University-wide policy changes related to the pandemic, see the "COVID-19 and Academic Continuity (http://explordegrees.stanford.edu/covid-19-policy-changes/)" section of this bulletin.

See the "Department of Bioengineering (http://explordegrees.stanford.edu/schoolofengineering/bioengineering/)" section of this bulletin for additional information on the department, and its programs and faculty.

### COVID-19-Related Degree Requirement Changes
For information on how Aeronautics and Astronautics degree requirements have been affected by the pandemic, see the "COVID-19 Policies tab (http://explordegrees.stanford.edu/schoolofengineering/bioengineering/#covid19policies)" in the "Bioengineering" of this bulletin. For University-wide policy changes related to the pandemic, see the "COVID-19 and Academic Continuity (http://explordegrees.stanford.edu/covid-19-policy-changes/)" section of this bulletin.

### Bioengineering (BIOE)
Completion of the undergraduate program in Bioengineering leads to the conferral of the Bachelor of Science in Bioengineering.

### Mission of the Undergraduate Program in Bioengineering
The Stanford Bioengineering major enables students to combine engineering and the life sciences in ways that advance scientific discovery, healthcare and medicine, manufacturing, environmental quality, culture, education, and policy. Students who major in BioE earn a fundamental engineering degree for which the raw materials, underlying basic sciences, fundamental toolkit, and future frontiers are all defined by the unique properties of living systems.

Students will complete engineering fundamentals courses, including an introduction to bioengineering and computer programming. A series of core BIOE classes beginning in the second year leads to a student-selected depth area and a senior capstone design project. The department also organizes a summer Research Experience for Undergraduates (REU) (http://bioengineering.stanford.edu/student-resources/reu/) program. BIOE graduates are well prepared to pursue careers and lead projects in research, medicine, business, law, and policy.

### Requirements

#### Mathematics

<table>
<thead>
<tr>
<th>Units</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>10</td>
<td>CME 100 &amp; CME 102</td>
</tr>
</tbody>
</table>

#### Science

<table>
<thead>
<tr>
<th>Units</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td>CHEM 33</td>
</tr>
<tr>
<td>4</td>
<td>BIO 83</td>
</tr>
<tr>
<td>4</td>
<td>BIO 84</td>
</tr>
<tr>
<td>4</td>
<td>PHYSICS 41</td>
</tr>
<tr>
<td>4</td>
<td>PHYSICS 43</td>
</tr>
</tbody>
</table>

#### Technology in Society

<table>
<thead>
<tr>
<th>Units</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>BIOE 131</td>
</tr>
</tbody>
</table>

#### Engineering Fundamentals

<table>
<thead>
<tr>
<th>Units</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>BIOE 80</td>
</tr>
<tr>
<td>5</td>
<td>CS 106A</td>
</tr>
</tbody>
</table>

Fundamentals Elective; see UGHB for approved course list; only one CS class allowed to count toward Fundamentals requirements.

#### Bioengineering Core

<table>
<thead>
<tr>
<th>Units</th>
<th>Description</th>

### Stanford Bulletin 2020-21
BIOE 222  Physics and Engineering Principles of Multi-modality Molecular Imaging of Living Subjects

BIOE 223

BIOE 224  Probes and Applications for Multi-modality Molecular Imaging of Living Subjects

BIOE 225  Intro to Ultrasound Physics and Ultrasound Neuromodulation

BIOE 227  Functional MRI Methods

BIOE 231  Protein Engineering

BIOE 244  Advanced Frameworks and Approaches for Engineering Integrated Genetic Systems

BIOE 260  Tissue Engineering

BIOE 279  Computational Biology: Structure and Organization of Biomolecules and Cells

BIOE 281  Biomechanics of Movement

BIOE 291  Principles and Practice of Optogenetics for Optical Control of Biological Tissues

Total Units: 104-107

1. It is strongly recommended that CME 100 Vector Calculus for Engineers and CME 102 Ordinary Differential Equations for Engineers be taken rather than MATH 51 Linear Algebra, Multivariable Calculus, and Modern Applications and MATH 53 Ordinary Differential Equations with Linear Algebra. If you are taking the MATH 50 series, it is strongly recommended to take CME 192 Introduction to MATLAB. CME 106 Introduction to Probability and Statistics for Engineers utilizes MATLAB, a powerful technical computing program, and should be taken rather than STATS 110 Statistical Methods in Engineering and the Physical Sciences or STATS 141 Biostatistics. Although not required, CME 104 Linear Algebra and Partial Differential Equations for Engineers is recommended for some Bioengineering courses.

2. Science must include both Chemistry (CHEM 31A Chemical Principles I and CHEM 31B Chemical Principles II; or CHEM 31M Chemical Principles: From Molecules to Solids) and calculus-based Physics (PHYSICS 41 Mechanics and PHYSICS 43 Electricity and Magnetism), with two quarters of course work in each, in addition to two courses of BIO core. CHEM 31A Chemical Principles I and CHEM 31B Chemical Principles II are considered one course even though given over two quarters.

3. A course may only be counted towards one requirement; it may not be double-counted. All courses taken for the major must be taken for a letter grade if that option is offered by the instructor. Minimum Combined GPA for all courses in Engineering Fundamentals and Depth is 2.0.

For additional information and sample programs see the Handbook for Undergraduate Engineering Programs (UGHB) (http://ughb.stanford.edu). Students pursuing a premed program need to take additional courses; see the UGHB, BioE Premed 4-Year Plan.

**Honors Program**

The School of Engineering offers a program leading to a Bachelor of Science in Bioengineering with Honors (BIOE-BSH). This program provides the opportunity for qualified BioE majors to conduct independent research at an advanced level with a faculty research adviser and documented in an honors thesis.

In order to receive departmental honors, students admitted to the program must:

1. Declare the honors program in Axess (BIOE-BSH).
2. Maintain an overall grade point average (GPA) of at least 3.5 as calculated on the unofficial transcript.
3. Complete at least two quarters of research with a minimum of nine units of BIOE 191 Bioengineering Problems and Experimental Investigation or BIOE 191X Out-of-Department Advanced Research Laboratory in Bioengineering for a letter grade; up to three units may be used towards the bioengineering depth elective requirements.
4. Submit an electronic pdf copy of their thesis, including the signature page signed by both readers, to Bioengineering student services. Students are sent email instructions on how to archive a permanent electronic copy in Terman Engineering library.
5. Present thesis synopsis at the Bioengineering Honors Poster Fair at the end of Spring Quarter.

For program deadlines, application instructions, and more information, please see the Bioengineering Honors Program (http://bioengineering.stanford.edu/academics/undergraduate-programs/bioengineering-honors-program/) website.
