**Biomedical Computation (BMC)**

Completion of the undergraduate program in Biomedical Computation leads to the conferral of the Bachelor of Science in Engineering. The subplan 'Biomedical Computation' appears on the transcript and on the diploma.

**Mission of the Undergraduate Program in Biomedical Computation**

Quantitative and computational methods are central to the advancement of biology and medicine in the 21st century. These methods span the analysis of biomedical data, the construction of computational models for biological systems, and the design of computer systems that help biologists and physicians create and administer treatments to patients. The Biomedical Computation major prepares students to work at the cutting edge of this interface between computer science, biology, and medicine. Students begin their journey by acquiring foundational knowledge in the underlying biological and computational disciplines. They learn techniques in informatics and simulation and their numerous applications in understanding and analyzing biology at all levels, from individual molecules in cells to entire organs, organisms, and populations. Students then focus their efforts in a depth area of their choosing, and participate in a substantial research project with a Stanford faculty member. Upon graduation, students are prepared to enter a range of disciplines in either academia or industry.

**Requirements**

- **Mathematics**
  - 21 unit minimum, see Basic Requirement 1
  - MATH 19: Calculus (or AP Calculus) 3
  - MATH 20: Calculus (or AP Calculus) 3
  - MATH 21: Calculus (or AP Calculus) 4
  - CS 103: Mathematical Foundations of Computing 3-5
  - CS 109: Introduction to Probability for Computer Scientists 3-5

- **Science**
  - 17 units minimum, see Basic Requirement 2
  - PHYSICS 41: Mechanics 4
  - CHEM 31M: Chemical Principles: From Molecules to Solids (formerly CHEM 31X) 5
  - or CHEM 31B: Chemical Principles II 5
  - CHEM 33: Structure and Reactivity of Organic Molecules 5
  - BIO 82: Genetics (or HUMBIO 2A) 4
  - BIO 83: Biochemistry & Molecular Biology (or BIO 84 or HUMBIO 3A) 4
  - BIO 86: Cell Biology (or HUMBIO 4A) 4

- **Engineering Fundamentals**
  - CS 106B: Programming Abstractions 4

Research: 6 units of biomedical computation research in any department 6

Engineering Depth Concentration (select one of the following concentrations): 7

- **Cellular/Molecular Concentration**
  - Mathematics: Select one of the following:
    - CME 100: Vector Calculus for Engineers
    - STATS 141: Biostatistics
  - MATH 51: Linear Algebra, Multivariable Calculus, and Modern Applications
  - One additional Engineering Fundamental 4
  - BIO 104: Advance Molecular Biology: Epigenetics and Proteostasis
  - CHEM 141: The Chemical Principles of Life I (or CHEM 171) 4 6

- **Cell/Mol Electives** (two courses) 5, 6
  - Informatics Electives (two courses) 5, 6
  - Simulation Electives (two courses) 5, 6
  - Simulation, Informatics, or Cell/Mol Elective (one course) 5, 6

- **Informatics Concentration**
  - Mathematics: Select one of the following:
    - STATS 141: Biostatistics
    - STATS 203: Introduction to Regression Models and Analysis of Variance
    - STATS 205: Introduction to Nonparametric Statistics
    - STATS 215: Statistical Models in Biology
  - One additional Engineering Fundamental 4
  - Informatics Core (three courses):
    - CS 145: Data Management and Data Systems
    - or CS 147: Introduction to Human-Computer Interaction Design
    - CS 221: Artificial Intelligence: Principles and Techniques
    - or CS 228: Probabilistic Graphical Models: Principles and Techniques
    - or CS 229: Machine Learning
  - One additional course from the previous two lines
  - Informatics Electives (three courses) 5, 6
  - Cellular Electives (two courses) 5, 6
  - Organs Electives (two courses) 5, 6

- **Organs/Organisms Concentration**
  - Mathematics (select one of the following):
Honors Program

The Biomedical Computation program offers an honors option for qualified students, resulting in a B.S. with Honors degree in Engineering (ENGR-BSH, Biomedical Computation). An honors project is meant to be a substantial research project during the later part of a student's undergraduate career, culminating in a final written and oral presentation describing the student's project and its significance. There is no limit to the number of majors who can graduate with honors; any BMC major who is interested and meets the qualifications is considered.

1. Students apply by submitting the Honors Program Application Webform found on the BMC website and should be prepared to upload a 1-2 page proposal describing the problem the student has chosen to investigate, its significance, and the student's research plan. This plan must be endorsed by the student's research advisor and academic advisers, one of whom must be a member of the Academic Council. In making its decision, the department evaluates the overall scope and significance of the student’s proposed work.

2. Students must maintain a 3.5 GPA.

3. Students must complete three quarters of research. All three quarters must be on the same project with the same adviser. A Summer Quarter counts as one quarter of research.
   • Ideally, funding should not be obtained through summer research college sources, but rather through the UAR's Student Grants Program (http://studentgrants.stanford.edu/). In no case can the same work be double-paid by two sources.

4. Students must complete a substantial write-up of the research in the format of a publishable research paper. This research paper is expected to be approximately 20-30 pages and must be approved by the student's research adviser and a second reader.

5. Students submit an electronic pdf of their thesis, including the signature page signed by both readers, to Bioengineering student services. Students should review deadlines on the BMC website.

6. As the culmination of the honors project, each student presents their results in the Bioengineering Honors Poster Fair in spring quarter of their senior year.

For additional information and sample programs, see the Handbook for Undergraduate Engineering Programs (UGHB) (http://ughb.stanford.edu).
