CIVIL ENGINEERING UNDERGRADUATE MAJOR

COVID-19-Related Degree Requirement Changes

For information on how Civil Engineering degree requirements have been affected by the pandemic, see the "COVID-19 Policies tab (http://exploredegrees.stanford.edu/schoolofengineering/civilandenvironmentalengineering/#covid19policies)" in the "Civil and Environmental Engineering" of this bulletin. For University-wide policy changes related to the pandemic, see the "COVID-19 and Academic Continuity (http://exploredegrees.stanford.edu/covid-19-policy-changes/)" section of this bulletin.

See the "Department of Civil and Environmental Engineering (http://exploredegrees.stanford.edu/schoolofengineering/civilandenvironmentalengineering/)" section of this bulletin for additional information on the department, and its programs and faculty.

The department offers a B.S. as well as a minor in Civil Engineering (see following), as well as a B.S. in Environmental Systems Engineering (http://exploredegrees.stanford.edu/soe-ug-majors/ese/) and a minor in Environmental Systems Engineering (http://exploredegrees.stanford.edu/schoolofengineering/civilandenvironmentalengineering/#minortext).

Civil Engineering (CE)

Completion of the undergraduate program in Civil Engineering leads to the conferral of the Bachelor of Science in Civil Engineering.

Mission of the Undergraduate Program in Civil Engineering

The mission of the undergraduate program in Civil Engineering is to provide students with the principles of engineering and the methodologies necessary for civil engineering practice. This pre-professional program balances the fundamentals common to many specialties in civil engineering and allows for concentration in any of seven areas: structures, construction, environmental, energy/climate, fluid mechanics/hydrology, urban systems, or sensors/analytics. Students in the major learn to apply knowledge of mathematics, science, and civil engineering to conduct experiments, design structures and systems to creatively solve engineering problems, and communicate their ideas effectively. The major prepares students for careers in consulting, industry and government, as well as for graduate studies in engineering.

Requirements

<table>
<thead>
<tr>
<th>Mathematics and Science</th>
<th>45 units minimum; see Basic Requirement 1 and 2 1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Technology in Society</td>
<td>One course required</td>
</tr>
<tr>
<td>CEE 102A</td>
<td>Legal / Ethical Principles in Design, Construction, Project Delivery 3</td>
</tr>
<tr>
<td>Engineering Fundamentals</td>
<td>Two courses required</td>
</tr>
<tr>
<td>ENGR 14</td>
<td>Intro to Solid Mechanics 3</td>
</tr>
<tr>
<td>ENGR 90/CEE 70</td>
<td>Environmental Science and Technology 3</td>
</tr>
<tr>
<td>Engineering Depth</td>
<td>Minimum of 68 Engineering Fundamentals plus Engineering Depth; see Basic Requirement 5</td>
</tr>
</tbody>
</table>

CEE 100 Managing Sustainable Building Projects 2 4
CS 106A Programming Methodology (or CS 106B, CS 106X, CEE 101D) 5
ME 30 Engineering Thermodynamics (or CHEMENG 110A) 3
CEE 146S Engineering Economics and Sustainability 3
CEE 183 Integrated Civil Engineering Design Project ( Senior Capstone Design Course) 4

Focus Area Electives: at least 12 units in 1 major focus are, + at least 6 units each in 3 other focus areas (see below; no double counting) 4

Additional CEE elective units (either select from focus areas below, from additional approved courses (see Footnote 5), or must be pre-approved by CEE Curriculum Comm.) 13

Total Units 116

1 Mathematics must include CME 100 Vector Calculus for Engineers and CME 102 Ordinary Differential Equations for Engineers (or MATH 51 Linear Algebra, Multivariable Calculus, and Modern Applications and Differential Calculus of Several Variables and MATH 53 Ordinary Differential Equations with Linear Algebra) and a Statistics course (STATS 101 Data Science 101 or STATS 110 Statistical Methods in Engineering and the Physical Sciences or CME 106 Introduction to Probability and Statistics for Engineers or CEE 203 Probabilistic Models in Civil Engineering). Science must include PHYSICS 41 Mechanics (or PHYSICS 41E Mechanics, Concepts, Calculations, and Context); either PHYSICS 43 Electricity and Magnetism or PHYSICS 45 Light and Heat; either CHEM 31A Chemical Principles I or CHEM 31M Chemical Principles: From Molecules to Solids; at least one of CEE 177 Aquatic Chemistry and Biology (required for major focus in fluid mechanics/hydrology or environmental quality) or GEOLSCI 1 Introduction to Geology (required for major focus in structural, construction, urban systems, energy/climate or sensing/analytics); and additional physics, chemistry or mathematics to reach 45 units.

2 CEE 100 meets the Writing in the Major (WIM) requirement

3 A course may only be counted towards one requirement; it may not be double-counted. All courses taken for the major must be taken for a letter grade if that option is offered by the instructor. Minimum Combined GPA for all courses in Engineering Fundamentals and Depth is 2.0.

4 To satisfy ABET criteria, electives must include at least 2 of the following 4 courses: CEE 101A, 101B, 101C, 101D.

5 Preapproved courses for additional CEE elective units: ENGR 10, 15, 21, 25E, 40M (or 40A), 50 (or 50E or 50M); CEE 74N, 80N; and up to 4 units of CEE 199 or CEE 199L.

Stanford Bulletin 2020-21
Energy and Climate Focus

CEE 63  Weather and Storms  3
CEE 64  Air Pollution and Global Warming: History, Science, and Solutions  3
CEE 107A  Understanding Energy (or CEE 107S)  3-5
CEE 107R  E3: Extreme Energy Efficiency  3
CEE 156  Building Systems Design & Analysis  4
CEE 172  Air Quality Management  3
CEE 176A  Energy Efficient Buildings  3
CEE 176B  100% Clean, Renewable Energy and Storage for Everything  3-4

Environmental Fluid Mechanics & Hydrology Focus

CEE 101B  Mechanics of Fluids  4
CEE 161I  Atmosphere, Ocean, and Climate Dynamics: The Atmospheric Circulation  3
CEE 162D  Introduction to Physical Oceanography  4
CEE 162F  Coastal Processes  3
CEE 162I  Oceanography  3
CEE 166A  Watershed Hydrologic Processes and Models  3
CEE 166B  Water Resources and Hazards  3
CEE 175A  California Coast: Science, Policy, and Law  3-4

Environmental Quality Engineering for Human Health Focus

CEE 172  Air Quality Management  3
CEE 174A  Providing Safe Water for the Developing and Developed World  3
CEE 174B  Wastewater Treatment: From Dispersion to Resource Recovery  3
CEE 175A  California Coast: Science, Policy, and Law (alt. years)  3-4
CEE 178  Introduction to Human Exposure Analysis  3
CEE 265D  Water and Sanitation in Developing Countries  3

Sensing, Analytics and Control Focus

CEE 101D  Computations in Civil and Environmental Engineering  3
CEE 154  Data Analytics for Physical Systems  3-4
CEE 155  Introduction to Sensing Networks for CEE  3-4
CEE 156  Building Systems Design & Analysis  3
CEE 177L  Smart Cities & Communities  3
ME 161  Dynamic Systems, Vibrations and Control  3-4
ME 210  Introduction to Mechatronics  4

Structural Engineering and Mechanics Focus

CEE 101A  Mechanics of Materials  4
CEE 101C  Geotechnical Engineering  4
CEE 101D  Computations in Civil and Environmental Engineering  3

CEE 180  Structural Analysis  4
CEE 182  Structural Design  4
CEE 192  Properties of Rocks and Geomaterials  3-4
ME 151  Introduction to Computational Mechanics  4

Urban Systems Focus

CEE 120A  Building Modeling for Design & Construction  3
CEE 130  Architectural Design: 3-D Modeling, Methodology, and Process  5
CEE 156  Building Systems Design & Analysis  4
CEE 176A  Energy Efficient Buildings  3-4
CEE 177L  Smart Cities & Communities  3
CEE 243  Intro to Urban Sys Engng  3

Honors Program

This program leads to a B.S. with honors for undergraduates majoring in Civil Engineering or in Environmental Systems Engineering. It is designed to encourage qualified students to undertake a more intensive study of civil and environmental engineering than is required for the normal majors through a substantial, independent research project.

The program involves an in-depth research study in an area proposed to and agreed to by a Department of Civil and Environmental Engineering faculty adviser and completion of a thesis of high quality. A written proposal for the research to be undertaken must be submitted and approved by the faculty adviser in the fourth quarter prior to graduation. At the time of application, the student must have an overall grade point average (GPA) of at least 3.3 for course work at Stanford; this GPA must be maintained to graduation. The thesis is supervised by a CEE faculty adviser and must involve input from the School of Engineering writing program by means of ENGR 202S Directed Writing Projects or ENGR 199W Writing of Original Research for Engineers. The written thesis must be approved by the thesis adviser. Students are encouraged to present their results in a seminar for faculty and students. Up to 10 units of CEE 199H Undergraduate Honors Thesis, may be taken to support the research and writing (not to duplicate ENGR 202S or ENGR 199W). These units are beyond the normal Civil Engineering or Environmental Systems Engineering major program requirements.

For additional information on the major, minor, honors and sample programs see the Handbook for Undergraduate Engineering Programs (UGHB) (http://ughb.stanford.edu).

Honors Program

This program leads to a B.S. with honors for undergraduates majoring in Civil Engineering or in Environmental Systems Engineering. It is designed to encourage qualified students to undertake a more intensive study of civil and environmental engineering than is required for the normal majors through a substantial, independent research project.

The program involves an in-depth research study in an area proposed to and agreed to by a Department of Civil and Environmental Engineering faculty adviser and completion of a thesis of high quality. A written proposal for the research to be undertaken must be submitted and approved by the faculty adviser in the fourth quarter prior to graduation. **Civil Engineering (CE) Minor**

The civil engineering minor is intended to give students a focused introduction to one or more areas of civil engineering. Departmental expertise and undergraduate course offerings are available in the areas of Architectural Design, Construction Engineering and Management, and Structural and Geotechnical Engineering. Students interested in Environmental and Water Studies should refer to the Environmental Systems Engineering minor.

The minimum prerequisite for a civil engineering minor is MATH 19 Calculus (or MATH 20 Calculus or MATH 21 Calculus); however, many courses of interest require PHYSICS 41 Mechanics and/or MATH 51 Linear Algebra, Multivariable Calculus, and Modern Applications as prerequisites. The minimum prerequisite for a Civil Engineering minor focusing on architectural design is MATH 19 Calculus (or MATH 20 Calculus or MATH 21 Calculus). Students should recognize that a minor in civil engineering is not an ABET-accredited degree program.

Since undergraduates having widely varying backgrounds may be interested in obtaining a civil engineering minor, and the field itself is so broad, no single set of course requirements will be appropriate for all students. Instead, interested students are encouraged to propose their own set of courses within the guidelines listed below. Additional information, including example minor programs, are provided on the CEE web site (http://cee.stanford.edu/prospective/undergrad/minor_overview.html) and in Chapter 6 of the Handbook for Undergraduate Engineering Programs (http://ughb.stanford.edu/).

General guidelines are:

1. A civil engineering minor must contain at least 24 units of course work not taken for the major, and must consist of at least six classes of at least 3 units each of letter-graded work, except where letter grades are not offered.
2. The list of courses must represent a coherent body of knowledge in a focused area, and should include classes that build upon one another. Example programs are given on the CEE webpage.

Professor Anne Kiremidjian (kiremidjian@stanford.edu) is the CEE undergraduate minor adviser in Structural Engineering and Construction Engineering and Management. John Barton (jhbarton@stanford.edu), Program Director for Architectural Design, is the undergraduate minor adviser in Architectural Design. Students must consult the appropriate adviser when developing their minor program, and obtain approval of the finalized study list from them.
