ENGINEERING PHYSICS
UNDERGRADUATE MAJOR

Engineering Physics (EPHYS)
Completion of the undergraduate program in Engineering Physics leads to
the conferral of the Bachelor of Science in Engineering. The subplan
“Engineering Physics” appears on the transcript and on the diploma.

Mission of the Undergraduate Program in Engineering Physics
The mission of the undergraduate program in Engineering Physics is to
provide students with a strong foundation in physics and
mathematics, together with engineering and problem-solving
skills. All majors take high-level math and physics courses as well
as engineering courses. This background prepares them to tackle
complex problems in multidisciplinary areas that are at the forefront
of 21st-century technology such as aerospace physics, biophysics,
computational science, quantum science & engineering, materials
science, nanotechnology, electromechanical systems, energy systems,
renewable energy, and any other engineering field that requires a solid
background in physics. Because the program emphasizes science,
mathematics, and engineering, students are well prepared to pursue
graduate work in engineering, physics, or applied physics.

**Mathematics and Engineering Physics Undergraduate Major**

**Engineering Physics Undergraduate Major**

**MATSCI 164**
Electronic and Photonic Materials and Devices Laboratory (Okay for Materials Science and Renewable Energy specialties)

**PHYSICS 107**
Intermediate Physics Laboratory II: Experimental Techniques and Data Analysis (for Photonics or other specialty)

**Quantum Mechanics**
Select one of the following sequences: 6-8

- **EE 222**
  - Applied Quantum Mechanics I
- **& EE 223**
  - Applied Quantum Mechanics II
- **PHYSICS 130**
  - Quantum Mechanics I
- **& PHYSICS 131**
  - Quantum Mechanics II

**Thermodynamics and Statistical Mechanics**

- **PHYSICS 170**
  - Thermodynamics, Kinetic Theory, and Statistical Mechanics I
- **& PHYSICS 171**
  - Thermodynamics, Kinetic Theory, and Statistical Mechanics II

or **ME 346A**
Introduction to Statistical Mechanics

**Design Course**
Select one of the following: 3-4

- **AA 236A**
  - Spacecraft Design
- **CS 108**
  - Object-Oriented Systems Design
- **EE 133**
  - Analog Communications Design Laboratory
- **ME 203**
  - Design and Manufacturing
- **ME 210**
  - Introduction to Mechatronics
- **PHYSICS 108**
  - Advanced Physics Laboratory: Project

**Specialty Tracks**
See Undergraduate Engineering Handbook for important details. Select three courses from one specialty area: 9-12

**Aerospace Physics:**
- **AA 203**
  - Introduction to Optimal Control and Dynamic Optimization
- **AA 244A**
  - Introduction to Plasma Physics and Engineering
- **AA 251**
  - Introduction to the Space Environment
- **AA 279A**
  - Space Mechanics
- **ME 161**
  - Dynamic Systems, Vibrations and Control

**Materials Science:**
Any MATSCI courses numbered 151 to 199 (except 159Q) or PHYSICS 172

**Electromechanical System Design:**
- **ME 80**
  - Mechanics of Materials
- **ME 112**
  - Mechanical Systems Design
- **ME 210**
  - Introduction to Mechatronics
- or **EE 118**
  - Introduction to Mechatronics

**Energy Systems:**
- **ME 131A**
  - Heat Transfer
- **ME 131B**
  - Fluid Mechanics: Compressible Flow and Turbomachinery
- **ME 140**
  - Advanced Thermal Systems

**Renewable Energy:**
- **CEE 176B**
  - 100% Clean, Renewable Energy and Storage for Everything
- **EE 153**
  - Power Electronics
- **EE 155**
  - Green Electronics
- **EE 293A**
  - Fundamentals of Energy Processes
- **MATSCI 156**
  - Solar Cells, Fuel Cells, and Batteries: Materials for the Energy Solution

**Quantum Science & Engineering**

- **APPPHYS 203**
  - Atoms, Fields and Photons
- **APPPHYS 225**
  - Probability and Quantum Mechanics
- **APPPHYS 383**

**Computational Science:**

- **CME 212**
  - Advanced Software Development for Scientists and Engineers
- **CME 215A**
  - Advanced Computational Fluid Dynamics
- **CME 215B**
  - Advanced Computational Fluid Dynamics

Any CME course with course number greater than 300 and less than 390

- **CS 103**
  - Mathematical Foundations of Computing
- **CS 154**
  - Introduction to Automata and Complexity Theory
- **CS 161**
  - Design and Analysis of Algorithms
- **CS 205A**
  - Artificial Intelligence: Principles and Techniques
- **CS 228**
  - Probabilistic Graphical Models: Principles and Techniques
- **CS 229**
  - Machine Learning
- **STATS 202**
  - Data Mining and Analysis
- **STATS 213**
  - Introduction to Graphical Models

**Biophysics:**

- **APPPHYS 203**
  - Introduction to Biophysics
- **BIO 132**
  - Advanced Imaging Lab in Biophysics
- **BIOE 41**
  - Physical Imaging
- **BIOE 42**
  - Physical Biology
- **BIOE 44**
  - Fundamentals for Engineering Biology Lab
- **BIOE 101**
  - Systems Biology
- **BIOE 103**
  - Systems Physiology and Design
- **BIOE 123**
  - Biomedical System Prototyping Lab
- **BIOE 211**
  - Biophysics of Multi-cellular Systems and Amorphous Computing
- **BIOE 214**
  - Representations and Algorithms for Computational Molecular Biology
- **EE 169**
  - Introduction to Bioimaging
- or **EE 369A**
  - Medical Imaging Systems I

**Total Units**
93-119

---

1 PHYSICS 67 Introduction to Laboratory Physics (2 units), recommended in place of PHYSICS 44 Electricity and Magnetism Lab
The Engineering Fundamental courses are to be selected from the Basic Requirements 3 list. Fundamentals courses acceptable for the core program may also be used to satisfy the fundamentals requirement as long as 45 unduplicated units of Engineering are taken. Although not required, PHYSICS 59 (https://explorecourses.stanford.edu/search?view=catalog&filter-coursestatus-Active=on&page=0&catalog=&academicYear=&q=physics59&collapse=) (Frontiers in Physics Research, 1 unit) and PHYSICS 91SI (https://explorecourses.stanford.edu/search?view=catalog&filter-coursestatus-Active=on&page=0&catalog=&academicYear=&q=physics91si&collapse=) (Practical Computing for Scientists, 2 units) are highly recommended. A course may only be counted towards one requirement; it may not be double-counted. All courses taken for the major must be taken for a letter grade if that option is offered by the instructor. Minimum Combined GPA for all courses in Engineering Fundamentals and Depth is 2.0.

For additional information and sample programs see the Handbook for Undergraduate Engineering Programs (UGHB) (http://ughb.stanford.edu).

**Honors Program**

The School of Engineering offers a program leading to a Bachelor of Science in Engineering: Engineering Physics with Honors.

**Honors Criteria**

1. Minimum overall GPA of 3.5.
2. Independent research conducted at an advanced level with a faculty research adviser and documented in an honors thesis. The honors candidate must identify a faculty member who will serve as his or her honors research adviser and a second reader who will be asked to read the thesis and give feedback before endorsing the thesis. One of the two must be a member of the Academic Council and in the School of Engineering.

Application: The deadline to apply is October 15 in Autumn Quarter of the senior year. The application documents should be submitted to the Student Services Officer. Applications are reviewed by a subcommittee of the faculty advisers for Engineering Physics majors. Applicants and thesis advisers receive written notification when the application is approved. An application consists of three items:

1. One-page description of the research topic
3. Unofficial Stanford transcript

**Requirements and Timeline for Honors in Engineering Physics:**

1. Declare the honors program in Axess (ENGR-BSH, Subplan: Engineering Physics)
2. Obtain application form from the student services officer.
3. Apply to honors program by October 15 in the Autumn Quarter of the senior year.
4. Maintain an overall GPA of at least 3.5.
5. Optional: Under direction of the thesis adviser, students may enroll for research units in ENGR 199(W) or in departmental courses such as AA 190 or ME 191(H).
6. Submit a completed thesis draft to the research adviser and second reader by April 15.
7. Present the thesis work in an oral presentation or poster session in an appropriate forum (e.g., an event that showcases undergraduate research and is organized by the department of the adviser, the school of the adviser, or the University).
8. Incorporate feedback, which the adviser and second reader should provide by April 30, and obtain final endorsement signatures from the thesis adviser and second reader by May 15.
9. Submit one signed, single-sided copy to the student services officer by May 15. Students are sent email instructions on how to archive a permanent electronic copy in Terman Engineering library.
