MATERIALS SCIENCE AND ENGINEERING UNDERGRADUATE MAJOR

COVID-19-Related Degree Requirement Changes
For information on how Materials Science and Engineering degree requirements have been affected by the pandemic, see the "COVID-19 Policies tab (http://exploredegrees.stanford.edu/schoolofengineering/materialsscienceandengineering/#covid19policiestext)” in the "Materials Science and Engineering” of this bulletin. For University-wide policy changes related to the pandemic, see the "COVID-19 and Academic Continuity (http://exploredegrees.stanford.edu/covid-19-policy-changes/” section of this bulletin.

The department offers a B.S. as well as a minor in Materials Science and Engineering.

Bachelor of Science in Materials Science and Engineering (MSE/MATSCI)
Completion of the undergraduate program in Materials Science and Engineering leads to the conferral of the Bachelor of Science in Materials Science and Engineering.

Mission of the Undergraduate Program in Materials Science and Engineering
The mission of the undergraduate program in Materials Science and Engineering is to provide students with a strong foundation in materials science and engineering with emphasis on the fundamental scientific and engineering principles which underlie the knowledge and implementation of material structure, processing, properties, and performance of all classes of materials used in engineering systems. Courses in the program develop students' knowledge of modern materials science and engineering, teach them to apply this knowledge analytically to create effective and novel solutions to practical problems, and develop their communication skills and ability to work collaboratively. The program prepares students for careers in industry and for further study in graduate school.

The B.S. in Materials Science and Engineering provides training for the materials engineer and also preparatory training for graduate work in materials science. Capable undergraduates are encouraged to take at least one year of graduate study to extend their course work through the coterminous degree program which leads to an M.S. in Materials Science and Engineering. Coterminous degree programs are encouraged both for undergraduate majors in Materials Science and Engineering and for undergraduate majors in related disciplines.

Learning Outcomes (Undergraduate)
The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate the ability to:

1. Apply the knowledge of mathematics, science, and engineering to assess and synthesize scientific evidence, concepts, theories, and experimental data relating to the natural or physical world.
2. Extend students' knowledge of the natural or physical world beyond that obtained from secondary education by refining their powers of scientific observation, the essential process by which data is gained for subsequent analysis.
3. Design and conduct experiments, as well as understand and utilize the scientific method in formulating hypotheses and designing experiments to test hypotheses.
4. Function on multidisciplinary teams, while communicating effectively.
5. Identify, formulate, and solve engineering issues by applying conceptual thinking to solve certain problems, bypassing calculations or rote learning and relying on the fundamental meaning behind laws of nature.
6. Understand professional and ethical responsibility.
7. Understand the impact of engineering solutions in a global, economic, environmental, and societal context.
8. Demonstrate a working knowledge of contemporary issues.
9. Recognize the need for, and engage in, lifelong learning.
10. Apply the techniques, skills, and modern engineering tools necessary for engineering practice.
11. Transition from engineering concepts and theory to real engineering applications and understanding the distinction between scientific evidence and theory, inductive and deductive reasoning, and understanding the role of each in scientific inquiry.

At least one additional course 4

**Materials Science Fundamentals:** All of the following courses: 16

- MATSCI 142 Quantum Mechanics of Nanoscale Materials
- MATSCI 143 Materials Structure and Characterization
- MATSCI 144 Thermodynamic Evaluation of Green Energy Technologies
- MATSCI 145 Kinetics of Materials Synthesis

Two of the following courses: 8

- MATSCI 151 Microstructure and Mechanical Properties
- MATSCI 152 Electronic Materials Engineering
- MATSCI 156 Solar Cells, Fuel Cells, and Batteries: Materials for the Energy Solution
- MATSCI 158 Soft Matter in Biomedical Devices, Microelectronics, and Everyday Life
- MATSCI 190 Organic and Biological Materials
- MATSCI 192 Materials Chemistry
- MATSCI 193 Atomic Arrangements in Solids
- MATSCI 194 Thermodynamics and Phase Equilibria
- MATSCI 195 Waves and Diffraction in Solids
- MATSCI 196 Defects in Crystalline Solids
- MATSCI 197 Rate Processes in Materials
- MATSCI 198 Mechanical Properties of Materials
- MATSCI 199 Electronic and Optical Properties of Solids

**Materials Science & Engineering Depth** 16

Four laboratory courses for Sixteen units; Four units must be WIM

- MATSCI 160 Nanomaterials Laboratory
- MATSCI 161 Energy Materials Laboratory (WIM)
- MATSCI 162 X-Ray Diffraction Laboratory
- MATSCI 163 Mechanical Behavior Laboratory
- MATSCI 164 Electronic and Photonic Materials and Devices Laboratory (WIM)
- MATSCI 165 Nanoscale Materials Physics Computation Laboratory
- MATSCI 166 Data Science and Machine Learning Approaches in Chemical and Materials Engineering

Focus Area Options 4, 6 13

Total Units 103-107

---

1. See a list of approved math courses at ughb.stanford.edu/courses-and-planning/approved-courses/. AP/IB Credit (https://ughb.stanford.edu/petitions/ap-credit/) may also be used to meet the 20 units minimum, but cannot replace the three required courses.

2. See a list of approved science courses at ughb.stanford.edu/courses-and-planning/approved-courses/. AP/IB Credit (https://ughb.stanford.edu/petitions/ap-credit/) may also be used to meet the 20 units minimum in some cases; see the AP chart in the Bulletin or check with the School of Engineering in 135 Huang Engineering Center.

3. See a list of approved Technology in Society courses at ughb.stanford.edu/courses-and-planning/approved-courses/. Course chosen must be on the approved list the year taken.

4. See a list of approved Engineering Fundamentals Courses at ughb.stanford.edu. Course chosen must be on the approved list the year taken.

5. Focus Area Options: 13 units from one of the following Focus Area Options below. If the focus area contains only 12 units, but the combined unit total in major (SoE Fundamentals, MSE Fundamentals, MSE Depth and the Focus Area) is at 60 or more, it will be allowed and no petition is necessary.

6. The self-defined focus area option requires additional approval; program deviation forms for this option can be found on the MSE website (https://mse.stanford.edu/student-resources/forms/undergraduate/).

---

**Focus Area Options (Four courses for a minimum of 13 units; select from one of the ten Focus Areas.)**

**Bioengineering**

- BIOE 80 Introduction to Bioengineering (Engineering Living Matter)
- BIOE 220 Introduction to Imaging and Image-based Human Anatomy
- BIOE 260 Tissue Engineering
- BIOE 281 Biomechanics of Movement
- BIOE 381 Orthopaedic Bioengineering

**Chemical Engineering**

- CHEM 171 Foundations of Physical Chemistry
- CHEMENG 130
- CHEMENG 140 Micro and Nanoscale Fabrication Engineering
- CHEMENG 150 Biochemical Engineering
- MATSCI 158 Soft Matter in Biomedical Devices, Microelectronics, and Everyday Life

**Chemistry**

- CHEM 151 Inorganic Chemistry I
- CHEM 153 Inorganic Chemistry II
- CHEM 171 Foundations of Physical Chemistry
- CHEM 173 Physical Chemistry II
- CHEM 175 Physical Chemistry III
- CHEM 181 Biochemistry I
- CHEM 183 Biochemistry II
- CHEM 185 Biophysical Chemistry

**Electronics & Photonics**

- EE 101A Circuits I
- EE 101B Circuits II
- EE 102A Signal Processing and Linear Systems I
- EE 102B Signal Processing and Linear Systems II
Materials Science and Engineering Undergraduate Major

### Energy Technology
- EE 293B: Fundamentals of Energy Processes
- EE 155: Green Electronics
- CEE 107A: Understanding Energy
- EE 293B: Fundamentals of Energy Processes
- MATSCI 156: Solar Cells, Fuel Cells, and Batteries: Materials for the Energy Solution
- MATSCI 302: Solar Cells
- MATSCI 303: Principles, Materials and Devices of Batteries
- ME 262: Physics of Wind Energy

### Materials Characterization Techniques
- MATSCI 320: Nanocharacterization of Materials
- MATSCI 321: Transmission Electron Microscopy
- MATSCI 322: Transmission Electron Microscopy Laboratory
- MATSCI 323: Thin Film and Interface Microanalysis
- MATSCI 326: X-Ray Science and Techniques
- CHEMENG 345: Fundamentals and Applications of Spectroscopy
- BIO 232: Advanced Imaging Lab in Biophysics
- APPPHYS 201: Electrons and Photons (PHOTON 201)

### Mechanical Behavior & Design
- AA 240: Analysis of Structures
- AA 256: Mechanics of Composites
- MATSCI 198: Mechanical Properties of Materials
- MATSCI 241: Mechanical Behavior of Nanomaterials
- MATSCI 358: Fracture and Fatigue of Materials and Thin Film Structures
- ME 80: Mechanics of Materials
- or CEE 101A: Mechanics of Materials
- ME 203: Design and Manufacturing

### Nanoscale Science
- ENGR 240: Introduction to Micro and Nano Electromechanical Systems
- MATSCI 241: Mechanical Behavior of Nanomaterials
- MATSCI 316: Nanoscale Science, Engineering, and Technology
- MATSCI 320: Nanocharacterization of Materials
- MATSCI 346: Nanophotonics
- MATSCI 347: Magnetic materials in nanotechnology, sensing, and energy
- MATSCI 380: Nano-Biotechnology

### Physics
- PHYSICS 70: Foundations of Modern Physics
- PHYSICS 110: Advanced Mechanics
- PHYSICS 120: Intermediate Electricity and Magnetism I
- PHYSICS 121: Intermediate Electricity and Magnetism II
- PHYSICS 130: Quantum Mechanics I
- PHYSICS 131: Quantum Mechanics II
- PHYSICS 134: Advanced Topics in Quantum Mechanics
- PHYSICS 170: Thermodynamics, Kinetic Theory, and Statistical Mechanics I
- PHYSICS 171: Thermodynamics, Kinetic Theory, and Statistical Mechanics II
- PHYSICS 172: Solid State Physics

### Self-Defined Option
- Petition for a self-defined cohesive program.

For additional information and sample programs see the Handbook for Undergraduate Engineering Programs (http://ughb.stanford.edu).

## Honors Program

The Materials Science and Engineering honors program offers an opportunity for undergraduate Materials Science and Engineering majors with a GPA of 3.5 or higher to pursue independent research at an advanced level, supported by a faculty advisor and graduate student mentors. The main requirements are as follows:

1. Application to the honors program (must be pre-approved by faculty advisor)
2. Enrollment in MATSCI 150 Undergraduate Research and participation in an independent research project over three sequential full quarters
3. Completion of a faculty-approved thesis
4. Participation in either a poster or oral presentation of thesis work at a Stanford Symposium/event or, at your faculty advisor’s discretion, in a comparable public event.

Since this requires three full quarters of research in addition to a final written thesis and presentation following completion of the work, students must apply to the program no less than four quarters prior to their planned graduation date. Materials Science and Engineering majors pursuing a typical four-year graduation timeline should meet with student services no later than the Winter Quarter of their junior year to receive information on the application process.

All requirements for the honors program are in addition to the normal undergraduate program requirements.

### To apply to the MATSCI Honors program
- Have an overall GPA of 3.5 or higher (as calculated on the unofficial transcript) prior to application.
- Seek out a faculty research advisor and agree on a proposed research topic. If the research advisor is not a member of the MSE faculty or not a member of the School of Engineering Academic Council, students must have a second advisor who fulfills these requirements.
- Compose a brief (less than 1 page) summary of proposed research, including a proposed title, and submit along with unofficial transcript) prior to application.
- Application to the honors program (must be pre-approved by faculty advisor)
- Participation in either a poster or oral presentation of thesis work at a Stanford Symposium/event or, at your faculty advisor’s discretion, in a comparable public event.

### To complete the MATSCI Honors program
- Submit application to MATSCI student services (Durand 113) at least four quarters prior to planned graduation.
- Overall GPA of 3.5 or higher (as calculated on the unofficial transcript) at graduation.
- Complete at least three quarters of research with a minimum of 9 units of MATSCI 150 (students may petition out of unit requirement with faculty advisor approval). All quarters must focus on the same topic. Maintain the same faculty adviser throughout, if possible.
• Present either a poster or oral presentation of thesis work at a Stanford event or, at the faculty advisor's discretion, in a comparable public event.

• Submit final drafts of an honors thesis to two faculty readers (one must be your research advisor, and one must be an MSE faculty member/SoE Academic Council member) at least one quarter prior to graduation. Both must approve the thesis by completing the signature page (https://mse.stanford.edu/student-resources/forms/undergraduate/).

• Submit to MATSCI student services (Durand 113) one copy of the honors thesis and signed signature page (in electronic or physical form) at least one quarter prior to graduation.

Materials Science and Engineering (MATSCI) Minor

A minor in Materials Science and Engineering allows interested students to explore the role of materials in modern technology and to gain an understanding of the fundamental processes that govern materials behavior.

The following courses fulfill the minor requirements:

<table>
<thead>
<tr>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
</tr>
</tbody>
</table>

**Engineering Fundamentals**

Select one of the following:

<table>
<thead>
<tr>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
</tr>
</tbody>
</table>

- ENGR 50  Introduction to Materials Science, Nanotechnology Emphasis
- ENGR 50E Introduction to Materials Science, Energy Emphasis
- ENGR 50M Introduction to Materials Science, Biomaterials Emphasis

**Materials Science Fundamentals and Engineering Depth**

Select six of the following:

<table>
<thead>
<tr>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>24</td>
</tr>
</tbody>
</table>

- MATSCI 142 Quantum Mechanics of Nanoscale Materials
- MATSCI 143 Materials Structure and Characterization
- MATSCI 144 Thermodynamic Evaluation of Green Energy Technologies
- MATSCI 145 Kinetics of Materials Synthesis
- MATSCI 151 Microstructure and Mechanical Properties
- MATSCI 152 Electronic Materials Engineering
- MATSCI 156 Solar Cells, Fuel Cells, and Batteries: Materials for the Energy Solution
- MATSCI 158 Soft Matter in Biomedical Devices, Microelectronics, and Everyday Life
- MATSCI 160 Nanomaterials Laboratory
- MATSCI 161 Energy Materials Laboratory
- MATSCI 162 X-Ray Diffraction Laboratory
- MATSCI 163 Mechanical Behavior Laboratory
- MATSCI 164 Electronic and Photonic Materials and Devices Laboratory
- MATSCI 165 Nanoscale Materials Physics Computation Laboratory
- MATSCI 190 Organic and Biological Materials
- MATSCI 192 Materials Chemistry
- MATSCI 193 Atomic Arrangements in Solids
- MATSCI 194 Thermodynamics and Phase Equilibria
- MATSCI 195 Waves and Diffraction in Solids
- MATSCI 196 Defects in Crystalline Solids
- MATSCI 197 Rate Processes in Materials
