

TEACHING AND LEARNING

The Office of the Vice Provost for Teaching and Learning (VPTL) supports undergraduate, graduate, professional, and lifelong learning.

VPTL provides essential resources and learning support services to Stanford students through its student learning center at Lathrop Library including:

- peer tutoring in subjects
- support for language instruction in the Digital Language Lab
- academic skills coaching
- 24-hour student study space
- equipment check out and multimedia consulting through the Tech Desk
- virtual and mixed reality tools (<https://studenttechnology.stanford.edu/virtual-and-mixed-reality-tools>)
- 3D printing in create:space.

In addition, VPTL provides residential computing and networking support through Resident Computer Consultants (RCCs), and computing and printing services in clusters located throughout campus. VPTL offers a range of student jobs and internships, and credit-bearing courses to enrolled Stanford students.

In addition to student services, VPTL offers integrated services and resources (<https://vptl.stanford.edu/getting-started-vptl>) to support faculty and instructors in their efforts to advance pedagogy throughout Stanford's seven schools. For example, VPTL supports Canvas, Stanford's learning management system, as well as Stanford's end-term course feedback system (<https://evals.stanford.edu>). It provides orientation and mentoring for student instructors and post-docs.

Instructors

Director of Graduate Teaching & Peer Learning Programs: Tim Randazzo

Associate Director of Faculty and Lecturer Programs: Diane Lam

Assistant Director of Peer Learning and Tutoring Programs: Alex Ayers
